The Unconscious as Space Anca Carrington, 2024-06-03 The Unconscious as Space explores the experience of being and the practice of psychoanalysis by thinking of the unconscious in mathematical terms Anca Carrington introduces mathematical models of space from dimension theory to algebraic topology and knot theory and considers their immediate psychoanalytic relevance The hypothesis that the unconscious is structured like a space marked by impossibility is then examined Carrington considers the clinical implications with particular focus on the interplay between language and the unconscious as related topological spaces in which movement takes place along knot like pathways The

Unconscious as Space will be of appeal to psychotherapists psychoanalysts and mental health professionals in practice and in training

Lumen Naturae Matilde Marcolli, 2020-05-26 Exploring common themes in modern art mathematics and science including the concept of space the notion of randomness and the shape of the cosmos This is a book about art and a book about mathematics and physics In *Lumen Naturae* the title refers to a purely immanent non supernatural form of enlightenment mathematical physicist Matilde Marcolli explores common themes in modern art and modern science the concept of space the notion of randomness the shape of the cosmos and other puzzles of the universe while mapping convergences with the work of such artists as Paul Cezanne Mark Rothko Sol LeWitt and Lee Krasner Her account focusing on questions she has investigated in her own scientific work is illustrated by more than two hundred color images of artworks by modern and contemporary artists Thus Marcolli finds in still life paintings broad and deep philosophical reflections on space and time and connects notions of space in mathematics to works by Paul Klee Salvador Dal and others She considers the relation of entropy and art and how notions of entropy have been expressed by such artists as Hans Arp and Fernand L ger and traces the evolution of randomness as a mode of artistic expression She analyzes the relation between graphical illustration and scientific text and offers her own watercolor decorated mathematical notebooks Throughout she balances discussions of science with explorations of art using one to inform the other She employs some formal notation which can easily be skipped by general readers Marcolli is not simply explaining art to scientists and science to artists she charts unexpected interdependencies that illuminate the universe

On the Moral Nature of the Universe

Nancey C. Murphy,George Francis Rayner Ellis, Ellis and Murphy show how contemporary sciences actually support a religiously based ethic of nonviolence not by appealing to the Enlightenment s mechanistic Creator God or revelation s Father God but by discerning the transcendent ground in the laws of nature the emergence of intelligent freedom and the echoes of knoetic self giving in cosmology and biology

A Quotidian Quash Dorian Redus,2022-12-27 This manuscript was not supposed to go public However because it was written in three joined parts and over two consecutive years there was a problem as to what to call it chronically 1969 2011 or 1969 2012 So the author chose the latter Author Mr Redus has looked into the cathode ray tube of his soul to find his way out of his commonplace silencing It is what A Quotidian Quash really means Actually in his book the evolving cosmological TV energy of his puzzling psychiatric history from junior college years to decades as a psychiatric inpatient unfolds and jumps A Quotidian Quash also puts forth two new cosmic theories RCTVU

relativistic color television universe and STS space time sphere as Mr Redus also blows the whistle on California s Department of State hospitals for being a psychiatric minatorial minotaur masquerading as a menial mentor There is evidence of his many past psychiatrists paranoia in this book but when his psychiatric future arrives his tomorrow comes to us as his RCTVU theory pristine and virgin it is excellent and okay as it puts itself in his creative hands Moreover it requires that we have learned something from our evolutionary yesterday or from God in and subtly outside of his book s other speculative theory STS theory This is a book of many therapeutic letters mostly to his California therapists And in it we learn that they were so very interested in recording something wrong with him their long term psychiatric patient Mr Redus that there became something very obviously paranoid and wrong with how all of his California therapists treated him their long term psychiatric patient from the start of his treatment to the finish of my treatment with them Mr Redus was sequestered by psychiatrists who were checked and balanced only by their own inappropriate oblivion to their regular mistakes and convenient misstatements

A Briefer History of Time Leonard Mlodinow, Stephen Hawking, 2010-01-26 Like prior editions of the book but even more so A Briefer History of Time will guide non scientists everywhere in the ongoing search for the tantalizing secrets at the heart of time and space This is Stephen Hawking s somewhat briefer account of his up to date and most recent scientific observations and findings A great companion to his original worldwide bestseller A Brief History of Time From curved space to quantum theory the authors have expanded on areas of special interest and recent progress such as developments in string theory and exciting progress in the search for a force of complete unified theory of all the forces of physics Thirty eight full colour illustrations enhance the text and make A Briefer History of Time an exhilarating addition in its own right to the literature of science
