Holmes, 2025-06-03 A brief account of the Science of Mind by the man who formulated it Ernest Holmes has condensed the wisdom of his classic Science of Mind into this warm yet penetrating statement The Science of Mind is the study of Life and the nature of the laws of thought in a spiritual Universe This philosophy believes there is One Infinite Mind that includes all there is whether it be human intelligence or the invisible Presence of God and is built upon the premise that we are living in a spiritual universe whose sole government is one of harmony where the use of right ideas is the enforcement of its law In 1927 a teacher writer and lecturer by the name of Ernest Holmes defined and established the Science of Mind philosophy by uncovering a clear and simple method he discovered while researching the wisdom of the ages from many disciplines This newfound practical and spiritual approach to living an abundant life evolved into what is now the Science of Mind Textbook which has been the cornerstone to Religious Science churches and Centers for Spiritual Living around the world Over the course of his life the textbook became a beacon of light to millions of readers and followers but to others the 600 page tome presented itself as an obstacle to beginners simply because of its intimidating size In what turned out to be one of his last books before his death in 1960 Holmes published this introduction after its initial release as an article in the Science of Mind Magazine to help individuals easily understand the concepts before taking the first steps of their new spiritual journey

I am an entrepreneur and a New Thought author. I am a firm believer in the concept of The Laws of Attraction and Quantum Science. This book, even though it was originally written in 1926, was way ahead of its time. Furthermore, what you will learn from this timeless writing, if practiced, can change your life for the better and for ever. Here is a brief description:

Dr. Ernest Holmes, the founder of Religious Science and developer of the Science of Mind philosophy, gave this definition for his teaching: Religious Science is a synthesis of the laws of science, opinions of philosophy, and revelations of religion applied to human needs and the aspirations of humankind. Dr. Ernest Holmes was a mystic who found God in the silence. Going within and experiencing God in the deepest part of himself was his spiritual practice. His spirituality was reflected in his living. He

believed he was one with God and he experienced that oneness in all that he did As important as the mystical experience was to Dr Holmes he also believed that religion had to be applied to everyday life problems as an integral part of the walk of faith Wholeness involved the Presence yes but also the Power the two faces of the dual nature of God Dr Holmes developed the Science of Mind philosophy to reflect his twin beliefs that the inner experience of God gave entry to the Power of God and that changing the way we think about our conditions causes the Power of the Universe to change those conditions to make our lives better Science of Mind identifies the spiritual principles that apply equally to everyone in every situation and it teaches us how to use them to our advantage Be prepared to enter a psychological rabbit hole James M Brand
