The Stonor Eagles William Horwood,1990-10 *The Willows and Beyond* William Horwood,2025-06-25 This stunning continuation by William Horwood follows the further adventures of the four most beloved characters in English literature In this new tale we find the loyal companions approaching the autumn of their lives reflecting on their many escapades and preparing to hand over River Bank to the next generation When the future of the home they know and love suddenly comes under threat all of the creatures young and old must rally together Enriched once again by the outstanding illustrations of Patrick Benson *The Willows and Beyond* is another captivating story for audiences and imaginations everywhere

Narratology Beyond the Human David Herman,2018 To what extent and in what manner do storytelling practices accommodate nonhuman subjects and their modalities of experience and how can contemporary narrative study shed light on interspecies interactions and entanglements In *Narratology beyond the Human* David Herman addresses these questions through a cross disciplinary approach to post Darwinian narratives concerned with animals and human animal relationships Herman considers the enabling and constraining effects of different narrative media examining a range of fictional and nonfictional texts disseminated in print comics and graphic novels and film In focusing on techniques such as the use of animal narrators alternation between human and nonhuman perspectives the embedding of stories within stories and others the book explores how specific strategies for portraying nonhuman agents both emerge from and contribute to broader attitudes toward animal life Herman argues that existing frameworks for narrative inquiry must be modified to take into account how stories are interwoven with cultural ontologies or understandings of what sorts of beings populate the world and how they relate to humans Showing how questions of narrative bear on ideas of species difference and assumptions about animal minds *Narratology beyond the Human* underscores our inextricable interconnectedness with other forms of creatural life and suggests that stories can be used to resituate imaginaries of human action in a more than human world

Cognitive Literary Science Michael Burke,Emily Troscianko,2017 This book brings together researchers with cognitive scientific and literary backgrounds to present innovative research in all three variations on the possible interactions between literary studies and cognitive science The tripartite structure of the volume reflects a more ambitious conception of what cognitive approaches to literature are and could be than is usually encountered and thus aims both to map out and to advance the field The first section corresponds to what most people think of as cognitive poetics or cognitive literary studies the study of literature by literary scholars drawing on cognitive scientific methods findings and or debates to yield insights into literature The second section demonstrates that literary scholars needn't only make use of cognitive science to study literature but can also in a reciprocally interdisciplinary manner use a cognitively informed perspective on literature to offer benefits back to the cognitive sciences Finally the third section literature in cognitive science showcases some of the ways in which literature can be a stimulating object of study and a fertile testing ground for theories and models not only to literary

scholars but also to cognitive scientists who here engage with some key questions in cognitive literary studies with the benefit of their in depth scientific knowledge and training
