The Uplift War The Uplift Saga 3 By David Brin:

The Uplift War David Brin, 1987 The inhabitants of Garth a dying planet battle brutal alien invaders with the survival of Earth and the fate of the entire five galaxies at stake *Our Grandchildren Redesigned* Michael Bess, 2016-09-06 A panoramic overview of biotechnologies that can endlessly boost human capabilities and the drastic changes these superhuman traits could trigger Biotechnology is moving fast In the coming decades advanced pharmaceuticals bioelectronics and genetic interventions will be used not only to heal the sick but to boost human physical and mental performance to unprecedented levels People will have access to pills that make them stronger and faster informatic devices will interface seamlessly with the human brain and epigenetic modification may allow people to reshape their own physical and mental identities at will Until recently such major technological watersheds like the development of metal tools or the industrialization of manufacturing came about incrementally over centuries or longer People and social systems had time to adapt they gradually developed new values norms and habits to accommodate the transformed material conditions But contemporary society is dangerously unprepared for the dramatic changes it is about to experience down this road on which it is already advancing at an accelerating pace The results will no doubt be mixed People will live longer healthier lives will fine tune their own thought processes and will generate staggeringly complex and subtle forms of knowledge and insight But these technologies also threaten to widen the rift between rich and poor to generate new forms of social and economic division and to force people to engage in constant cycles of upgrades and boosts merely to keep up Individuals who boost their traits beyond a certain threshold may acquire such extreme capabilities that they will no longer be recognized as unambiguously human In this important and timely book prize winning historian Michael Bess provides a clear nontechnical overview of cutting edge biotechnology and paints a vivid portrait of a near future society in which bioenhancement has become a part of everyday life He surveys the ethical questions raised by the enhancement enterprise and explores the space for human agency in dealing with the challenges that these technologies will present Headed your way over the coming decades new biotechnologies that can powerfully alter your body and mind The possibilities are tantalizing Rejuvenation therapies offering much longer lives 160 and even beyond in full vigor and mental acuity Cognitive enhancement through chemical or bioelectronic means the rough equivalent of doubling or tripling IQ scores Epigenetic tools for altering some of your genetically influenced traits at any point in your lifetime body shape athletic ability intelligence personality Bioelectronic devices for modulating your own brain processes including your pleasure centers a potentially non stop high Direct control of machines by thought and perhaps direct communication with other people brain to brain a new dimension of sharing and intimacy But some of the potential consequences are also alarming A growing rift between the biologically enhanced and those who can't afford such modifications A constant cycle of upgrades and boosts as the bar of normal rises ever higher Humans 95 Humans XP Humans 8 The fragmentation of humankind into rival bioenhancement clusters A

gradually blurring boundary between person and product Extreme forms of self modification with some individuals no longer recognized as unambiguously human

Uplift David Brin, 2012-12-06 WINNER OF THE HUGO LOCUS AND NEBULA AWARDS Under the caverns of Mercury the Sundiver Mission prepares for a momentous voyage a journey into the blazing inferno of the sun to seek our destiny in the cosmic order of life For in a universe where no species can reach sentience without being uplifted by a patron race only humanity it seems may have climbed to the stars unaided This is a feat that puzzles and even angers some of the ancient mighty Galactic Clans Now in a saga that warps from Earth to the far reaches of five galaxies the greatest mystery of all may be explained This omnibus contains the first three novels in David Brin s classic and award winning science fiction series the Uplift Saga SUNDIVER STARTIDE RISING and THE UPLIFT WAR

Livestock and Literature Liza B. Bauer, 2024-08-08 This book explores the past and current traces that cows pigs chickens and other animals used by humans have left in Anglophone literary fiction In times of accelerated global warming an acute pandemic and breakthroughs in bioengineering practices discussions on how to rethink the relationships to these animals have become as heated as perhaps never before Livestock and Literature examines what literature has to contribute to these debates In particular it draws on counter narratives to so called livestock animals commodification in selected science and speculative fiction SF works from the twenty first century These texts imagine what if scenarios where livestock practice resistance transform into biotechnologically modified postanimal beings or live in close companionship to humans Via these three points of access the study delineates the formal and thematic strategies SF authors apply to challenge anthropocentric and speciesist thought patterns The aim is to shed light on how these alternative storyworlds expand readers understanding of the lives of farmed animals seeking insight into how literature shapes human animal relationships beyond the page

To be Continued Merle Jacob, Hope Apple, 1995 This guide identifies both in print and out of print works of fiction featuring continuing themes plots or characters in which there is a sense of development and passage of time Entries are arranged alphabetically by author and are accompanied by bibliographic information

The Inter-Galactic Playground Farah Mendlesohn, 2009-07-15 Science fiction is often considered the genre of ideas and imagination which would seem to make it ideal for juveniles and young adults however the ideas are often dispensed by adults This book considers the development of science fiction for children and teens between 1950 and 2010 exploring why it differs from science fiction aimed at adults In a broader sense this critical examination of 400 texts sheds light on changing attitudes toward children and teenagers toward science education and toward the authors expectations and sociological views of their audience
