The Other Thomas Tryon, 2012-10-02 NYRB Classics presents the landmark psychological horror novel about 13 year old twins living in a bucolic New England town one good and the other very very evil A whirlpool of Oh My God horror Ira Levin author of Rosemary's Baby Holland and Niles Perry are identical 13 year old twins They are close close enough almost to read each other's thoughts but they couldn't be more different Holland is bold and mischievous a bad influence while Niles is kind and eager to please the sort of boy who makes parents proud The Perrys live in the bucolic New England town their family settled centuries ago and as it happens the extended clan has gathered at its ancestral farm this summer to mourn the death of the twins father in a most unfortunate accident Mrs Perry still hasn't recovered from the shock of her husband's gruesome end and stays sequestered in her room leaving her sons to roam free As the summer goes on though and Holland's pranks become increasingly sinister Niles finds he can no longer make excuses for his brother's actions Thomas Tryon's best selling novel about a homegrown monster is an eerie examination of the darkness that dwells within everyone It is a landmark of psychological horror that is a worthy descendent of the books of James Hogg Robert Louis Stevenson Shirley Jackson and Patricia Highsmith will doubtless become one of the classics of horror tales comparable to *The Turn of the Screw* Dorothy B Hughes Los Angeles Times

The Sleep of Others and the Transformations of Sleep Research Kenton

Kroker,2007-01-01 We tend to think of sleep as a private concern a night time retreat from the physical world into the realm of the subconscious Yet sleep also has a public side it has been the focal point of religious ritual philosophic speculation political debate psychological research and more recently neuroscientific investigation and medical practice In this first ever history of sleep research Kenton Kroker draws on a wide range of material to present the story of how an investigative field at one time dominated by the study of dreams slowly morphed into a laboratory based discipline The result of this transformation Kroker argues has changed the very meaning of sleep from its earlier conception to an issue for public health and biomedical intervention Examining a vast historical period of 2500 years Kroker separates the problems associated with the history of dreaming from those associated with sleep itself and charts sleep related diseases such as narcolepsy insomnia and sleep apnea He describes the discovery of rapid eye movement REM during the 1950s and shows how this discovery initiated the creation of dream laboratories that later emerged as centres for sleep research during the 1960s and 1970s Kroker s work is unique in subject and scope and will be enormously useful for both sleep researchers medical historians and anybody who s ever lost a night s sleep

Sad Old Faggot Gilbert, Sky,2016-09-01 A daring foray into the groundbreaking genre of autobiographical fiction Sad Old Faggot is the absorbing sometimes embarrassing always entertaining story of a lonely self obsessed selfish deluded impotent 62 year old gay man named Sky Gilbert who despite his best intentions cannot help but become a stereotype Sky s main claim to fame is founding Buddies in Bad Times Theatre in 1979 But since leaving Buddies he s fallen on hard times Sky Gilbert is no longer even remotely famous He has to fight off his own bitterness as audiences for his plays steadily dwindle Theatre people dismiss his work as old news and point to the fact that he teaches at the University of Guelph as proof his descent into academia clearly signals his failure as an artist All along the way the book questions our truths and celebrates their mutability What is really true about each of us What do we actually know about ourselves And how much it asks of our own personal truth is based on fact and how much is rooted in fiction

**Self-consciousness and "split" Brains** Elizabeth Schechter,2018 Could a single human being ever have multiple conscious minds Some human beings do The corpus callosum is a large pathway connecting the two hemispheres of the brain In the second half of the twentieth century a number of people had this pathway cut through as a treatment for epilepsy They became colloquially known as split brain subjects After the two hemispheres of the brain are cortically separated in this way they begin to operate unusually independently of each other in the realm of thought action and conscious experience almost as if each hemisphere now had a mind of its own Philosophical discussion of the split brain cases has overwhelmingly focused on questions of psychological identity in split brain subjects questions like How many subjects of experience is a split brain subject How many intentional agents How many persons On the one hand under experimental conditions split brain subjects often act in ways difficult to understand except in terms of each of them having two distinct streams or centers of consciousness Split brain subjects thus evoke the duality intuition that a single split brain human being is somehow composed of two thinking experiencing and acting things On the other hand a split brain subject nonetheless seems like one of us at the end of the day rather than like two people sharing one body In other words split brain subjects also evoke the unity intuition that a split brain subject is one person Elizabeth Schechter argues that there are in fact two minds subjects of experience and intentional agents inside each split brain human being right and left On the other hand each split brain subject is nonetheless one of us The key to reconciling these two claims is to understand the ways in which each of us is transformed by self consciousness

**The Ghost of One's Self** Paul Meehan,2017-09-19 For millennia people have held folk beliefs about the existence of the doppelganger double walker in German a look alike second self that is often the antithesis of one's identity and is usually considered an omen of misfortune or death The theme of the double has inspired works by E T A Hoffmann Poe de Maupassant Dostoevsky and others and has been the basis for many classic mystery horror and science fiction movies This critical survey examines the double in more than 100 films by such acclaimed directors as Alfred Hitchcock Mario Bava Roger Corman David Cronenberg George Romero Fritz Lang James Cameron Robert Siodmak Don Siegel John Frankenheimer Terry Gilliam Brian De Palma and Roman Polanski

**Animal Theologians** Andrew Linzey,Clair Linzey,2023 Many people who have thought about God have not thought about animals or about the relationship between the two But among those who have are some of the most celebrated

religious thinkers including Michel de Montaigne Thomas Tryon John Wesley John Ruskin Leo Tolstoy Mohandas K Gandhi Albert Schweitzer and Paul Tillich This volume comprises 24 scholarly studies that detail challenges to the dominant anthropocentrism of most religious traditions The editors have brought together Jewish Unitarian Christian transcendentalist Muslim Hindu Dissenting deist and Quaker voices each offering a unique theological perspective that counters the neglect of the nonhuman Animal Theologians is divided into three parts starting with the pioneers who first saw a relationship between animals and divinity those who contributed to the expansion of social sensibility to animals and ending with the work of contemporary theologians The essays in this volume use contextual and historical background to describe what led animal theologians to their beliefs and then pave way for further developments in this expanding field This volume is an act of reclaiming different religious traditions for animals by recovering lost voices
