Deceptive Fictions Ulrike Tancke, 2015-06-18 Deceptive Fictions Narrating Trauma and Violence in Contemporary Writing explores the widespread narrative concern with trauma and violence and their interactions with identity meaning ethics history memory and various other related issues in a selection of novels by prolific contemporary British and Irish writers Interrogating the strategic functions of trauma and violence the book argues that these texts can be read as counter narratives to or a backlash against still prevalent critical paradigms informed by poststructuralist and postmodern thought Trauma and violence are invoked as narrative tools to communicate the centrality of the body and of biological and material constraints on human actions This emphasis on reality and the experiential ties in with the novels consistent focus on the individual as an ethical agent and originator of meaning In so doing they signal a move in contemporary fiction towards a textual practice that can most fruitfully be approached along the lines of an individualistic evolutionary corporeal and experiential narratology which self consciously reflects on the manipulative potentials of narrative

Ordinary Things and Their Extraordinary Meanings Giuseppina Marsico, Luca Tateo, 2019-05-01 The book provides a new look at the everyday relationship between psychological processes and extraordinary aspects of ordinary phenomena Why should we deal with ordinary things People's life is made of everyday practical taken for granted things such as driving a car using money listening music etc When you drive from home to workplace you are migrating between contexts Is this an empty space you are crossing or the time you spend into the car is something meaningful In psychological terms things have at least three levels of existence a material a symbolic and an affective one The underlying idea is that the symbolic elaboration of everyday things is characterized by the transcendence of the particular object sign leading to the creation of more and more complex sign fields These fields expand according to an inclusive logic up to dialogically and dialectically incorporate opposites i.e. clean dirty transparent opaque hide show join divide slow fast etc Even the meaning of ordinary and extraordinary follow such an inclusive logic if you give a positive value to ordinary extraordinary is rule breaking otherwise if ordinary means trivial extraordinary assumes a positive value Besides things are cultural artifacts mediating the experience of the world the psychological processes and the construction of mind Reflecting upon things is thus a more meaningful pathway to understand Psyche
