A New History of Modern Computing Thomas Haigh, Paul E. Ceruzzi, 2021-09-14 How the computer became universal Over the past fifty years the computer has been transformed from a hulking scientific supertool and data processing workhorse remote from the experiences of ordinary people to a diverse family of devices that billions rely on to play games shop stream music and movies communicate and count their steps In *A New History of Modern Computing* Thomas Haigh and Paul Ceruzzi trace these changes A comprehensive reimagining of Ceruzzi's *A History of Modern Computing* this new volume uses each chapter to recount one such transformation describing how a particular community of users and producers remade the computer into something new Haigh and Ceruzzi ground their accounts of these computing revolutions in the longer and deeper history of computing technology They begin with the story of the 1945 ENIAC computer which introduced the vocabulary of programs and programming and proceed through email pocket calculators personal computers the World Wide Web videogames smart phones and our current world of computers everywhere in phones cars appliances watches and more Finally they consider the Tesla Model S as an object that simultaneously embodies many strands of computing

Young Children and Families in the Information Age Kelly L. Heider, Mary Renck Jalongo, 2014-12-05 This edited book presents the most recent theory research and practice on information and technology literacy as it relates to the education of young children Because computers have made it so easy to disseminate information the amount of available information has grown at an exponential rate making it impossible for educators to prepare students for the future without teaching them how to be effective information managers and technology users Although much has been written about information literacy and technology literacy in secondary education there is very little published research about these literacies in early childhood education Recently the National Association for the Education of Young Children and the Fred Rogers Center for Early Learning and Children's Media at Saint Vincent College published a position statement on using technology and interactive media as tools in early childhood programs This statement recommends more research to better understand how young children use and learn with technology and interactive media and also to better understand any short and long term effects Many assume that today's young children are digital natives with a great understanding of technology However children may know how to operate digital technology but be unaware of its dangers or its value to extend their abilities This book argues that information and technology literacy include more than just familiarity with the digital environment They include using technology safely and ethically to demonstrate creativity and innovation to communicate and collaborate to conduct research and use information and to think critically solve problems and make decisions

thermal engineering with quickfield quickfield fea software - Dec 07 2022

web apr 23 2013 thermal engineering with quickfield webinar recorded on april 23 2013 multiphysic capabilities of quickfield may be applied to static and transient heat transfer problems this webinar will show novice users how to set up the thermal problem with thermal conduction within the model and convection radiation at the model surfaces

temperature field mapping quickfield fea software - Sep 04 2022

web traditional ways of the temperature field mappings are isotherms plotting and temperature field color map presentation quickfield software allows both these field mapping options and also may show vectors drawn in the nodes of the rectangular grid temperature field mapping with isotherms using quickfield may be controlled by specifying

thermal issues in the design of permanent magnet based electrical - Oct 05 2022

web thermal issues in the design of permanent magnet based electrical motors quickfield simulation example dr jose camino 36 poles brushless dc motor with ndfeb permanent magnets problem type plane parallel problem of dc magnetism and heat transfer geometry stator rotor given dc motor power p 12 kw voltage u 600 v speed nn

quickfield download it analyzes and solves magnetic electric - Jan 28 2022

web download popular programs drivers and latest updates easily quickfield allows you to solve and simulate linear and non linear problems in magneto statics transient ac magnetism electrostatics ac dc conduction transient steady state

chapter 11 thermal analysis the heat equation globalspec - Nov 06 2022

web in this chapter the heat equation steady state heat flow transient heat flow thermal analysis in quickfield coupled ac magnetic and heat transfer problems coupled current flow and heat transfer problems thermal conduction acts to equalize temperature differences between regions of higher and lower temperatures
