The Great Music City Andrea Baker, 2019-03-01. In the 1960s as gentrification took hold of New York City Jane Jacobs predicted that the city would become the true player in the global system. Indeed in the 21st century more meaningful comparisons can be made between cities than between nations and states. Based on case studies of Melbourne Austin and Berlin this book is the first in depth study to combine academic and industry analysis of the music cities phenomenon. Using four distinctly defined algorithms as benchmarks it interrogates Richard Florida's creative cities thesis and applies a much needed synergy of urban sociology and musicology to the concept mediated by a journalism lens. Building on seminal work by Robert Park Lewis Mumford and Jane Jacobs it argues that journalists are the cultural branders and street theorists whose ethnographic approach offers critical insights into the urban sociability of music activity.

~~#DELETED~~ Allum Bokhari, 2020-09-22. Uncover the hidden systems created by the most powerful tech companies in the world that are determined to stop Donald Trump. Journalist Allum Bokhari has spent four years investigating the tech giants that dominate the Internet: Google, Facebook, YouTube, Twitter. He has discovered a dark plot to seize control of the flow of information and utilize that power to its full extent to censor, manipulate and ultimately sway the outcome of democratic elections. His network of whistleblowers inside Google, Facebook and other companies explain how the tech giants now see themselves as good, censoring, benevolent commissars controlling the information we receive to protect us from dangerous speech. They reveal secret methods to covertly manipulate online information without us ever being aware of it, explaining how tech companies can use big data to target undecided voters. They lift the lid on a plot four years in the making: a plot to use the power of technology to stop Donald Trump's re-election.
