Neuronal Network Research Horizons Martin L. Weiss, 2007 In neuroscience a neural network is a bit of conceptual juggernaut the conceptual transition from neuroanatomy a rigorously descriptive discipline of observed structure to the designation of the parameters delimiting a network can be problematic In outline a neural network describes a population of physically interconnected neurons or a group of disparate neurons whose inputs or signalling targets define a recognisable circuit Communication between neurons often involves an electrochemical process The interface through which they interact with surrounding neurons usually consists of several dendrites input connections which are connected via synapses to other neurons and one axon output connection If the sum of the input signals surpasses a certain threshold the neuron sends an action potential AP at the axon hillock and transmits this electrical signal along the axon This important book presents the latest research in this field

Image Processing using Pulse-Coupled Neural Networks Thomas Lindblad, Jason M. Kinser, 2013-04-17 Pulse coupled neural networks represent a new and exciting advance in image processing research When exposed to grey scale or colour images they produce a series of binary pulse images which allow the content of the image to be assessed much more accurately than from the original In this volume Thomas Lindblad and Jason Kinser provide a much needed introduction to the topic of PCNNs They review the theoretical foundations and then look at a number of image processing applications including segmentation edge extraction texture extraction object identification object isolation motion processing foveation noise suppression and image fusion They also look at the PCNNs ability to process logical arguments and at how to implement it in specialised hardware It will be of particular interest to researchers and practitioners working in image processing especially those involved with medical military or industrial applications It will also be of interest to graduate level students
