the fracturing power of violence and oppression at the level of the individual domestic communal national and international in powerful and creative ways Comics do not stand outside of literature cinema or any of the other arts but rather enliven the reciprocal relationship between the verbal and the visual language that informs all of these media As such the discussion demonstrates how fields such as graphic medicine graphic justice and comics journalism contribute to existing theoretical and analytics debates including critical visual theory trauma and memory studies by offering a broad ranging yet cohesive analysis of cultural memory and its representation in print and digital comics
