*Marketing Information Guide*, 1971      **Aviation and Its Management** Arif Sikander, 2019-05-22 Aviation has grown leaps and bounds within the last decade. Aviation courses and training at all levels have shown an exponential increase around the globe. There has been a restricted focus on writing books in this sector of the economy, mainly due to the shortage of expertise in this specialist and complex area. This book was written with the purpose of meeting this need of the aviation sector. Due to the diversified nature of aviation knowledge, which includes flying, engineering, airports, allied trades for aircraft and airports, airline and airport management and operations, education, etc., one text alone will not suffice and do justice to address all these areas. It is envisaged to develop subsequent parts of this book to cover all these knowledge areas. This book is the first installment of any subsequent books and explores issues including airline management and operations, airline business models, airport systems, flight operational procedures, aircraft maintenance, runway safety management systems and air traffic management. In

particular attention will be given to aspects such as analysis of air traffic in a domestic market runway safety management systems critical success factors for multiple MRO service providers key pain points of the industry to be addressed to move into the future new research on hub airports for international flights new business models for airlines and runway safety management systems This book is useful to aviation managers educators students and professionals interested in any of the above issues *Novel and Intelligent Digital Systems: Proceedings of the 4th International Conference (NiDS 2024)* Phivos Mylonas, Dimitris Kardaras, Jaime Caro, 2024-10-15 This book compiles the research findings presented at the 4th International Conference on Novel Intelligent Digital Systems NiDS 2024 which took place in Athens Greece on September 25 27 2024 hosted by the University of West Attica NiDS 2024 was conducted in a hybrid format offering participants the flexibility to join either online or in person The conference highlighted the latest innovations in intelligent systems and emphasized the collaborative research that advances Artificial Intelligence AI in software development It served as a platform for high quality research providing a space to explore challenges and innovations in AI NiDS 2024 referred to experts researchers and scholars in artificial and computational intelligence as well as the broader field of computer science offering insights into interconnected and complementary areas By promoting the exchange of ideas the conference aimed to strengthen and expand the network of researchers academics and industry professionals **Federal Aviation**
