birds within landscapes both literary and actual Intertwined within each chapter are animal narratives from a diverse sampling of writers including among others Homer the Brothers Grimm Sarah Orne Jewett William Wordsworth Walt Whitman Emily Dickinson Emily Bront Thomas Pynchon Willa Cather Toni Morrison Marilynne Robinson Gabriel Garcia Marquez Mary Oliver Bronislaw Maj Mourning Dove and repeatedly given Godfrey s background as a Hemingway scholar Ernest Hemingway Using a blend of ecocriticism animal studies close reading and the techniques of creative nonfiction Godfrey unpacks the ways that authors and ornithologists spanning the centuries have tried to bridge the gap between human and nonhuman worlds

The American Manufactory Laura Rigal,2021-03-09 This cultural history of American federalism argues that nation building cannot be understood apart from the process of industrialization and the making of the working class in the late eighteenth century United States Citing the coincidental rise of federalism and industrialism Laura Rigal examines the creations and performances of writers collectors engineers inventors and illustrators who assembled an early national world of things at a time when American craftsmen were transformed into wage laborers and production was rationalized mechanized and put to new ideological purposes American federalism emerges here as a culture of self making in forms as various as street parades magazine writing painting autobiography advertisement natural history collections and trials and trial transcripts Chapters center on the craftsmen who celebrated the Constitution by marching in Philadelphia s Grand Federal Procession of 1788 the autobiographical writings of John Fitch an inventor of the steamboat before Fulton the exhumation and museum display of the first American mastodon by the Peale family of Philadelphia Joseph Dennie s literary miscellany the Port Folio the nine volume American Ornithology of Alexander Wilson and finally the autobiography and portrait of Philadelphia locksmith Pat Lyon who was falsely imprisoned for bank robbery in 1798 but eventually emerged as an icon for the American working man Rigal demonstrates that federalism is not merely a political movement or an artifact of language but a phenomenon of culture one among many innovations elaborated in the manufactory of early American nation building

The Birds That Audubon Missed Kenn Kaufman,2024-05-07 Renowned naturalist Kenn Kaufman examines the scientific discoveries of John James Audubon and his artistic and ornithologist peers in this fascinating blend of history science art biography and memoir Booklist starred review that is a bird lovers delight Kirkus Reviews Raging ambition Towering egos Competition under a veneer of courtesy Heroic effort combined with plagiarism theft exaggeration and fraud This was the state of bird study in eastern North America during the early 1800s as a handful of intrepid men raced to find the last few birds that were still unknown to science The most famous name in the bird world was John James Audubon who painted spectacular portraits of birds But although his images were beautiful creating great art was not his main goal Instead he aimed to illustrate and write about as many different species as possible obsessed with trying to outdo his rival Alexander Wilson George Ord a fan and prot g of Wilson held a bitter grudge against Audubon for years claiming he had faked much of his information and his scientific claims A few of Audubon s birds were pure fiction and

some of his writing was invented or plagiarized Other naturalists of the era including Charles Bonaparte nephew of Napoleon John Townsend and Thomas Nuttall also became entangled in the scientific derby as they stumbled toward an understanding of the natural world an endeavor that continues to this day Despite this intense competition a few species including some surprisingly common songbirds hawks sandpipers and more managed to evade discovery for years Here renowned bird expert and artist Kenn Kaufman explores this period in history from a new angle by considering the birds these people discovered and especially the ones they missed Kaufman has created portraits of the birds that Audubon never saw attempting to paint them in that artist s own stunning style showing how our understanding of birds continues to gain clarity even as some mysteries persist from Audubon s time until ours

Seeking the American Tropics

James A. Kushlan,2020-08-11 For centuries the southernmost region of the Florida peninsula was seen by outsiders as wild and inaccessible one of the last frontiers in the quest to understand and reveal the natural history of the continent Seeking the American Tropics tells the stories of the explorers and adventurers who for better and for worse helped open the unique environment of South Florida to the world Beginning with the arrival of Juan Ponce de Le n in 1513 James Kushlan describes how most of the famous Spanish explorers never made it to South Florida leaving the area s rich natural history out of scientific records for the next 250 years It wasn t until the British colonial and early American periods that the first surveyors were commissioned and the first naturalists Titian Peale and John James Audubon arrived to collect draw and report the subtropical flora and fauna that were so unique to North America Moving into the railroad era Kushlan illuminates the activities of scientists such as Henry Nehrling and Charles Torrey Simpson alongside the dabbling of wealthy amateur naturalists He follows the story to the 1920s when tourism was flourishing and signs of ecological damage were starting to show Years of wildlife trade resource extraction invasive species introduction and swamp drainage had taken their toll And many of the naturalists who had been outspoken about protecting South Florida s environment had also played a part in its destruction Today the region is among one of the most thoroughly studied places on the planet but at a cost In this absorbing

and cautionary tale Kushlan illustrates how exploration has so often trumped conservation throughout history He exposes how much of the natural world we have already lost in this vivid portrait of the Florida of yesterday *Alexander Wilson Correspondence to William Mitchell* Alexander Wilson, 1790 Correspondence from Scottish American ornithologist Alexander Wilson 1766 1813 in Haddington Scotland dated November 21 1790 to Scottish weaver and political activist William Mitchell whom he addresses as Dear Comrade The letter refers to the circumstances of their friends Mitchell s work as a music instructor and Wilson s efforts as a poet *Law, Equity and Romantic Writing* Michael Demson, Regina Hewitt, 2024-09-30 This provocative and timely volume examines the activity of seeking justice through literature during the age of revolutions from 1750 to 1850 a period which was marked by efforts to expand political and human rights and to rethink attitudes towards poverty and criminality While the chapters revolve around legal topics they concentrate on literary engagements with the experience of the law revealing how people perceived the fairness of a given legal order and worked with and against regulations to adjust the rule of law to the demands of conscience The volume updates analysis of this conflict between law and equity by drawing on the concept of epistemic injustice to describe the harm done to personal identity and collective flourishing by the uneven distribution of resources and the wish to punish breaches of order It shows how writing and reading can foment inquiries into the meanings of justice and equity and aid efforts to humanise the rule of law
