The Whole Person Mark H. Bickhard, 2024-11-27 The Whole Person explores the realms of theory and philosophy concerning minds and persons This book presents models of the emergent realization of multiple mental processes and of the constitution of social realities and social persons Each chapter explores prevalent theoretical and philosophical assumptions that obstruct the acceptance of models depicting emergent realization offering analyses of these barriers and demonstrating ways to overcome them Rooted in the framework of process metaphysics this book models metaphysically genuine emergence paving the way for a

comprehensive model of multifarious normative emergences These normative emergences include phenomena such as function dysfunction representational truth and falsity rational irrational ethical unethical and others that shape our mental and social landscapes The discussion extends to the macro evolutionary culmination of mental processes in a model of reflective consciousness The book then extends its exploration to the foundational role of mental processes in the emergence of social realities and persons with language acting as a core element in these emergences Addressing evolutionary aspects brain processes developmental processes moral normativities and self consistency considerations The Whole Person presents a holistic integration of decades of constructive work Endorsements This ambitious yet unpretentious carefully constructed and argued book is a must read for anyone with serious interest in the nature of persons and the psychology of personhood

Mark Bickhard s The Whole Person is a sustained and convincing narrative about our individual and collective evolution and emergence as the unique beings that we are Of particular interest is his account of the emergence of persons as homo socius Here Professor Bickhard captures key but often overlooked historical sociocultural and socio developmental dynamics and processes that make us who we are a species constantly interacting with each other and the world in a never ending process of mutual co constitution By theorizing a process metaphysics replete with emergent normativity that does not clash with a naturalistic ontological psychology Bickhard takes a giant step toward seeing ourselves as we are and as we might become

Jack Martin Professor Emeritus Simon Fraser University A typical psychological theory offers narrow generalizations about data sets obtained by semi proprietary empirical methods The basic empirical research on which such theories have depended is in crisis tremendous effort has gone into ill motivated studies applying statistics inappropriately to inadequate samples too often generating irreproducible results The kind of theory that psychology needs is broad and deep pays no respect to boundaries between specialties makes falsifiable predictions and answers to arguments in principle The Whole Person presents just such a theory psychologists whether their aim is to extend it and support it or to challenge it and refute it will benefit from studying it closely

Robert L Campbell Professor Emeritus Psychology Clemson University The Oxford Companion to World Mythology David Leeming, 2005-11-17 Cave paintings at Lascaux France and Altamira Spain fraught with expression thousands of years later point to an early human desire to form a cultural identity In the Oxford Companion to World Mythology David Leeming explores the role of mythology or myth logic in history and determines that the dreams of specific cultures add up to a larger collective story of humanity Stopping short of attempting to be all inclusive this fascinating volume will nonetheless be comprehensive opening with an introduction exploring the nature and dimensions of myth and proposing a definition as a universal language Briefly dipping into the ways our understanding of myth has changed from Aristotle and Plato to modern scholars such as Joseph Campbell the introduction loosely places the concept in its present context and precedes articles on influential mythologists and mythological approaches that appear later in the Companion The main body of Leeming s work consists of A Z entries covering all aspects of mythology including substantial

essays on the world's major mythological traditions Greek Native American Indian Japanese Sumerian Egyptian mythological types and motifs Descent to the Underworld the Hero the Trickster Creation the Quest mythological figures Odysseus Zeus Osiris Spider Woman and Inanna as well as numerous interrelated subjects such as fairy tales and legends The Companion also locates myth in our lives today relating it to language patterns psychology religion politics art and gender attitudes Many of the better known and more significant myths are vividly retold in this volume that will be illustrated with maps more than 70 black and white images and eight pages of color highlighting the central role art has often played in the transmission and perpetuation of myth Following the entries a rich section of appendices will include family trees of the major pantheons equivalency charts for the gods of Greece and Rome Babylon and Sumer as well as other traditions an extensive bibliography and an index

Change Management and the Human Factor Frank E. P. Dievernich, Kim Oliver Tokarski, Jie Gong, 2014-10-06 Change management and organizational development is unthinkable without people Human beings form its core as both subjects and objects of change This volume attempts to cut through to the core of change management to the people that stand at its heart and focuses on their intrinsic role in change management and organizational development Topics covered in this volume encompass the human element within organizational change how this impacts roles dynamics of team interaction and affects the workplace in teaching and learning settings It also addresses resistance to institutional and organizational change and the central role that agile management plays in this process

Toward a Practice of Autonomous Systems Francisco J. Varela, Paul Bourgine, 1992-04-02 Artificial life embodies a recent and important conceptual step in modern science asserting that the core of intelligence and cognitive abilities is the same as the capacity for living The recent surge of interest in artificial life has pushed a whole range of engineering traditions such as control theory and robotics beyond classical notions of goal and planning into biologically inspired notions of viability and adaptation situatedness and operational closure These proceedings serve two important functions they address bottom up theories of artificial intelligence and explore what can be learned from simple models such as insects about the cognitive processes and characteristic autonomy of living organisms while also engaging researchers and philosophers in an exciting examination of the epistemological basis of this new trend Topics Artificial Animals Genetic Algorithms Autonomous Systems Emergent Behaviors Artificial Ecologies Immunologic Algorithms Self Adapting Systems Emergent Structures Emotion And Motivation Neural Networks Coevolution Fitness Landscapes Contributors H Bersini Domenico Parisi Rodney A Brooks Christopher G Langton S Kauffman J L Denenbourg Pattie Maes John Holland T Smithersm H Swefel H Muhlenbein

Methods of Ethical Analysis Nimi Wariboko, 2013-04-16 The book is about showing different ways of doing ethics highlighting a kind of methodological pluralism This book attempts to relate the difference in methodology and perspective to difference in identity focal point of analysis or projects of persuasion Difference matters ultimately because pluralism matters This book is a tutorial in ethical analysis and reasoning Seminararians and graduate students will be brought into the finer points of ethical

analysis of mastering the ins and outs of ethical methodology by immersing themselves in critical social ethical analyses of prominent scholars in the American academy Students will be guided toward how to develop their own voice in social issues hone their capability in social analysis and critically engage the social sciences history philosophy and literature as they embark on ethical analyses There is no single way of teaching the methodology of social ethics and no single theory of ethics that satisfies all therefore ethics and its methodology are better understood by enabling students to view the field through multiple windows Simultaneously they will learn to view social reality from different perspectives The seven chapters of this book explore the different ways American ethicists have interrogated their nation's moral systems or crafted methods for understanding them

information Comprises 26 newly written chapters by leading international experts Provides a complete critical introduction to the field Each chapter combines careful scholarship with an engaging writing style Includes an exhaustive glossary of technical terms Ideal as a course text but also of interest to researchers and general readers *Kaplan and Sadock's Comprehensive Text of Psychiatry* Robert Boland, Marcia L. Verduin, 2024-03-26 The gold standard reference for all those who work with people with mental illness Kaplan Sadock's Comprehensive Textbook of Psychiatry edited by Drs Robert Boland and Marcia L Verduin has consistently kept pace with the rapid growth of research and knowledge in neural science as well as biological and psychological science This two volume eleventh edition offers the expertise of more than 600 renowned contributors who cover the full range of psychiatry and mental health including neural science genetics neuropsychiatry psychopharmacology and other key areas From Suns to Life: A Chronological Approach to the History of Life on Earth Muriel Gargaud, Philippe Claeys, Purificación López-García, Hervé Martin, Thierry Montmerle, Robert Pascal, Jacques Reisse, 2007-07-05 This review emerged from several interdisciplinary meetings and schools gathering a group of astronomers geologists biologists and chemists attempting to share their specialized knowledge around a common question how did life emerge on Earth Their ultimate goal was to provide some kind of answer as a prerequisite to an even more demanding question is life universal The resulting state of the art articles were written by twenty five scientists telling a not so linear story but on the contrary highlighting problems gaps and controversies Needless to say this approach yielded no definitive answers to both questions However by adopting a chronological approach to the question of the emergence of life on Earth the only place where we know for sure that life exists it was possible to break down this question into several sub topics that can be addressed by the different disciplines The main chapters of this review present the formation and evolution of the solar system 3 the building of a habitable planet 4 prebiotic chemistry biochemistry and the emergence of life 5 the environmental context of the early Earth 6 and the ancient fossil record and early evolution 7 The concluding chapter 9 provides the highlights of the review and presents the different points of view about the universality of life Two pedagogical chapters are included one on chronometers 2 another in the form of a frieze 8 which summarizes in graphical form the present state of knowledge about the chronology of the emergence of life on Earth before the Cambrian explosion

Mikhail Bakhtin Gary Saul Morson, Caryl Emerson, 1990 Books about thinkers require a kind of unity that their thought may not possess This cautionary statement is especially applicable to Mikhail Bakhtin whose intellectual development displays a diversity of insights that cannot be easily integrated or accurately described in terms of a single overriding concern Indeed in a career spanning some sixty years he experienced both dramatic and gradual changes in his thinking returned to abandoned insights that he then developed in unexpected ways and worked through new ideas only loosely related to his earlier concerns Small wonder then that Bakhtin should have speculated on the relations among received notions of biography unity innovation and the creative process Unity with respect not only to individuals but also to art

culture and the world generally is usually understood as conformity to an underlying structure or an overarching scheme Bakhtin believed that this idea of unity contradicts the possibility of true creativity For if everything conforms to a preexisting pattern then genuine development is reduced to mere discovery to a mere uncovering of something that in a strong sense is already there And yet Bakhtin accepted that some concept of unity was essential Without it the world ceases to make sense and creativity again disappears this time replaced by the purely aleatory There would again be no possibility of anything meaningfully new The grim truth of these two extremes was expressed well by Borges an inescapable labyrinth could consist of an infinite number of turns or of no turns at all Bakhtin attempted to rethink the concept of unity in order to allow for the possibility of genuine creativity The goal in his words was a nonmonologic unity in which real change or surprisingness is an essential component of the creative process As it happens such change was characteristic of Bakhtin s own thought which seems to have developed by continually diverging from his initial intentions Although it would not necessarily follow that the development of Bakhtin s thought corresponded to his ideas about unity and creativity we believe that in this case his ideas on nonmonologic unity are useful in understanding his own thought as well as that of other thinkers whose careers are comparably varied and productive
