Justice-based ethics Chris Jones, 2018-12-01 The book reflects academically on important and relevant ethical fields from a multidimensional South African context The book challenges conventional borders from different ethical theological philosophical economic and cultural perspectives with insight and expertise and seeks to add academic ethical value locally and globally with its different points of departure deeply embedded in justice From a mainly qualitative methodological perspective this scholarly book demonstrates that ethics requires analytical thinking and critical people who in an existentially and emancipatory way can help make the world a more just decent and humane place in which to live The authors who represent different academic and cultural backgrounds present in their respective chapters their research systematically intersectionally and constructivistically based on profound theoretical analysis and reasoning This epistemology results in an act of knowing that actively gives meaning and order to the reality to which it is responding By doing this they point out that people are in an ongoing process of becoming more human allowing ourselves and our fellow human beings to flourish and to reach fuller potential through justice based ethical reflection and action

Children and Youth in African History SE Duff, 2022-12-12 This textbook introduces readers to the academic scholarship on the history of childhood and youth in sub-Saharan Africa with a particular focus on the colonial and postcolonial eras In a series of seven chapters it addresses key themes in the historical scholarship arguing that age serves as a useful category for historical analysis in African history Just as race class and gender can be used to understand how African societies have been structured over time so too age is a powerful tool for thinking about how power youth and seniority intersect and change over time This is then a work of synthesis rather than of new research based on primary sources This book will therefore introduce mainstream scholars of the history of childhood and youth to the literature on Africa and scholars of youth in Africa to debates within the wider field of the history of children and youth
