Alex Attack Brain People Convery:

Alex and the Attack of the Brain People M. C. Convery, 2015-12-21 Alex Darling can't seem to make any friends. He's always angry, getting into fights at school and his little league baseball games, then blames everybody else for his problems. All that is about to change when his wish to run away far from home is granted by a talking oak tree who gives him a magical golden acorn. After he learns from the tree that he has a mysterious long lost twin, the power of the acorn takes him on a journey to find his twin. But will Alex be able to defeat the powerful Brain People who try to stop him at every turn? *Music in the Human Experience* Donald A. Hodges, 2019-10-07 *Music in the Human Experience: An Introduction to Music Psychology* Second Edition is geared toward music students yet incorporates other disciplines to provide an explanation for why and how we make sense of music and respond to it cognitively, physically, and emotionally. All human societies in every corner of the globe engage in music. Taken collectively, these musical experiences are widely varied and hugely complex affairs. How did human beings come to be musical creatures? How and why do our bodies respond to music? Why do people have emotional responses to music? *Music in the Human Experience* seeks to understand and explain these phenomena at the core of what it means to be a human being. New to this edition: Expanded references and examples of non-Western musical styles; Updated literature on philosophical and spiritual issues; Brief sections on tuning systems and the acoustics of musical instruments; A section on creativity and improvisation in the discussion of musical performance; New studies in musical genetics. Greatly increased usage of explanatory figures. Proof of Heaven Eben Alexander, 2012-10-23 The #1 New York Times bestselling account of a neurosurgeon's own near-death experience for readers of *7 Lessons from Heaven*. Thousands of people have had near-death experiences, but scientists have argued that they are impossible. Dr. Eben Alexander was one of those scientists. A highly trained neurosurgeon, Alexander knew that NDEs feel real but are simply fantasies produced by brains under extreme stress. Then Dr. Alexander's own brain was attacked by a rare illness. The part of the brain that controls thought and emotion and, in essence, makes us human, shut down completely. For seven days he lay in a coma. Then, as his doctors considered stopping treatment, Alexander's eyes popped open. He had come back. Alexander's recovery is a medical miracle. But the real miracle of his story lies elsewhere. While his body lay in coma, Alexander journeyed beyond this world and encountered an angelic being who guided him into the deepest realms of superphysical existence. There he met and spoke with the Divine source of the universe itself. Alexander's story is not a fantasy. Before he underwent his journey, he could not reconcile his knowledge of neuroscience with any belief in heaven, God, or the soul. Today, Alexander is a doctor who believes that true health can be achieved only when we realize that God and the soul are real and that death is not the end of personal existence but only a transition. This story would be remarkable no matter who it happened to. That it happened to Dr. Alexander makes it revolutionary. No scientist or person of faith will be able to ignore it. Reading it will change your life.
