Aluminum Dreams The Making Of Light Modernity:

Aluminum Dreams Mimi Sheller, 2014-02-14 How aluminum enabled a high speed gravity defying American modernity even as other parts of the world paid the price in environmental damage and political turmoil Aluminum shaped the twentieth century It enabled high speed travel and gravity defying flight It was the material of a streamlined aesthetic that came to represent modernity And it became an essential ingredient in industrial and domestic products that ranged from airplanes and cars to designer chairs and artificial Christmas trees It entered modern homes as packaging foil pots and pans and even infiltrated our bodies through food medicine and cosmetics In Aluminum Dreams Mimi Sheller describes how the materiality and meaning of aluminum transformed modern life and continues to shape the world today Aluminum Sheller tells us changed mobility and mobilized modern life It enabled air power the space age and moon landings Yet as Sheller makes clear aluminum was important not only in twentieth century technology innovation architecture and design but also in underpinning global military power uneven development and crucial environmental and health concerns Sheller describes aluminum s shiny utopia but also its dark side The unintended consequences of aluminum s widespread use include struggles for sovereignty and resource control in Africa India and the Caribbean the unleashing of multinational corporations and the pollution of the earth through mining and smelting and the battle to save it Using a single material as an entry point to understanding a global history of modernization and its implications for the future Aluminum Dreams forces us to ask How do we assemble the material culture of modernity and what are its environmental consequences Aluminum Dreams includes a generous selection of striking images of iconic aluminum designs many in color drawn from advertisements by Alcoa Bohn Kaiser and other major corporations pamphlets films and exhibitions The Matter of History Timothy J. LeCain, 2017-09-11 The Matter of History links the history of people with the history of things through a bold new materialist theory of the past

Mobility Justice Mimi Sheller, 2018-09-25 Mobility justice is one of the crucial political and ethical issues of our day We are in the midst of a global climate crisis and experiencing the extreme challenges of urbanization In Mobility Justice Mimi Sheller makes a passionate argument for a new understanding of the contemporary crisis of movement Sheller shows how power and inequality inform the governance and control of movement She connects the body street city nation and planet in one overarching theory of the modern perpetually shifting world Concepts of mobility are examined on a local level in the circulation of people resources and information as well as on an urban scale with questions of public transport and the right to the city On the planetary level she demands that we rethink the reality where tourists and other elites are able to roam freely while migrants and those most in need are abandoned and imprisoned at the borders Mobility Justice is a new way to understand the deep flows of inequality and uneven accessibility in a world in which the mobility commons have been enclosed It is a call for a new understanding of the politics of movement and a demand for justice for all **The Routledge Handbook of Mobilities** Peter Adey, David Bissell, Kevin Hannam, Peter Merriman, Mimi Sheller, 2014-01-10 The 21st century

seems to be on the move perhaps even more so than the last With cheap travel and more than two billion cars projected worldwide for 2030 And yet all this mobility is happening incredibly unevenly at different paces and intensities with varying impacts and consequences to the extent that life on the move might be actually quite difficult to sustain environmentally socially and ethically As a result mobility has become a keyword of the social sciences delineating a new domain of concepts approaches methodologies and techniques which seek to understand the character and quality of these trends This Handbook explores and critically evaluates the debates approaches controversies and methodologies inherent to this rapidly expanding discipline It brings together leading specialists from range of backgrounds and geographical regions to provide an authoritative and comprehensive overview of this field conveying cutting edge research in an accessible way whilst giving detailed grounding in the evolution of past debates on mobilities It illustrates disciplinary trends and pathways from migration studies and transport history to communications research featuring methodological innovations and developments and conceptual histories from feminist theory to tourist studies It explores the dominant figures of mobility from children to soldiers and the mobility impaired the disparate materialities of mobility such as flows of water and waste to the vectors of viruses key infrastructures such as logistics systems to the informal services of megacity slums and the important mobility events around which our world turns from going on vacation to the commute to the catastrophic disruption of mobility systems The text is forward thinking projecting the future of mobilities as they might be lived transformed and studied and possibly brought to an end International in focus the book transcends disciplinary and national boundaries to explore mobilities as they are understood from different perspectives different fields countries and standpoints This is an invaluable resource for all those with an interest in mobility across disciplinary boundaries and areas of study

Frictions in Cosmopolitan Mobilities Rodanthi Tzanelli, 2021-04-30 This groundbreaking book investigates the clash between a desire for unfettered mobility and the prevalence of inequality exploring how this generates frictions in everyday life and how it challenges the ideal of just cosmopolitanism Reading fictional and popular cultural texts against real global contexts it develops an aesthetics of justice that does not advocate cosmopolitan mobility at the expense of care and hospitality but rather interrogates their divorce in neoliberal contexts

New Materials Amy E. Slaton, Scott Gabriel Knowles, Sharon Tsai-hsuan Ku, Projit Bihari Mukharji, Rafico Ruiz, Tiago Saraiva, Karen Senaga, Darin Hayton, José Torero, Patryk Wasiak, 2020-10-01 This edited volume gathers eight cases of industrial materials development broadly conceived from North America Europe and Asia over the last 200 years Whether given utility as building parts fabrics pharmaceuticals or foodstuffs whether seen by their proponents as human made or found in nature materials result from the designation of some matter as both knowable and worth knowing about In following these determinations we learn that the production of physical novelty under industrial imperial and other cultural conditions has historically accomplished a huge range of social effects from accruals of status and wealth to demarcations of bodies and geographies Among other cases New Materials traces the

beneficent self identity of Quaker asylum planners who devised soundless metal cell locks in the early 19th century and the inculcation of national pride attending Taiwanese carbon fiber bicycle parts in the 21st the racialized labor organizations promoted by California orange breeders in the 1910s and bureaucratized distributions of blame for deadly high rise fires a century later Across eras and global regions New Materials reflects circumstances not made clear when technological innovation is explained solely as a by product of modernizing impulses or critiqued simply as a craving for profit Whether establishing the efficacy of nano scale pharmaceuticals or the tastiness of farmed catfish proponents of new materials enact complex political ideologies In highlighting their actors conceptions of efficiency certainty safety pleasure pain faith and identity the authors reveal that to produce a new material is invariably to preserve other things to sustain existing values and social structures

Laszlo Moholy-Nagy Joyce Tsai, 2018-04-06 Laszlo Moholy Nagy is the first monograph on Moholy to attend to the fraught but central role painting played in shaping his aesthetic project His reputation has been that of an artist far more interested in exploring the possibilities offered by photography film and other new media than in working with what he once called the anachronistic medium of painting And yet with the exception of the period between 1928 and 1930 Moholy painted throughout his career Joyce Tsai argues that his investment in painting especially after 1930 emerged not only out of pragmatic and aesthetic considerations but also out of a growing recognition of the economic political and ethical compromises required by his large scale technologically mediated projects aimed at reforming human vision Without abandoning his commitment to fostering what he called New Vision Moholy came to understand painting as a particularly plastic field in which the progressive possibilities of photography film and other emergent media could find provisional expression Provided by publisher

The Business of Leisure Andrew Grant Wood, 2021 The Business of Leisure critically surveys a wide selection of travel practices places and time periods in considering the development of the hospitality industry in Latin America and the Caribbean Considering tourism from early sojourners to contemporary dark tourism thrill seekers contributors to The Business of Leisure examine key economic political social and environmental issues A number of eminent scholars in the field draw on original research focusing on Brazil Chile Colombia Cuba the Dominican Republic Ecuador Guatemala Mexico and Peru In addition to describing key aspects of industry development in a variety of settings contributors also consider diverse ways in which histories of travel relate to larger political and cultural questions

Capitalism and the Senses Regina Lee Blaszczyk, David Suisman, 2023-06-13 Capitalism and the Senses is the first edited volume to explore how the forces of capitalism are entangled with everyday sensory experience If the senses have a history as Karl Marx wrote then that history is inseparable from the development of capitalism which has both taken advantage of the senses and influenced how sensory experience has changed over time This pioneering collection shows how seeing hearing tasting smelling and touching have both shaped and been shaped by commercial interests from the turn of the twentieth century to our own time From the manipulation of taste and texture in the food industry to the careful engineering

of the feel of artificial fabrics capitalist enterprises have worked to commodify the senses in a wide variety of ways Drawing on history anthropology geography and other fields the volume s essays analyze not only where this effort has succeeded but also where the senses have resisted control and the logic of markets The result is an innovative ensemble that demonstrates how the drive to exploit sensorial experience for profit became a defining feature of capitalist modernity and establishes the senses as an important dimension of the history of capitalism Contributors Nicholas Anderman Regina Lee Blaszczyk Jessica P Clark Ai Hisano Lisa Jacobson Sven Kube Grace Lees Maffei Ingemar Pettersson David Suisman Ana Mar a Ulloa Nicole Welk Joerger

Urban Play Fabio Duarte,Ricardo Alvarez,2021-08-03 Why technology is most transformative when it is playful and innovative spatial design happens only when designers are both tinkerers and dreamers In Urban Play F bio Duarte and Ricardo lvarez argue that the merely functional aspects of technology may undermine its transformative power Technology is powerful not when it becomes optimally functional but while it is still playful and open to experimentation It is through play in the sense of acting for one s own enjoyment rather than to achieve a goal that we explore new territories create new devices and languages and transform ourselves Only then can innovative spatial design create resonant spaces that go beyond functionalism to evoke an emotional response in those who use them The authors show how creativity emerges in moments of instability when a new technology overthrows an established one or when internal factors change a technology until it becomes a different technology Exploring the role of fantasy in design they examine Disney World and its outsize influence on design and on forms of social interaction beyond the entertainment world They also consider Las Vegas and Dubai desert cities that combine technology with fantasies of pleasure and wealth Video games and interactive media they show infuse the design process with interactivity and participatory dynamics leaving spaces open to variations depending on the users behavior Throughout they pinpoint the critical moments when technology plays a key role in reshaping how we design and experience spaces

A U-Turn to the Future Martin Emanuel, Frank Schipper, Ruth Oldenziel,2020-02-03 From local bike sharing initiatives to overhauls of transport infrastructure mobility is one of the most important areas in which modern cities are trying to realize a more sustainable future Yet even as politicians and planners look ahead there remain critical insights to be gleaned from the history of urban mobility and the unsustainable practices that still impact our everyday lives United by their pursuit of a usable past the studies in this interdisciplinary collection consider the ecological social and economic aspects of urban mobility showing how historical inquiry can make both conceptual and practical contributions to the projects of sustainability and urban renewal

Infrastructuring Urban Futures Alan Wiig, Kevin Ward, Theresa Enright, Mike Hodson, Hamil Pearsall, Jonathan Silver,2023-05-25 EPDF and EPUB available Open Access under CC BY NC ND licence Focusing on material and social forms of infrastructure this edited collection draws on rich empirical details from cities across the global

North and South The book asks the reader to think through the different ways in which infrastructure comes to be present in cities and its co constitutive relationships with urban inhabitants and wider processes of urbanization Considering the climate emergency economic transformation public health crises and racialized inequality the book argues that paying attention to infrastructures past present and future allows us to understand and respond to the current urban condition

Into Our Labours Neil Lazarus,2022-04-15 Into our Labours explores the literary representation of work across the globe since 1850 setting out to show that the literature of modernity is best understood in the light of the worlding of capitalism The book proposes that a determinative relation exists between changing modes of work and changes in the forms genres and aesthetic strategies of the writing that bears witness to them Two aspects of the worlding of modernity especially are emphasised First an inaugural experience of capitalist social relations whose literary registration sometimes makes itself known through a crisis of representation as the forms of space and time consciousness demanded by life in contexts in which market oriented commodity production has become the dominant form of social labour are counterposed with inherited ways of seeing and knowing now under acute pressure if not already obsolete Second a moment corresponding to the consolidation regularisation and global dispersal of capitalist development Into Our Labours focuses on the naturalisation of capitalist social relations forms of sociality and solidarity ideologies of familialism individualism and work relations between the sexes and the generations Arguing that the only plausible term for the vast body of literary work engendered by the worlding of capitalist social relations is modernist the book proposes that it is then important to challenge the still entrenched Eurocentric understandings of modernism Modernism is neither originally nor paradigmatically Western in provenance and its temporal parameters are much broader than are usually assumed in modernist studies extending both backward and forward in time

Collisions at the Crossroads Genevieve Carpio,2019-04-16 There are few places where mobility has shaped identity as widely as the American West but some locations and populations sit at its major crossroads maintaining control over place and mobility labor and race In *Collisions at the Crossroads* Genevieve Carpio argues that mobility both permission to move freely and prohibitions on movement helped shape racial formation in the eastern suburbs of Los Angeles and the Inland Empire throughout the nineteenth and twentieth centuries By examining policies and forces as different as historical societies Indian boarding schools bicycle ordinances immigration policy incarceration traffic checkpoints and Route 66 heritage she shows how local authorities constructed a racial hierarchy by allowing some people to move freely while placing limits on the mobility of others Highlighting the ways people of color have negotiated their place within these systems Carpio reveals a compelling and perceptive analysis of spatial mobility through physical movement and residence

Populist Mobilization Paris Aslanidis,2025-05-15 While much of the political science literature on populism focuses on key political actors within the party system a good deal less attention has been paid to forms of populist contention that feature ordinary citizens protesting against elite rule and championing the cause of the People around the world Populist

Mobilization redresses this imbalance and presents a novel theoretical framework for the study of grassroots populist movements by integrating Laclauian discourse analysis with collective action frame theory Aslanidis examines two widely influential movements that emerged from the protest cycle of the Great Recession the Icelandic Pots and Pans Revolution and the Greek indignados Drawing from semi structured interviews with activists and an extensive analysis of the movements paper trail and audiovisual material he explores organizational aspects processes of collective action framing the construction of collective identities and the influence of cultural elements Additionally the author embarks on a historical exploration of the intellectual roots of populism to dispel the pejorative connotations attached to the concept and advocates for a collaboration between sociologists and political scientists on a comprehensive research agenda for the populist phenomenon that transcends the institutional and non institutional divide Feeding Fascism Diana Garvin,2022

The American Edge Seth G. Jones,2025-11-03 In The American Edge Seth G Jones explains how the industrial bases of the world s great military powers have risen and fallen over the past century and what it means for America Today the US s military base lacks the capacity and flexibility necessary to deter China s growing military power but the country s private sector is flourishing with companies including SpaceX Microsoft and Anduril exhibiting tremendous innovation To regain its capacity to effectively deter China and retain its unmatched status the US must deepen its partnerships with the nation s most innovative tech companies Routledge Handbook of Caribbean Studies Patricia Noxolo,Kevon Rhiney,Ronald Cummings,2025-04-02 The Routledge Handbook of Caribbean Studies provides a critical collection of world class scholarship about this fascinating diverse and dynamic region Bringing together new and established voices on the Anglophone Francophone Spanish speaking and Dutch speaking Caribbean the handbook explores the cultural and historical shapes and reach of the region as well as the environmental climatic and geo political challenges that it faces in the 21st century Each of its four parts Environment Geo politics History and Culture explores the region s conceptual and material entanglements and disentanglements its transnational and transregional connections and disconnections and its historical wakes and posts The Routledge Handbook of Caribbean Studies is essential reading for all who want to know more about this much studied but often misrepresented and misunderstood region *Fernando Ortiz* Stephan Palmié,2023-09-15 Cross regional scholarly dialogue inspired by the work of the pioneering Cuban scholar Fernando Ortiz 1881 1969 coined the term transculturation in 1940 This was an early case of theory from the South concepts developed from an explicitly peripheral epistemological vantage point and launched as a corrective to European and North American theoretical formulations What Ortiz proposed was a contrapuntal vision of complexly entangled processes that we today would conceptualize as cultural emergence Inspired by Ortiz this volume engineers an unprecedented conversation between Mediterraneanists and Caribbeanists It

harnesses Ortiz's mid twentieth century theoretical formulations to early twenty first century issues pertinent to both regions including migration territorial sovereignty and cultural diversity The contributors explore this perspective arguably formed during Ortiz's youth in late nineteenth century Menorca in a dialogue between scholars of the contemporary Caribbean and Mediterranean to enable novel analytics for both regions and to more broadly to probe the promises and limits of Ortiz's contribution for contemporary anthropological research and theorizing
