Nationalism and Architecture Darren Deane, Sarah Butler, 2016-12-05 Unlike regionalism in architecture which has been widely discussed in recent years nationalism in architecture has not been so well explored and understood However the most powerful collective representation of a nation is through its architecture and how that architecture engages the global arena by expressing defining and sometimes negating a sense of nation in order to participate in the international world Bringing together case studies from Europe North and South America the Middle East Africa Asia and Australia this book provides a truly global exploration of the relationship between architecture and nationalism via the themes of regionalism and representation various national building projects ethnic and trans national expression national identities and histories of nationalist architecture and the philosophies and sociological studies of nationalism It argues that nationalism needs to be trans national as a notion to be critically understood and the geographical scope of the proposed volume reflects the continuing relevance of the topic within current architectural scholarship as an overarching notion The interdisciplinary essays are coherently grouped together in three thematic sections Revisiting Nationalism Interpreting Nationalism and Questioning Nationalism These chapters offer vignettes of the protean appearances of nationalism across nations and offer a basis of developing wider knowledge and critically situated understanding of the question beyond a singular nation s limited bounds

Travel, Space, Architecture Jilly Traganou, Miodrag Mitrašinić, 2009 Travel Space Architecture defines a new theoretical territory in architectural and urban scholarship that frames the processes of spatial production through the notion of travel The book presents seventeen key case studies that range from interrogations of architectural travel and notions of belonging and nationhood to challenging established geopolitical hierarchies

Reading Kenneth Frampton Gevork Hartoonian, 2022-05-10 This book

focuses on the first edition of Kenneth Frampton's *Modern Architecture: A Critical History* published in 1980. It searches for clues and positions that will provide the reader with an unprecedented insight into the significance of Frampton's historiography of modern architecture. It explores selected themes in line with Frampton's many faceted contribution, certain aspects of which can be noted between the lines of his ongoing criticism of the present-day architecture which inevitably lead us to a critical understanding of the past, the modernity of architecture's contemporaneity. The compiled chapters attempt to open a window onto the constellation of themes that allowed Frampton to hold on to his anteroom view of history even amidst the flow of time and flood of temporalities spanning 1980-2020. The book elucidates how Frampton's critical presentation of the history of modern movement architecture and the book's classificatory mode/periodization contribute to our understanding of the contemporaneity of architecture today.

The Baroque in Architectural Culture, 1880-1980

Andrew Leach, John Macarthur, 2016-03-09. In his landmark volume *Space, Time and Architecture*, Sigfried Giedion paired images of two iconic spirals: Tatlin's Monument to the Third International and Borromini's dome for Sant'Ivo alla Sapienza. The values shared between the baroque age and the modern were thus encapsulated on a single page spread. As Giedion put it, writing of Sant'Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without entirely ending even there. And yet he merely groped towards that which could be completely effected in modern architecture: achieving the transition between inner and outer space. The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged. This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography. It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque, a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism. Presenting research by an international community of scholars, this book explores through a series of cross-sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century. The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history. In doing so, the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture.

Territories of Faith

Sven Sterken, Eva Weyns, 2022-01-28. A novel and interdisciplinary perspective on post-war church building. In the 1950s and 1960s, thousands of churches were built across Europe in an attempt to keep up with the continent's rapid urbanisation. This book addresses the immense effort related to the planning, financing and construction of this new religious infrastructure. Going beyond aspects of style and liturgy and transcending a focus on particular architects or regions, this volume considers church building at the crossroads of pastoral theology, religious sociology and urban planning. Presenting the rich palette of strategies and methods deployed by

congregations dioceses government bodies and private patrons in their attempt to secure a religious presence in the rapidly modernising world Territories of Faith offers a broad view of the practice of religion and its material expression in the fast evolving sub urban landscapes of post war Europe

Modern Architecture and the Sacred Ross Anderson, Maximilian Sternberg, 2020-11-26 This edited volume Modern Architecture and the Sacred presents a timely reappraisal of the manifold engagements that modern architecture has had with the sacred It comprises fourteen individual chapters arranged in three thematic sections Beginnings and Transformations of the Modern Sacred Buildings for Modern Worship and Semi Sacred Settings in the Cultural Topography of Modernity The first interprets the intellectual and artistic roots of modern ideas of the sacred in the post Enlightenment period and tracks the transformation of these in architecture over time The second studies the ways in which organized religion responded to the challenges of the new modern self understanding and then the third investigates the ways that abstract modern notions of the sacred have been embodied in the ersatz sacred contexts of theatres galleries memorials and museums While centring on Western architecture during the decisive period of the first half of the 20th century a time that takes in the early musings on spirituality by some of the avant garde in defiance of Sachlichkeit and the machine aesthetic the volume also considers the many varied appropriations of sacrality that architects have made up to the present day and also in social and cultural contexts beyond the West

Pepper Michelle Provoost Lukasz Stanek Mark Swenarton Florian Urban and Dirk van den Heuvel The Chieftain and the Chair Maggie Taft, 2023-05-22 A history of how Danish design rose to prominence in the postwar United States becoming shorthand for stylish modern comfort Today Danish Modern design is synonymous with clean midcentury cool During the 1950s and 60s it flourished as the furniture choice for Americans who hoped to signal they were current and chic But how did this happen How did Danish Modern become the design movement of the times In The Chieftain and the Chair Maggie Taft tells the tale of our love affair with Danish Modern design Structured as a biography of two iconic chairs Finn Juhl's Chieftain Chair and Hans Wegner's Round Chair both designed and first fabricated in 1949 this book follows the chairs from conception and fabrication through marketing distribution and use Drawing on research in public and private archives Taft considers how political economic and cultural forces in interwar Denmark laid the foundations for the postwar furniture industry and she tracks the deliberate maneuvering on the part of Danish creatives and manufacturers to cater to an American market Taft also reveals how American tastemakers and industrialists were eager to harness Danish design to serve American interests and how furniture manufacturers around the world were quick to capitalize on the fad by flooding the market with copies Sleek and minimalist Danish Modern has experienced a resurgence of popularity in the last few decades and remains a sought after design This accessible and engaging history offers a unique look at its enduring rise among tastemakers Pride in Modesty Michelangelo Sabatino, 2011-05-21 Following Italy's unification in 1861 architects artists politicians and literati engaged in volatile debates over the pursuit of national and regional identity Growing industrialization and urbanization across the country contrasted with the rediscovery of traditionally built forms and objects created by the agrarian peasantry Pride in Modesty argues that these ordinary often anonymous everyday things inspired and transformed Italian art and architecture from the 1920s through the 1970s Through in depth examinations of texts drawings and buildings Michelangelo Sabatino finds that the folk traditions of the pre industrial countryside have provided formal practical and poetic inspiration directly affecting both design and construction practices over a period of sixty years and a number of different political regimes This surprising continuity allows Sabatino to reject the division of Italian history into sharply delimited periods such as Fascist Interwar and Democratic Postwar and to instead emphasize the long continuous process that transformed pastoral and urban ideals into a new modernist Italy **Modernism in Scandinavia** Charlotte Ashby, 2017-02-23 Scandinavia is a region associated with modernity modern design modern living and a modern welfare state This new history of modernism in Scandinavia offers a picture of the complex reality that lies behind the label a modernism made up of many different figures impulses and visions It places the individuals who have achieved international fame such as Edvard Munch and Alvar Aalto in a wider context and through a series of case studies provides a rich analysis of the art architecture and design history of the Nordic region and of modernism as a concept and mode of practice Modernism in Scandinavia addresses the decades between 1890 and 1970 and presents an intertwined history of modernism

across the region Charlotte Ashby gives a rationale for her focus on those countries which share an interrelated history and colonial past but also stresses influences from outside the region such as the English Arts and Crafts movement and the impact of emergent American modernism Her richly illustrated account guides the reader through key historical periods and cultural movements with case studies illuminating key art works buildings designed products and exhibitions *Henry Van de Velde* Katherine M. Kuenzli,2019-01-01 The painter designer and architect Henry van de Velde 1863 1957 played a crucial role in expanding modernist aesthetics beyond Paris and beyond painting Opposing growing nationalism around 1900 he sought to make painting the basis of an aesthetic that transcended boundaries between the arts and between nations through his work in Belgium France Germany and the Netherlands Van de Velde s designs for homes museums and theaters received international recognition The artist often associated with the Art Nouveau and Jugendstil developed a style of abstraction that he taught in his School of Applied Arts in Weimar the immediate precursor of and model for the Bauhaus As a leading member of the German Werkbund he helped shaped the fields of modern architecture and design This long awaited book the first major work on van de Velde in English firmly positions him as one of the twentieth century s most influential artists and an essential voice within the modern movement **Arts and a Nation** Suzanne Pourchier-Plasseraud,2015-10-14 Focusing on the role of arts in the construction of national identity Suzanne Pourchier Plasseraud has chosen to study the case of a country lacking an ancient state history of its own Latvia This book analyses the part played by the visual arts in transmuting the cultural concept of a nation advocated by a small intelligentsia into a widespread claim for independence By the end of the 19th century fretting under Russian political domination and German economic and cultural supremacy the Latvians turned back to their own language culture and folklore with a special interest for their dainas their timeless common heritage rooted into a mythical golden age Latvian artists thus found themselves entrusted with the mission of creating a national iconographic representation and a specifically Latvian art freed from Russian and German influences The author shows how the links between the cultural and political spheres evolved between 1905 and 1940 including during the period of authoritarian government preceding WWII An enlightening contribution to understanding how art and history can be turned into social and political instruments this book reaches far beyond the Latvian case to a European and even global scope *Screen Genealogies* Craig Buckley,Rüdiger Campe,Francesco Casetti,2025-10-01 Against the grain of the growing literature on screens *Screen Genealogies* argues that the present excess of screens cannot be understood as an expansion and multiplication of the movie screen nor of the video display Rather screens continually exceed the optical histories in which they are most commonly inscribed As contemporary screens become increasingly decomposed into a distributed field of technologically interconnected surfaces and interfaces we more readily recognize the deeper spatial and environmental interventions that have long been a property of screens For most of its history a screen was a filter a divide a shelter or a camouflage A genealogy stressing transformation and descent rather than origins and roots emphasizes a deeper set of

intersecting and competing definitions of the screen enabling new thinking about what the screen might yet become

Sir Banister Fletcher's Global History of Architecture Sir Banister Fletcher, 2020 Sir Banister Fletcher's Global History of Architecture is the acknowledged classic reference work for architectural history. It has been essential reading for generations of architects and students since the first edition was published in 1896 and this tradition continues today as the new 21st edition provides the most up to date authoritative and detailed account of the global history of architecture available in any form. Thousands of major buildings from around the world are described and explained accompanied by over 2 200 photographs, plans and drawings. Architectural styles and traditions are placed within a clear framework and the chronological and geographical arrangement of the work's 102 chapters allows for easy comparative analysis of cultural contexts, resources and technologies.

Key Modern Architects Andrew Higgott, 2018-05-31 Key Modern Architects provides an accessible and thought provoking introduction to the work of the most significant architects of the modern era. Fifty short chapters introduce fifty key architects from Le Corbusier to Aldo Van Eyck to Zaha Hadid, exploring their most influential buildings and developing a critique of each architect's work within a broader cultural and historical context. The selection represents the most influential architects working from 1890 to the present, those most likely to be taught on survey courses in modern architectural history along with some lesser known names with an equal claim to influence. Emphasis is placed on a critical and interpretative approach allowing the student to position each architect in a cultural and intellectual context quickly and easily. Artistic, technical, social and intellectual developments are brought to the fore, built and unbuilt projects, writings and influences. This approach brings to light the ideology behind architectural work, offering insights into each architect's working practice. Helps students to develop a critical approach to understanding modern architectural history. One chapter per architect meaning chapters may be read individually as a concise resource for the study of an architect or together as a coherent book length history of the whole period of modern architecture. Chapters are supported by boxed lists of each architect's most significant projects along with suggestions for further reading as a springboard to further study and research. Combining the clarity and accessibility of a textbook with in depth reading and a critical approach, Key Modern Architects provides an invaluable resource for both the classroom and for independent study in architectural and art history.
