This book provides insights and process details of how to design and build disruptive innovations so that you are not flying blind or just throwing darts in an effort to pivot expand to the online order fulfillment world The fulfillment machine is the delivery side infrastructure of an online business it is the physical and digital innovations which make it possible to immediately deliver customer orders Customers want to order everything while sitting on their couch and they want immediate fulfillment Fast fulfillment is happening and everyone knows that but most are scared of it Many experts describe the wonders of online retail but none explains what fast fulfillment is or propose a solution to building a fast fulfillment machine Managers are frustrated just reading about how great Amazon is and how startups are innovating fantastic technology driven processes Here is the book written in a simple easy to read style which unravels the technical mystery of the fulfillment machine It levels the knowledge field reveals the secrets of fast fulfillment and helps the reader construct a plan to innovate and be ready to face the disruptors What is happening in retail is contagious across industries there are no wide moats Managers and engineers are rushing to redesign their supply chains into fast fulfillment machines This book provides insights and process details of how to design and build disruptive innovations so that you are not flying blind or just throwing darts in an effort to pivot expand to the online order fulfillment world The book does not story tell the fast fulfillment machine it is informative and instructive *Transition Point: From Steam to the Singularity* Sean A. Culey,2018-11-06 We live in disruptive times The world is changing faster than ever before leaving people dazed businesses struggling economies floundering and societies fracturing But why Transition Point is the result of over five years of research to establish the answer a breathtaking tale of freedom unintended consequences and disruptive technologies that starts 1000 years ago and ends up in the second half of the 21st Century Starting with an examination into the drivers of technological change and the social economic and political factors that both enable or suppress it Transition Point explains why industrialisation happened where and when it did why progress comes in waves and why the technologies in the current wave such as robotics blockchain and AI are likely to be the most disruptive of all It then addresses the million dollar question what s next What impact will this wave have on our businesses our economies and most

importantly on our society Culey explores how our current trajectory could result in a new golden age but also how it is just as likely to result in a digital dictatorship of compliance and constant surveillance Finally he explains why we may soon see Homo sapiens role as the dominant species come to an end As Klaus Schwab founder of the World Economic Forum stated We stand on the brink of a technological revolution that will fundamentally alter the way we live work and relate to one another In its scale scope and complexity the transformation will be unlike anything humankind has experienced before Transition Point explains why this is happening what it means and why the decisions we make now will prove to be critical
