Trade in Knowledge Antony Taubman, Jayashree Watal, 2022-03-17 Offers insights into what it means to trade in knowledge in today's technological and commercial environment

The Inscrutable Shopper Stella Minahan, 2011-09-06 The book highlights research undertaken by marketers, social researchers and anthropologists who have an interest in this field. Anti-consumption is of relevance to practitioners and academics as it is important to understand consumer trends and values. The book has a particular relevance to professionals employed in marketing, retail and associated industries who need to consider anti-consumption as an influence on their target markets. The study of anti-consumption can be seen as the flip side to marketing which aims to understand promotion of consumption.

Networks Sanjeev Goyal, 2023-04-18 An accessible and comprehensive overview of the economic theory and the realities of networks written by a pioneering economics researcher. Networks are everywhere: the infrastructure that brings water into our homes, the social networks made up of our friends and families, the supply chains connecting cities, people and goods. These interconnections contain economic trade-offs. For example, should an airline operate direct flights between cities or route all its flights through a hub? Viewing networks through an economics lens, this textbook considers the costs and benefits that govern their formation and functioning. Networks are central to an understanding of the production, consumption and information that lie at the heart of economic activity. Sanjeev Goyal provides advanced undergraduate and graduate students with an accessible and comprehensive introduction to the economics research on networks of the past twenty-five years. Each chapter introduces a theoretical model illustrated with the help of case studies and formal proofs. After introducing the theoretical concepts, Goyal examines economic networks including infrastructure, security, market power and financial networks. He then covers social networks with chapters on coordinating activity, communication and learning, information networks, epidemics and impersonal markets. Finally, Goyal locates social and economic networks in a broader context covering networked markets, economic development, trust and group networks in their relation to markets and the state. First textbook to provide a broad and comprehensive overview of twenty-first century economic theory of networks. Features engaging case studies and accessible exercises. Written by a pioneering economics researcher.

The End of Ownership Aaron Perzanowski,Jason Schultz,2018-03-16 An argument for retaining the notion of personal property in the products we buy in the digital marketplace If you buy a book at the bookstore you own it You can take it home scribble in the margins put in on the shelf lend it to a friend sell it at a garage sale But is the same thing true for the ebooks or other digital goods you buy Retailers and copyright holders argue that you don t own those purchases you merely license them That means your ebook vendor can delete the book from your device without warning or explanation as Amazon deleted Orwell s 1984 from the Kindles of surprised readers several years ago These readers thought they owned their copies of 1984 Until it turned out they didn t In The End of Ownership Aaron Perzanowski and Jason Schultz explore how notions of ownership have shifted in the digital marketplace and make an argument for the benefits of personal property Of course ebooks cloud storage streaming and other digital goods offer users convenience and flexibility But Perzanowski and Schultz warn consumers should be aware of the tradeoffs involving user constraints permanence and privacy The rights of private property are clear but few people manage to read their end user agreements Perzanowski and Schultz argue that introducing aspects of private property and ownership into the digital marketplace would offer both legal and economic benefits But most important it would affirm our sense of self direction and autonomy If we own our purchases we are free to make whatever lawful use of them we please Technology need not constrain our freedom it can also empower us
