HEALTHCARE's OUT SICK - PREDICTING A CURE - Solutions that WORK !!!! Gary D. Miner, Linda Miner, Darrell L. Dean, 2019-01-04

The U.S. healthcare system is in complete chaos/disarray. Medical costs have increased significantly over the past 6 years with 70% increase for deductibles and 24% or more for health insurance premiums. All the while, workers' earnings have either not increased or, if they did, the pay raises were for less than the increase in the cost of medical care. The situation is unsustainable, and the public wants the system fixed. This book offers ways of fixing the problems in healthcare.

HEALTHCARE's OUT SICK - PREDICTING A CURE - Solutions that WORK first defines the healthcare in crisis problem. Through real patient experiences, the book describes the difficulties of getting through the maze of complexity among the plethora of silo providers which make up the industry. The heart of the book provides readers with a comprehensive solution that can work a disruption that is necessary to provide Americans the medical care they need without the U.S. public and healthcare providers and payors going into bankruptcy, insolvency, or closure. This book delves into digitized medicine, payor and provider reimbursement models, and value-based healthcare delivery. It also includes a philosophy or mode of thinking and operation for the solutions that are needed for diagnosis, effective, cost-effective, and time-efficient healthcare delivery, of which digitized medicine, value-based care, and payor reimbursement modes are just some of the factors.

The authors propose that the real solution involves having the patient at the center of the issues and changing from an archaic gold standard way of thinking to a Predictive Analytic thinking where one gets at the real truth by doing real science that, in the end, becomes effective not only for the population but for the individual person. This all leads to real person-centered and person-directed medicine and healthcare delivery.
