DIRECTORY OF CORPORATE COUNSEL , 2023 *Starving the Dream* Nathan F. Alleman, Cara Cliburn Allen, Sarah Madsen, 2025-03-04 How exceptional low income students navigate and pursue opportunity in prestige oriented universities at the personal cost of hunger Beneath the veneer of prestige and promise a hidden issue pervades the campuses of America s selective universities In *Starving the Dream* Nathan F Alleman Cara Cliburn Allen and Sarah E Madsen reveal the startling contradiction between the celebrated opportunities of these prestige oriented institutions and the food insecurity that exceptional low income students must navigate within environments of plenty Through meticulous case study research the authors leverage student and administrative interviews observations and official and alternative campus tours to uncover how normatively affluent universities are rife with expectations of extensive

campus involvement and material displays of wealth However visions of the ideal student experience are only attainable for low income students at the cost of either involvement or consistent food access Critiquing the social and symbolic meaning that food takes on in affluent universities where students are socialized into coveting upper middle class lifestyle markers such as gourmet coffee and branded campus clothing the book argues that administrators must better align services and support with the demands of a rigorous academic experience It also encourages universities to recognize students innovative solution making and incorporate their voices and agency in campus strategies This expansive study challenges readers to reconsider the broader impacts of higher education s structures and priorities and urges a reevaluation of what full participation should look like in these resource and opportunity rich environments Starving the Dream is an appeal to university leaders campus administrators and students themselves concerned with educational equity beyond mere access It provides a blueprint for meaningful change that centers the knowledge of those experiencing and administering food insecurity such that the dreams of selective university attendance need not be deferred by student hunger

Triaging the Streaming Wars Robert Alan Brooke, Jason Phillips, Tim Pollard, 2023-09-08. This volume considers the different implications of the rise of streaming services and their particular acceleration during the COVID-19 pandemic. Exploring the significant disruption caused to the entertainment industries by the rise of these streaming services, a team of international scholars examine changes to labor issues and compensation which were central to the conflict between the Writers Guild of America members and their agents, the broadening divide between networks and affiliates, the significant consolidation of the media industry resulting from Disney's acquisition of Fox, ahead of the launch of Disney, and the variety of business models behind these services that defy the traditional advertising models and standard revenue streams. This thorough and multifaceted look at this rapidly growing section of the entertainment industry will be of interest to academics and students working in film and TV studies, media industry studies, digital media studies, business, and communication studies.

The Attention Deficit Swati Bhatt, 2019-09-05. Digital technology has enabled connectivity on an unimagined scale. Human beings are social animals, and economic activity promotes this socialization. Market transactions are based on optimism about the future, faith that the world is good, and trust that growth is organic or coming from within the system. Individuals therefore invest in the future by having children, by extending credit, and accepting risk, and by building connections with others in the sincere expectation of this connectivity being reciprocated. This book explores the unintended consequences of ubiquitous connectivity. The first effect is captured by the sharing model. Technology offers multiple avenues for sharing experiences and personal information, so active engagement with this increased content uses mental effort. Connection inevitably leads to comparisons with other groups and individuals, so despite the benefits of affirmation and group inclusion, these links corrode social networks, leading to depression and mental apathy. The second effect, the result of the commercialization of sharing, is encapsulated in the attention deficit model. Loss of self-worth, driven by the first effect, encourages further connectivity and sharing as buyers seek more comfort and reassurance via social media, paying with time and personal information. The product is digital content.

and the payment is with time and data Correspondingly social media fulfills this demand with exuberance both via user generated content and commercially curated content We are overwhelmed with even more information paying with increasingly scarce time and attention Finally the third and most consequential effect is diminished risk taking Attention scarcity as a consequence of the content tsunami throttles cognitive effort impairing judgment and decision making So the safe bet may be to do nothing take no risks and no gambles Weaving together the latest research on economics psychology and neuroscience this book fills a void for readers wanting a smart clear analysis of communications markets and the commercialization of Internet inspired connectivity *Bodies for Profit and Power* Lisa Wenger Bro, 2023-09-29 Early dystopian science fiction like George Orwell's 1984 or Thea von Harbou's Metropolis show us bleak worlds where capitalism has no boundaries and has corrupted sovereign powers exploiting the lower classes and benefiting only a few at the top Political laws and policies related to human life or the biopolitical devalue that life making humanity little more than expendable machines producing for capitalism and capitalism's focus on progress has made it a central concern in much of science fiction Covering science fiction from the early 1900s to present this book examines the portrayal of dystopian capitalism and the biopolitical in works like Brave New World and 1984 among many others Sports, Media, and Society Kevin Hull, 2024-03-26 Whether espoused by sports leagues teams or individual athletes social issues are part of the sporting world fabric The sports media often plays the gatekeeper deciding how messages are presented and to what extent they are covered if at all Sports Media and Society investigates the impact of societal issues in sports and how the media reports those stories Why does the sports media operate in the manner that it does and what's the impact of its decisions on the audience With Sports Media and Society there is now a resource that combines mainstay class discussion points current case studies and theoretical and historical foundations in one comprehensive text The book's 34 chapters are each short and concise a format preferred by instructors covering a wide range of topics and easily digestible for students Part I covers sports media history and the media's role as gatekeeper Chapters explore the history and evolution of various media newspapers magazines radio television and social media and the business of and competition between sports media entities Case studies examine NBC's Olympics coverage and the nimbleness of Sports Illustrated in the digital space Part II showcases television's impact on how fans follow sports Discussions include ABC's Wide World of Sports which exposed viewers to events around the globe ESPN's foray into 24/7 sports coverage and Fox Sports' shocking NFL deal which marked a new era in media rights negotiations and sports broadcasting technologies The intersection of sports and social issues is the focus of part III Numerous issues are addressed punctuated by case studies involving key players and events related to each topic Cases concerning Colin Kaepernick USWNT and coverage of women's sports generally LGBTQ issues and obstacles faced by women working in sports media are highlights while examinations of social identity theory and framing provide context on how people identify with specific groups and how the media influences opinions Athletes and sport
