Taking Aim at the Arms Trade Doctor Anna Stavrianakis, 2013-07-18 Taking Aim at The Arms Trade NGOs Global Civil Society and the World Military Order takes a critical look at the ways in which NGOs portray the arms trade as a problem of international politics and the strategies they use to effect change NGOs have been pivotal in bringing the suffering caused by the arms trade to public attention documenting its negative impact on human rights conflict security and development around the world and pushing for measures to control or eradicate the trade Overall however their activity has helped sideline debate on

Northern military predominance while facilitating intervention in the South based on liberal understandings of the arms trade conflict development and human rights. They thus contribute to the perpetuation of a hierarchical world military order and the construction of the South as a site of Northern benevolence and intervention. Stavrianakis exposes the tensions inherent in NGOs' engagement with the arms trade and argues for a re-examination of dominant assumptions about NGOs as global civil society actors.

The Case for Peace Alan Dershowitz, 2011-01-06 In The Case for Peace Dershowitz identifies twelve geopolitical barriers to peace between Israel and Palestine and explains how to move around them and push the process forward. From the division of Jerusalem and Israeli counterterrorism measures to the security fence and the Iranian nuclear threat, his analyses are clear-headed, well-argued, and sure to be controversial. According to Dershowitz, achieving a lasting peace will require more than tough-minded negotiations between Israelis and Palestinians. In academia, Europe, the UN, and the Arab world, Israel-bashing and anti-Semitism have reached new heights despite the recent Israeli-Palestinian movement toward peace. Surveying this outpouring of vilification, Dershowitz deconstructs the smear tactics used by Israel-haters and shows how this kind of anti-Israel McCarthyism is aimed at scuttling any real chance of peace.

Freethinking Simon McCarthy-Jones, 2023-10-05 For humanity to survive, there must always be people performing the minute-to-minute miracle of thought. Excellent and beyond timely. A.C. Grayling: Scientific advances and new technologies are letting others manipulate our minds more easily than ever before. Now those tasked with protecting our minds are finally preparing to fight back. As we speak, the United Nations is seeking to pin down a concrete right to free thought and enshrine it in international law alongside life, education, and protest. But what is thought? And what makes it free? And how can it best be protected? Freethinking explores what an effective right to freedom of thought would look like and asks how we might build a culture of free thought and whether that's even what we want. In an uncertain and rapidly evolving world, Freethinking shows that there are solutions to the forces buffeting our minds.

Comparative Education, Terrorism and Human Security W. Nelles, 2003-12-18 Policy decisions in education have changed drastically as a result of the recent threats to our international and national security. In this timely and compelling collection, authors discuss the significance of policy decisions on education systems and argue that all forms of violence, including terrorism, are often reproduced through education. Authors incorporate case studies from a broad spectrum of countries to make a case for peace-building alternatives and non-military security cooperation. Comparative Education, Terrorism and Human Security will highlight education systems around the globe that sustain violence, will bring together human security and preventive diplomacy research to predict future trends, will explore foreign policy implications that could lead to non-violent interventions abroad, and will provide teachers and policymakers with relevant reflections on reform. This book arrives at a time when many of us are wondering what education systems can do to eliminate perpetuated violence and will be the only one of its kind to address these questions on a global scale.
