**Crossroads** Dr Debra D Andrist, 2019-11-14 Crossroads Intersections physical and or metaphorical demand processes of consideration determination decision and commitment Stasis is no longer an option where convergence is poised before the unknown Where categories such as gender culture ethnicity socio economic status philosophy and religion clash the multivariate process can reach such complexity that literary sociological and psychological tools can have differing interpretations Real life intersections range from the mundane choosing among food items on a menu according to taste preferences to survival determinants evaluating the efficacy of various medical procedures But such intersections are at the two ends of a very long continuum that takes in issues of form function and traditional vs modern For example Home may be defined both as a physical place and or a mental construct In more esoteric contexts artists chiefly known for visual production representing their ideas with color and form not infrequently cross media to paint with words Philosophy religion art and literature cross paths via symbols and other visual and linguistic constructs Writers deal with how and where their own or their characters multiple identities intersect The Hispanic world is an extraordinarily vivid place to explore these crossroads This collection of essays addresses a multitude of crossroads in numerous Hispanic contexts across the intersections of time e.g. the visual architectural how Spain's age old oenological tradition meets modern technology how the vestiges of long term dictatorship lurk in the spaces of Spain's democracy and how space architecture and art poetry cross in Latin America Painters Pablo Picasso and Frida Kahlo's productions cross the visual to the written and magical realism products of the twentieth century Latin American artistic movement defy nature science time and space
