Willa Cather's Ecological Imagination Susan J. Rosowski,2003-01-01 The wide ranging essays collected in this volume of Cather Studies examine Willa Cather s unique artistic relationship to the environment Under the theoretical rubric of ecocriticism these essays focus on Cather s close observations of the natural world and how the environment proves for most of these contributors to be more than simply a setting for her characters While it is certain that Cather s novels and short stories are deeply grounded in place literary critics are only now considering how place functions within her narratives and addressing environmental issues through her writing These essays reintroduce us to a Cather who is profoundly identified with the places that shaped her and that she wrote about Glen A Love offers an interdisciplinary reading of *The Professor's House* that is scientifically oriented Joseph Urgo argues that *My Antonia* models a preservationist aesthetic in which landscape and memory are inextricably entangled Thomas J Lyon posits that Cather had a living sense of the biotic community and used nature as the standard of excellence for human endeavors and Jan Goggans considers the ways that *My Antonia* shifts from nativism toward a flexible notion of place based community

responsibilities The rate of extinction of other species is now greater than it has been since the disappearance of the dinosaurs 60 million years ago There is little doubt that we are the culprits and we could be next Our collective decisions have brought about colossal changes in the planet we inherited and we need to act now to provide future generations with a fighting chance of defeating The Cosmic Cancer **Ancestors and Relatives** Eviatar Zerubavel,2012-01-26 Noted social scientist Eviatar Zerubavel casts a critical eye on how we trace our past individually and collectively arguing that rather than simply find out who our ancestors are from genetics or history we actually create the stories that make them our ancestors
