Lost Moon The Perilous Voyage Of Apollo 13 By Jim Lovell:

Lost Moon Jim Lovell, Jeffrey Kluger, 1994 The untold story of the American moon shot that almost ended in a fatal catastrophe told by the flight's commander offers a chronicle of courage heroism and adventure **Apollo 13** Jim Lovell, Jeffrey Kluger, 1995 April 13 1970 Astronauts Jim Lovell Fred Haise and Jack Swigert are hurtling towards the moon in the Apollo 13 spacecraft when an explosion rocks the ship The cockpit grows dim the air grows thin and the instrument lights wink out Moments later the astronauts are forced to abandon the main ship for the tiny lunar module designed to keep two men alive for just two days But there are three men aboard and they are four days from home As the action shifts from the disabled ship to the frantic engineers at Mission Control to Lovell's anxious family APOLLO 13 brilliantly recreates the harrowing heroic mission in all its drama and glory This gripping story of human endurance is the basis for Ron Howard's classic film starring Tom Hanks and Kevin Bacon **Apollo 13** James Lovell, Jeffrey Kluger, 2019-02-12 NATIONAL BESTSELLER Astronaut Jim Lovell and coauthor Jeffrey Kluger's harrowing account of the Apollo 13 disaster Serving as the basis for Ron Howard's blockbuster Apollo 13 the book reveals true details not shown in the movie Thrilling and evocative you feel as though you're alongside Lovell in the lunar module Written with all the color and drama of the best fiction Apollo 13 tells the full story of the moon shot that almost ended in catastrophe Minutes after a mid flight explosion the three astronauts are forced to abandon the main ship for the lunar module a tiny craft designed to keep two men alive for just two days As the hours tick away the narrative shifts from the crippled spacecraft to Mission Control from engineers searching desperately for a way to fix the ship to Lovell's wife and children praying for his safe return The entire nation watches as one crisis after another is met and overcome By the time the ship splashes down in the Pacific we understand why the heroic effort to rescue Lovell and his crew is considered by many to be NASA's finest hour Inspiring and astonishing the story of Apollo 13 is a timeless tribute to the enduring American spirit and sparkling individual heroism [Danger in Space](#) Henry M. Holden, 2012-07-01 Soaring through space at 25 000 per hour Apollo 13 was on course for the Moon Suddenly the three astronauts aboard the spacecraft heard a loud bang A strong vibration rumbled through the crew cabin There had been an explosion in the oxygen tank More than 200 000 miles from Earth Apollo 13 was in grave danger The astronauts had planned to land on the Moon but now they had a new mission survival Author Henry M Holden delivers the gripping details of how three astronauts with the help of NASA scientists on Earth turned a story of disaster into one of triumph [Apollo's Legacy](#) Roger D. Launius, 2019-05-14 An all encompassing look at the history and enduring impact of the Apollo space program In Apollo's Legacy space historian Roger D Launius explores the many faceted stories told about the meaning of the Apollo program and how it forever altered American society The Apollo missions marked the first time human beings left Earth's orbit and visited another world and thus they loom large in our collective memory Many have detailed the exciting events of the Apollo program but Launius offers unique insight into its legacy as seen through multiple perspectives He surveys a wide

range of viewpoints and narratives both positive and negative surrounding the program These include the argument that Apollo epitomizes American technological and political progress technological and scientific advances garnered from the program critiques from both sides of the political spectrum about the program s expenses and even conspiracy theories and denials of the program s very existence Throughout the book Launius weaves in stories from important moments in Apollo s history to draw readers into his analysis Apollo s Legacy is a must read for space buffs interested in new angles on a beloved cultural moment and those seeking a historic perspective on the Apollo program

packing its bags and a new administration was preparing to take office. For most countries it would have taken years if not decades to recover from such an event. Yet only one year later Chile's economy had reached a six percent annual growth rate. In *Leadership Dispatches*, Michael Useem, Howard Kunreuther, and Erwann Michel Kerjan look at how the nation's leaders in government, business, religion, academia, and beyond facilitated Chile's recovery. They attribute Chile's remarkable comeback to a two-part formula consisting of strong national leadership on the one hand and deeply rooted institutional practices on the other. Coupled with strategic deliberative thinking, these levers enabled Chile to bounce back quickly and exceed its prior national performance. The authors make the case that the Chilean story contains lessons for a broad range of organizations and governments the world over. Large-scale catastrophes of many kinds, from technological meltdowns to disease pandemics, have been on the rise in recent years. Now is the time to seek ideas and guidance from other leaders who have triumphed in the wake of a disaster. In this vein, *Leadership Dispatches* is both a remarkable story of resilience and an instructive look at how those with the greatest responsibility for a country, company, or community should lead. **NASA 50th Anniversary**

Proceedings: NASA's First 50 Years: Historical Perspectives Steven J. Dick, National Aeronautics and Space Administration, 2010-07-07. On 29 July 1958, President Dwight D. Eisenhower signed the National Aeronautics and Space Act, creating the National Aeronautics and Space Administration (NASA), which became operational on 1 October of that year. Over the next 50 years, NASA achieved a set of spectacular feats ranging from advancing the well-established field of aeronautics to pioneering the new fields of Earth and space science and human spaceflight. In the midst of the geopolitical context of the Cold War, 12 Americans walked on the Moon, arriving in peace for all mankind. Humans saw their home planet from a new perspective with unforgettable Apollo images of Earthrise and the Blue Marble, as well as the pale blue dot from the edge of the solar system. A flotilla of spacecraft has studied Earth, while other spacecraft have probed the depths of the solar system and the universe beyond. In the 1980s, the evolution of aeronautics gave us the first winged human spacecraft, the Space Shuttle, and the International Space Station stands as a symbol of human cooperation in space as well as a possible way station to the stars. With the Apollo fire and two Space Shuttle accidents, NASA has also seen the depths of tragedy. In this volume, a wide array of scholars turn a critical eye toward NASA's first 50 years, probing an institution widely seen as the premier agency for exploration in the world, carrying on a long tradition of exploration by the United States and the human species in general. Fifty years after its founding, NASA finds itself at a crossroads that historical perspectives can only help to illuminate.
