Lucy The Beginnings Of Humankind By Donald C Johanson:

Lucy Donald Johanson, Maitland Edey, 1990-09-15 How our oldest human ancestor was discovered and who she was Cover
Lucy Donald C. Johanson, 2001 *The Truth about Human Origins* Brad Harrub, Bert Thompson, 2003 Ever since Charles Darwin first published *The Origin of Species* on November 24 1859 the subject of origins has been one of the most controversial topics around Sadly it also is a subject that is fraught with erroneous theories and concepts Most students today are taught that organic evolution is not a theory but a fact that all reputable scientists accept Disclaimers from the evolutionary community notwithstanding such a claim is quite simply wrong We believe it is time for someone to offer what renowned news commentator Paul Harvey would call the rest of the story That is what *The Truth About Human Origins* does It tells the rest of the story as it discusses the scientific facts about mankind's beginning For example it investigates the record of the rocks as that record relates to human evolution It demonstrates how evolutionary theory is unable to explain things like the origin of gender and sexual reproduction the origin of language and communication the origin of the brain the mind and human consciousness and the origin of skin colors and blood types It also examines in an in depth fashion the so called molecular evidence of human evolution *Ancestral Passions* Virginia Morell, 2011-01-11 This biography of the First Family of anthropology reveals how their discoveries collaborations and rivalries contributed to our own knowledge of the origins of humankind In this fascinating and authoritative work acclaimed science writer Virginia Morell brings to vivid life the famous and infamous Leakey family pioneers in the field of paleoanthropology Louis Leakey the patriarch who persisted through initial scientific failures and scandal ridden divorce to achieve spectacular success in digs throughout East Africa Mary his second wife who worked alongside Louis as they made their outstanding discoveries at Olduvai Gorge and elsewhere and Richard their son who ascended to the top of the field in his parents wake only to be threatened with both near fatal illness and fierce professional rivalry Morell transports us into the world of these compelling personalities demonstrating how a small clan of highly talented and fiercely competitive people came to dominate an entire field of science and to contribute immeasurably to our understanding of the origins of humanity *The Natural History of Creation* Michael Anthony Corey, 1995 *The Natural History of Creation* is the third and final installment in M A Corey's natural theology series This remarkable trilogy has worked in tandem with the findings of modern science to help spearhead the rebirth of the once dead natural theology movement In this detailed yet easy to read work the author focuses on the religious account of creation found in Genesis One and comes to the astonishing conclusion that there is indeed much scientific truth to be found in this ancient work Many other writers have also noticed the breathtaking parallels that exist between modern evolutionism and the creation account given in the Bible but nowhere will the reader find a more thorough description of them than in *The Natural History of Creation* Back cover **Footprints from Fossils to Gallows** Russell H. Tuttle, 2023-06-30 *Footprints from Fossils to Gallows* Adventures in Paleoanthropology Primatology and Forensic Anthropology University of Chicago

professor Russell Tuttle was privileged to study one of the most dramatic and provocative fossil discoveries of the twentieth century 3 66 million year old MA bipedal footprint trails at Laetoli Northern Tanzania This adventure concurrently led to invitations to join a team of barristers and solicitors in defense of two men accused of involvement in a murder in Winnipeg Canada The Queen s Counsel for the prosecution had engaged a certified forensic anthropologist Louise M Robbins 1928 1987 who had worked on a different section of the Laetoli footprints trails before him Her claim to have developed a new science of human footprint analysis for forensic use and wild speculations about the makers of some Laetoli prints prompted him to question her scientific ability and method of footprint analysis Tuttle 1986 and the judgment of fellow forensic anthropologists who supported her testimonials We hope this book might lead to a better understanding of how science can serve our courts by using novel and well established results of scientific research less adversarially with a view to achieve justice for all parties affected by crimes Particularly claims of new forensic methods should be tested thoroughly by peer review outside the courtroom before employment to decide matters of life and death Dr Robbins s decade of quackery is a prime example of how justice might be better served by early thorough scrutiny of a claimant s novel methods and general scientific expertise In addition to relevant literature my main source is correspondence among Drs Robbins Mary Leakey and Michael Day court records of barristers and myself from copies of correspondence in my files dating back to 1980 and Anthropology Archives at the Smithsonian Institution and detailed reports prepared by Dr Robbins and R Tuttle concerning a criminal case in Winnipeg Canada Although I did not set out to write the book as a memoir it quickly became thus as I recalled the experiences that shaped me as a paleoanthropologist Previously my research was on functional morphology history of anthropology and evolutionary biology in the USA and Europe

The Oxford Book of Modern Science Writing Richard Dawkins,2009 Selected and introduced by Richard Dawkins The Oxford Book of Modern Science Writing is a celebration of the finest writing by scientists for a wider audience revealing that many of the best scientists have displayed as much imagination and skill with the pen as they have in the laboratory This is a rich and vibrant collection that captures the poetry and excitement of communicating scientific understanding and scientific effort from 1900 to the present day Professor Dawkins has included writing from a diverse range of scientists some of whom need no introduction and some of whose works have become modern classics while others may be less familiar but all convey the passion of great scientists writing about their science
