*The Anthology At The End Of The Universe* Glenn Yeffeth, 2005-03-11 Every aspect of the science fiction classic *The Hitchhiker's Guide to the Galaxy* is analyzed in a variety of quirky ways in this collection of essays Topics include the logistics of the restaurant at the end of the universe how the Internet is creating the real Hitchhiker's Guide an assessment of Vicon poetry and an analysis of computing The essays are written by both science fiction greats such as Cory Doctorow Lawrence Watt Evans Stephen Baxter Jacqueline Carey and Alastair Reynolds and up and coming writers Up Through an Empty House of Stars David Langford, 2003-08-01 At last Up Through an Empty House of Stars brings together the best of the never before collected SF reviews and articles that helped build David Langford's towering reputation since 1980 Complementing the review columns collected in The Complete Critical Assembly and the knockabout essays and squibs in The Silence of the Langford this volume's 100 glittering selections mix serious critical insight with the inimitable Langford wit In 2002 David Langford won his sixteenth Hugo award as Best Fan Writer for critical and humorous commentary on SF In the same year his occasionally scandalous SF newsletter Ansible won its fifth Hugo Langford also received the 2001 Hugo for best short story and the 2002 Skylark Award Here he shines a unique light on classics like Ernest Bramah G K Chesterton Robert Heinlein and Jack Vance and analyses major SF and major clunkers and minor eccentrics of the 1980s 1990s and early 2000s continuing to the latest by such current stars as Gene Wolfe and China Miéville Plus witty asides on crime fiction and its SF links gleeful examination of writing so bad it's almost good and even at his most serious turns of phrase to make you laugh aloud **The Time Machine Hypothesis** Damien Broderick, 2019-07-12 Every age has characteristic inventions that change the world In the 19th century it was the steam engine and the train For the 20th electric and gasoline power aircraft nuclear weapons even ventures into space Today the planet is awash with electronic business chatter and virtual reality entertainment so brilliant that the division between real and simulated is hard to discern But one new idea from the 19th century has failed so far to enter reality time travel using machines to turn the time dimension into a two way highway Will it come true as foreseen in science fiction Might we expect visits to and from the future sooner than from space That is the Time Machine Hypothesis examined here by futurist Damien Broderick an award winning writer and theorist of the genre of the future Broderick homes in on the topic through the lens of science as well as fiction exploring some fifty different time travel scenarios and conundrums found in the science fiction literature and film **The Stars of Heaven** Clifford A. Pickover, 2004-05-06 Do a little armchair space travel rub elbows with alien life forms and stretch your mind to the furthest corners of our uncharted universe With this astonishing guidebook you don't have to be an astronomer to explore the mysteries of stars and their profound meaning for human existence Clifford A Pickover tackles a range of topics from stellar evolution to the fundamental reasons why the universe permits life to flourish He alternates sections that explain the mysteries of the cosmos with sections that dramatize mind expanding concepts through a fictional dialog between futuristic

humans and their alien peers who embark on a journey beyond the reader's wildest imagination. This highly accessible and entertaining approach turns an intimidating subject into a scientific game open to all dreamers. Told in Pickover's inimitable blend of fascinating state-of-the-art science and whimsical science fiction and packed with numerous diagrams and illustrations, *The Stars of Heaven* unfolds a world of paradox and mystery, one that will intrigue anyone who has ever pondered the night sky with wonder.

**Shades of Freedom** A. Leon Higginbotham, 1998-06-11 A magisterial account of the interaction between the law and racial oppression in America from colonial times to the present, this book demonstrates how the one agent that should have guaranteed equal treatment before the law, the judicial system, instead played a dominant role in enforcing the inferior position of blacks. 43 photos.

**The Long Mars** Terry Pratchett, Stephen Baxter, 2015-04-01 2040 2045 In the years after the cataclysmic Yellowstone eruption, there is massive economic dislocation as populations flee Earth to myriad Long Earth worlds. Sally Joshua and Lobsang are all involved in this perilous work when, out of the blue, Sally is contacted by her long vanished father and inventor of the original Stepper device, Willis Linsay. He tells her he is planning a fantastic voyage across the Long Mars and wants her to accompany him. But Sally soon learns that Willis has ulterior motives. Meanwhile, U.S. Navy Commander Maggie Kauffman has embarked on an incredible journey of her own, leading an expedition to the outer limits of the far Long Earth. For Joshua, the crisis he faces is much closer to home. He becomes embroiled in the plight of the Next, the super-bright post-humans who are beginning to emerge from their long childhood in the community called Happy Landings, located deep in the Long Earth. Ignorance and fear are causing normal human society to turn against the Next, and a dramatic showdown seems inevitable.

**The Long War** Terry Pratchett, Stephen Baxter, 2013 A new America called Valhalla grows restless under the controlling long arm of the Datum government, while all of the Long Earth is infused by the song of the trolls who are starting to react to humanity's thoughtless exploitation, bringing humankind to the brink of war.

**An Informal History of the Hugos** Jo Walton, 2018-08-07 Engaged, passionate, and consistently entertaining, *An Informal History of the Hugos* is a book about the renowned science fiction award for the many who enjoyed Jo Walton's previous collection of writing from Tor.com, the Locus Award-winning *What Makes This Book So Great*. The Hugo Awards, named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society, have been presented since 1953. They are widely considered the most prestigious awards in science fiction. Between 2010 and 2013, Jo Walton wrote a series of posts for Tor.com surveying the Hugo finalists and winners from the award's inception up to the year 2000. Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time. Walton's cheerfully opinionated and

vastly well informed posts provoked valuable conversation among the field's historians Now these posts lightly revised have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton Gardner Dozois and David G Hartwell A remarkable guided tour through the field a kind of nonfiction companion to *Among Others* It's very good It's great New York Times bestselling author Cory Doctorow *Being Boing on What Makes This Book So Great*
