valid nominal species of Aprionodon Gill isodon Valenciennes and Hypoprion M ller and Henle hemiodon Valenciennes
macloti M ller and Henle and signatus Poey plus those of a previously unrecognized species here described as Carcharhinus
leiodon n sp are examined and compared with those of Carcharhinus Blainville Features studied include morphometrics
vertebral numbers and other vertebral characteristics tooth numbers color pattern and some other aspects of external
morphology It is concluded that on these features C Leiodon n sp is entirely encompassed within the parameters of
Carcharhinus and that although A isodon H hemiodon H macloti and H signatus each extend the range of diversity of
Carcharhinus in one or more features A isodon is not uniquely different from Carcharhinus and there is no common pattern
of difference between the three species of Hypoprion and Carcharhinus Accordingly and because the nature of the teeth of
Aprionodon and Hypoprion has been found insufficient to warrant generic distinction from Carcharhinus the genera

Aprionodon and Hypoprion are synonymised with Carcharhinus A diagnosis and description are given for each of the above species The descriptions include measurements counts and line illustrations that show the whole shark in lateral view underside of head nostril and teeth The geographic distribution is summarized as are also the meager biological data available on number of embryos size at birth size at sexual maturity and maximum size PC Mag ,1992-07 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **PC Mag** ,1993-09-14 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology
