Charles,James D. Slotta,Nathaniel Lasry,2019-07-11 This book represents the emerging efforts of a growing international network of researchers and practitioners to promote the development and uptake of evidence based pedagogies in higher education at something a level approaching large scale impact By offering a communication venue that attracts and enhances much needed partnerships among practitioners and researchers in pedagogical innovation we aim to change the conversation and focus on how we work and learn together i e extending the implementation and knowledge of co design methods In this first edition of our Research Topic on Active Learning we highlight two of the three types of publications we wish to promote First are studies aimed at understanding the pedagogical designs developed by practitioners in their own practices by bringing to bear the theoretical lenses developed and tested in the education research community These types of studies constitute the practice pull that we see as a necessary counterbalance to knowledge push in a more

productive pedagogical innovation ecosystem based on research practitioner partnerships Second are studies empirically examining the implementations of evidence based designs in naturalistic settings and under naturalistic conditions Interestingly the teams conducting these studies are already exemplars of partnerships between researchers and practitioners who are uniquely positioned as in between straddling the two worlds As a result these publications represent both the rigours of research and the pragmatism of reflective practice In forthcoming editions we will add to this collection a third type of publication design profiles These will present practitioner developed pedagogical designs at varying levels of abstraction to be held to scrutiny amongst practitioners instructional designers and researchers alike We hope by bringing these types of studies together in an open access format that we may contribute to the development of new forms of practitioner researcher interactions that promote co design in pedagogical innovation

Self-Feeling Gerhard Kreuch, 2019-11-11 This monograph offers new insights into the connection between self consciousness and emotion It focuses on what fundamental feelings of being tell us about ourselves The results enrich the philosophy of human affectivity and help shed new light on some pressing current problems The author seeks to understand self consciousness as an affective phenomenon namely as self feeling He identifies it as a pre reflective pre propositional bodily feeling that shapes our space of possibilities It is the affective disclosure of individual existence His

account overcomes the difficulties of infinite regress and vicious circularity that reflective or higher order accounts of self consciousness struggle with At the same time it helps build a bridge between the basic level of self consciousness and the higher level of more substantial thoughts about oneself The title explores fundamental affectivity Matthew Ratcliffe s theory of existential feelings features of self feeling and appropriateness and inappropriateness in self interpretation It also considers the contributions of the Heidelberg School of self consciousness to current debates The title provides students and researchers with a unique look into such vital philosophical questions as What is self consciousness How do we know ourselves It will also appeal to a wider audience interested in self consciousness and or human affectivity since it does not presuppose knowledge of the jargon
