Binding Media Élika Ortega,2025-03-04 Far from causing the death of the book the publishing industry s adoption

of digital technologies has generated a multitude of new works that push the boundaries of literature and its presentation In this fascinating new work like Ortega proposes the notion of binding media a practice where authors and publishers fasten together a codex and electronic or digital media to create literary works in the form of hybrid print digital objects Examining more than a hundred literary works from across the Americas Ortega argues that binding media are not simply experimentations but a unique contemporary form of the book that effectively challenges conventional regional and linguistic boundaries Furthermore the book demonstrates that binding media have remained marginal in the publishing industry due to technological imperatives like planned obsolescence and commercial ones like replicability and standardization that run counter to these bespoke literary projects Although many binding media and other hybrid publishing initiatives have perished they ve left behind a wealth of material collecting and tracing the residues of these foreshortened projects Ortega builds a fascinating history of hybrid publishing Ultimately this essential account of contemporary book history highlights the way binding media help illuminate processes of cultural hybridization that have been instigated by the expediency of globalized digital technologies and transnational dynamics

The Iowa Review ,2014 [Making Literature Now](#) Amy Hungerford,2016-08-03 How does new writing emerge and find readers today Why does one writer s work become famous while another s remains invisible Making Literature Now tells the stories of the creators editors readers and critics who make their living by making literature itself come alive The book shows how various conditions including gender education business dynamics social networks money and the forces of literary tradition affect the things we can choose or refuse to read Amy Hungerford focuses her discussion on literary bestsellers as well as little known traditional and digital literature

from smaller presses such as McSweeney's. She deftly matches the particular human stories of the makers with the impersonal structures through which literary reputation is made. Ranging from fine grained ethnography to polemical argument, this book transforms our sense of how and why new literature appears and disappears in contemporary American culture.

Postprint N. Katherine Hayles, 2021-02-16 Since Gutenberg's time every aspect of print has gradually changed. But the advent of computational media has exponentially increased the pace, transforming how books are composed, designed, edited, typeset, distributed, sold, and read. N. Katherine Hayles traces the emergence of what she identifies as the postprint condition, exploring how the interweaving of print and digital technologies has changed not only books but also language, authorship, and what it means to be human. Hayles considers the ways in which print has been enmeshed in literate societies and how these are changing as some of the cognitive tasks once performed exclusively by humans are now carried out by computational media. Interpretations and meaning-making practices circulate through transindividual collectivities created by interconnections between humans and computational media, which Hayles calls cognitive assemblages. Her theoretical framework conceptualizes innovations in print technology as redistributions of cognitive capabilities between humans and machines. Humanity is becoming computational, just as computational systems are edging toward processes once thought of as distinctively human. Books in all their diversity are also in the process of becoming computational, representing a crucial site of ongoing cognitive transformations. Hayles details the consequences for the humanities through interviews with scholars and university press professionals and considers the cultural implications in readings of two novels, *The Silent History* and *The Word Exchange*, that explore the postprint condition. Spanning fields including book studies, cultural theory, and media archeology, *Postprint* is a strikingly original consideration of the role of computational media in the ongoing evolution of humanity.

Beyond the Screen Sarah Atkinson, 2014-04-17 Runner-up for the British Association of Film, Television, and Screen Studies Best Book Prize 2015. *Beyond the Screen* presents an expanded conceptualization of cinema which encompasses the myriad ways film can be experienced in a digitally networked society where the auditorium is now just one location amongst many in which audiences can encounter and engage with films. The book includes considerations of mobile web, social media, and live cinema through numerous examples and case studies of recent and near future developments. Through analyses of narrative, text, process, apparatus, and audience, this book traces the metamorphosis of an emerging cinema and maps the new spaces of spectatorship which are currently challenging what it means to be cinematic in a digitally networked era.
