sizzling steaks are themselves the key to reversing the epidemics of obesity diabetes and heart disease In this captivating vibrant and convincing narrative based on a nine year long investigation Teicholz shows how the misinformation about saturated fats took hold in the scientific community and the public imagination and how recent findings have overturned these beliefs She explains why the Mediterranean Diet is not the healthiest and how we might be replacing trans fats with something even worse This startling history demonstrates how nutrition science has gotten it so wrong how overzealous researchers through a combination of ego bias and premature institutional consensus have allowed dangerous misrepresentations to become dietary dogma With eye opening scientific rigor The Big Fat Surprise upends the conventional wisdom about all fats with the groundbreaking claim that more not less dietary fat including saturated fat is what leads to better health and wellness Science shows that we have been needlessly avoiding meat cheese whole milk and eggs for decades and that we can now guilt free welcome these delicious foods back into our lives
