

# 1985 CADILLAC SERVICE INFORMATION

## FOREWORD

This service manual has been prepared by the Service Department of the Cadillac Motor Car Division to aid in servicing 1985 model Cadillac automobiles. It is intended primarily for servicemen who are familiar with earlier model Cadillacs. It includes complete information on service procedures and specifications specific to 1985 Cadillac cars except body service information which is covered in the body service manual.

All information, illustrations and specifications contained in this manual are based on the latest product information available at the time of publication. The right is reserved to make changes at any time without notice. Refer to both the revision pages to this service manual and the Cadillac Serviceman Bulletins for updated information.

When reference is made in this manual to a brand name, number or specific tool, an equivalent product may be used in place of the recommended item.

**NOTICE:** The 1985 Cadillac contains many parts dimensioned in the metric system. It is important to note that, during any maintenance procedure, replacement fasteners must have the same measurements and strength as those removed, whether metric or customary. (Numbers on the heads of metric bolts and on surfaces of metric nuts indicate their strength. Customary bolts use radial lines for this purpose, while most customary nuts do not have strength markings.) Mismatched or incorrect fasteners can result in car damage or malfunction, or possible personal injury. Therefore, fasteners removed from the car should be saved for re-use in the same locations whenever possible. Where the fasteners are not satisfactory for re-use, care should be taken to select a replacement that matches the original. For information, see section 0A or your Cadillac dealer.
