Amaresan,Sapna Chandwani,2025-09-30 This volume details techniques involved in the study of endosymbionts Chapters divided into four sections detail isolation maintenance of diverse endosymbionts classical microscopy staining PCR FISH flow cytometry next generation sequencing endosymbionts metabolites and bacterial endosymbionts in insects Step by step protocols are complemented by personal notes precautions and specifying the reagents to be used in each step to ensure the repeatability of the procedure across labs Authoritative and cutting edge Endosymbionts aims to empower researchers to expand the frontiers of endosymbiosis research and unlock new possibilities for science

Control of biofilms to control caries Jin Xiao,Xiaojing Huang,Mingyun Li,Richard L. Gregory,Keke Zhang,2023-12-11 Dental caries a biofilm mediated multifactorial dynamic disease is identified as a type of global public health problem Microbes including commensals and opportunistic cariogenic pathogens such as Streptococcus mutants embedded within an extracellular matrix form a highly organized biofilm 3D structure Homeostasis of oral biofilm plays a vital role during caries development according to the ecological plaque hypothesis Under unfavorable conditions such as excessive sugar intake an excess of acid is produced by biofilm which resulted in an acid induced selection promoting the growth of acidogenic and aciduric microbes including opportunistic cariogenic bacteria The transition from eubiosis to imbalance finally promotes tooth hard tissue destruction

Thus controlling biofilms is key to controlling caries Though caries has been studied for decades the current situation of this disease is not optimistic From the perspective of biofilm firstly there is a lack of in depth analysis of pathogenic mechanisms Besides mature biofilms are mechanically hard to eliminate and much more resistant to antimicrobial agents than bacterioplankton Moreover materials that filling of decayed teeth are short of antimicrobial activity which contributes to secondary caries

Green Synthesis of Nanomaterials for Bioenergy Applications Neha Srivastava, Manish Srivastava, P. K. Mishra, Vijai Kumar Gupta, 2020-11-09 An authoritative summary of the quest for an environmentally sustainable synthesis process of nanomaterials and their application for environmental sustainability Green Synthesis of Nanomaterials for Bioenergy Applications is an important guide that provides information on the fabrication of nanomaterial and the application of low cost green methods The book also explores the impact on various existing bioenergy approaches Throughout the book the contributors noted experts on the topic offer a reliable summary of the quest for an environmentally sustainable synthesis process of nanomaterials and their application to the field of environmental sustainability The green synthesis of nanoparticles process has been widely accepted as a promising technique that can be applied to a variety of fields The green nanotechnology based production processes to fabricate nanomaterials operates under green conditions without the intervention of toxic chemicals The book s exploration of more reliable and sustainable processes for the synthesis of nanomaterials can lead to the commercial application of the economically viability of low cost biofuels production This important book Summarizes the quest for an environmentally sustainable synthesis process of nanomaterials for their application to the field of environmental sustainability Offers an alternate sustainable green energy approach that can be commercially implemented worldwide Covers recent approaches such as fabrication of nanomaterial that apply low cost green methods and examines its impact on various existing bioenergy applications Written for researchers academics and students of nanotechnology nanosciences bioenergy material science environmental sciences and pollution control Green Synthesis of Nanomaterials for Bioenergy Applications is a must have guide that covers green synthesis and characterization of nanomaterials for cost effective bioenergy applications
