When Science Meets Power Geoff Mulgan,2023-11-08 Science and politics have collaborated throughout human history and science is repeatedly invoked today in political debates from pandemic management to climate change But the relationship between the two is muddled and muddied Leading policy analyst Geoff Mulgan here calls attention to the growing frictions caused by the expanding authority of science which sometimes helps politics but often challenges it He dissects the complex history of states use of science for conquest glory and economic growth and shows the

challenges of governing risk from nuclear weapons to genetic modification artificial intelligence to synthetic biology He shows why the governance of science has become one of the biggest challenges of the twenty first century ever more prominent in daily politics and policy Whereas science is ordered around what we know and what is politics engages what we feel and what matters How can we reconcile the two so that crucial decisions are both well informed and legitimate The book proposes new ways to organize democracy and government both within nations and at a global scale to better shape science and technology so that we can reap more of the benefits and fewer of the harms Also available as an audiobook
