Armed Forces And Conflict Resolution Armed Forces And Conflict Resolution:

Armed Forces and Conflict Resolution Guiseppe Caforio, Gerhard Kummel, Bandara Purkayastha, 2008-10-15 Covers the various aspects of war in the twenty first century where asymmetric warfare has changed many rules of the game imposing a profound transformation on the military not only tactical but also structural preparatory mental and ideological This book also covers the delicate relations between the armed forces and societies Armed Forces and Conflict Resolution ,1986

Handbook of the Sociology of the Military Giuseppe Caforio, Marina Nuciari, 2018-05-19 This new edition of the volume is presented on the wave of the success which had its first edition 2003 It is entirely updated to the current situation of the disciplines covered and expanded with particular regard to the new missions that have become the main challenge for the armed forces in these first decades of the new millennium with new insights to technological development toward so called cyborg warriors new forms of leadership and changes in soldier s identity and organisational culture It is compiled of documents coming from various researchers at universities around the world as well as military officers devoted to the sector of study Covered in this volume is a historical excursus of studies prior to contemporary research interpretive models and theoretical approaches developed specifically for this topic civic military relations including issues surrounding democratic control of the armed forces military culture professional training conditions and problems of minorities in the armed forces an examination of the structural change within the military over the years including new duties and functions following the Cold War

Contemporary Conflict Resolution Oliver Ramsbotham, Tom Woodhouse, Hugh Miall, 2005-12-08 Offering an assessment of the theory and practice of conflict resolution in post Cold War conflicts this book addresses a number of questions It explores the nature of contemporary conflict and the development of conflict resolution **The Handbook of African Defence and Armed Forces** Evert Kleynhans, Marco Wyss, 2025-03-01 The Handbook of African Defence and Armed Forces provides the first in depth and multifaceted analysis of the evolution and current state of national defence policies strategies doctrines capabilities security challenges and strategic responses of African states and their armed forces Geographically these aspects are investigated at the national sub regional and regional levels Chronologically they are analysed against the backdrop of the superpower withdrawal from the continent in the 1990s and the so called New Scramble for Africa which has seen a crescendo of renewed great power interest in the continent s resources as well as its strategic role location and relevance since the 2000s The book takes a bottom up and African centric approach and is organized around five key themes i the differing security outlooks and defence policies of African powers within the region and the different sub regions ii the strategies doctrines transformation and employment of African armed forces iii the relationship between African armed forces with sub regional regional and international organizations iv the challenges that African states and their armed forces have been facing and their strategic responses and v the position of African perspectives and agency in the context of continental and international security and defence Understanding African security

and defence especially in terms of each individual nation's ability to contribute to peacekeeping operations counterterrorism border security and internal security requires a focus on the national level of armed forces and defence policies this in turn sheds light on sub regional and regional divergences challenges and cooperation Based on this framework the chapters in this volume offer comprehensive African perspectives on African and international security and defence and in doing so show the agency of the continent's countries and armed forces in International Security and Relations **Handbook of Regional Conflict Resolution Initiatives in the Global South** Jeronimo Delgado-Caicedo, 2022-07-28 During the first half of the twentieth century the international system was largely dominated by the USA and the colonial powers of western Europe After the two world wars the political and economic dominance of these states guaranteed them and their allies an almost complete control of world politics However as it is the norm in the international system power structures are not immutable After the end of the Cold War rapid changes to the existing international hierarchies took place as new countries from the so called developing world began to emerge as crucial actors capable of questioning and altering the power dynamics of the world It is therefore unthinkable to ignore emerging countries such as Russia the People's Republic of China India Brazil or South Africa in the decision making process in today's world order In addition there is a group of smaller yet increasingly important countries that while acknowledging their inability radically to change the rules of the international system are still eager to shift power relations and enhance their influence in the world Argentina Colombia Egypt Indonesia Iran South Korea Mexico Nigeria Pakistan Saudi Arabia Turkey and Vietnam are generally recognised as part of this grouping of emerging powers from the Global South While there is a consensus amongst academics that emerging powers from the Global South must have a stabilising role within their own regions previous analyses have focused primarily on the impact that emerging powers have had in their own regions conflict resolution initiatives This volume instead aims to go beyond these analyses and provide new insights regarding the effect that this stabilising role has on the continental and global positioning of emerging powers In other words this book explores the relation between a country's involvement in conflict resolution initiatives and its positioning in the international system The volume will contribute to this approach using the perspective of academics and practitioners from countries of the Global South particularly from states that have strengthened or sometimes weakened their position in the international hierarchy of power through a leading role in regional conflict resolution initiatives

Cultural Diversity in the Armed Forces Joseph L. Soeters, Jan Van der Meulen, 2007-01-24 This book addresses the different ways in which armed forces around the world respond to the cultural diversity of their parent societies ethnicity and gender in particular in order to enhance their quality and legitimacy Collective Conflict Management and Changing World Politics Joseph Lepgold, Thomas George Weiss, 1998-05-28 For several decades the debate over collective security the idea that alliances are problematic and that all nations should pledge to come to the aid of any nation that is a victim of aggression has been polarized Collective Conflict Management and Changing World Politics probes the international and

domestic conditions under which collective security tends to work or not and questions if the end of the Cold War makes success more or less likely than before The contributors conclude that collective conflict management is possible under specific situations as they enumerate various domestic and international requisites that circumscribe such possibilities

Conflict Resolution in the Twenty-first Century Jacob Bercovitch, Richard Dean Wells Jackson, 2009-09-08 In the past arbitration direct bargaining the use of intermediaries and deference to international institutions were relatively successful tools for managing interstate conflict In the face of terrorism intrastate wars and the multitude of other threats in the post Cold War era however the conflict resolution tool kit must include preventive diplomacy humanitarian intervention regional task sharing and truth commissions Here Jacob Bercovitch and Richard Jackson two internationally recognized experts systematically examine each one of these conflict resolution tools and describe how it works and in what conflict situations it is most likely to be effective Conflict Resolution in the Twenty first Century is not only an essential introduction for students and scholars it is a must have guide for the men and women entrusted with creating stability and security in our changing world Cover illustration iStockphoto com Conflict Management in Divided Societies

Stefan Wolff, Christalla Yakinthou, 2013-03 This textbook takes a multi perspective approach to the study of conflict management in divided societies The philosophies underpinning constitutional design are clearly explained including power sharing centripetalism power dividing and territorial self governance The actors and processes involved and the practicalities of the settlement process are covered in conceptual and theoretical contributions that include the evolution of diplomacy in peacemaking The book ends with empirical case studies that explore the realities on the ground by specialists drawing on their experience of working in conflict zones *African Conflict Resolution* David R. Smock, 1995 When Somali gunmen killed 18 American Rangers in Mogadishu on October 3 1993 public and congressional support for the American and UN missions in Somalia dropped dramatically In fact U S policymakers began to rethink commitments to peacemaking in Africa

in general Nevertheless many African and U S specialists on African affairs including the contributors to this volume strongly urge the United States to continue active engagement with Africa and creatively support African initiatives to manage and resolve their own conflicts This book brings together nine specialists from Africa and the United States including former diplomats academics policymakers and policy analysts to assess ways to enhance the U S contribution to African efforts to prevent manage and resolve violent conflicts The contributors conclude that U S initiatives can take a variety of forms and need not involve American troops There is a new African willingness to assume responsibility but African institutional and financial capabilities are severely limited African initiatives therefore have little chance of success without significant and sustained international and particularly American involvement
