Communication, Science, Technology, and Innovation in Disaster Risk Management Swapan Talukdar, Ranit Chatterjee, Somnath Bera, Atish Prashar, Rajib Shaw, 2025-03-24 This book presents the three pillars of Disaster Risk Management DRM communication innovation and science and technology These three pillars are applied across five dimensions namely risk identification and reduction preparedness financial protection resilient recovery and risk informed investments in South Asia In the coming decades the region will experience rapid economic

development and population growth which combined with the effects of climate change will increase the likelihood of being affected by hazards As hazards can negatively impact every sector of the economy and undo years of economic progress effective measures to reduce the risk must be incorporated into development plans and poverty reduction strategies Technological advances have opened up previously unimaginable opportunities to strengthen resilience and improve communications In the South Asia it has been experienced that the prevention of hazards and the development of emergency plans enabled by advances in communications and space technology can be much more successful and significantly costly effective than in the past The use of space technology in disaster monitoring early warning and emergency response and for response has shown remarkable efficiency New approaches to Disaster Risk Management DRM are becoming more available due to recent advances in space and communication technology This book focuses on the use and innovation of space technology and communication for DRM in two specific areas the Early Warning System EWS and the Disaster Information Management System DIMS

The Routledge Handbook of Architecture, Urban Space and Politics, Volume I Nikolina Bobic, Farzaneh Haghighi, 2022-10-28 For architecture and urban space to have relevance in the 21st Century we cannot merely reignite the approaches of thought and design that were operative in the last century This is despite or because of the nexus between politics and space often being theorized as a representation or by product of politics As a symbol or an effect the spatial dimension is depoliticized Consequently architecture and the urban are halted from fostering any systematic change as they are secondary to the event and therefore incapable of performing any political role This handbook explores how architecture and urban space can unsettle the unquestioned construct of the spatial politics of governing Considering both ongoing and unprecedented global problems from violence and urban warfare the refugee crisis borderization detention camps terrorist attacks to capitalist urbanization inequity social unrest and climate change this handbook provides a comprehensive and multidisciplinary research focused on the complex nexus of politics architecture and urban space Volume I starts by pointing out the need to explore the politics of spatialization to make sense of the operational nature of spatial oppression in contemporary times The operative and active political reading of space is disseminated through five thematic Violence and War Machines Security and Borders Race Identity and Ideology Spectacle and the Screen and Mapping Landscapes and Big Data This first volume of the handbook frames cutting edge contemporary debates and presents studies of actual theories and projects that address spatial politics This Handbook will be of interest to anyone seeking to meaningfully disrupt the reduction of space to an oppressive or neutral backdrop of political realities Chapters 1 and 23 of this book are freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution CC BY 4.0 license
