The Historical Christ Bruce W. Behrman,2023-02-16 This book uses the recent findings of cognitive and clinical psychology to draw a picture of the historical Jesus The author uses recent research on conversational memory and clinical psychology in order to shine a light on the way Jesus was This book argues that Jesus suffered from manic depressive illness He identified with God He suffered from extreme mood changes and felt great compassion towards people All of these are mental states which may be triggered by manic depression Manic depression is not a dementing illness This author is not saying that Jesus suffered from a backward type of psychosis But manic depression when manifested in talented persons acts

as a catalyst to trigger artistic creativity Many great artists and poets have suffered from manic depression Byron Schumann Tennyson van Gogh Fitzgerald and Lowell to name a few It is among great poets and artists such as these that the author place the historical Jesus This book therefore argues that the writers of the Gospels when they record Jesus as asserting his divinity were conveying an accurate picture of him His assertions of divinity were not fabrications of the early church

Wonder-full Experiences in Music Education Aimee Beaulieu Schmidt, 2022 The question of how musical coordination in a school wind band is addressed by pedagogues was qualitatively reconstructed using videographic interaction analysis A process of Hervorhebungspraktik practice of highlighting was observed which gradually brought musical elements out of their temporal context and into collective perception allowing both atmospheric interaction with content and the growth of professional vision A process of deconstruction and reintegration takes place as musical elements now present in collective consciousness withdraw back into the piece as a whole This necessitates an educational approach emphasizing not only the elements themselves but the relationships between them The realms of edusemiotics and

phenomenology give us a pragmatic way in both a Deweyan and a Peircean sense to approach learning in music making that goes beyond the idea of co constructivism as content with agency teacher and student participate in coordinative interaction Aimee Beaulieu Schmidt is a native Texan with teaching experience in American and German public education As a band director and orchestral musician she has helped build music education programs on two continents She lives with her husband and two daughters near Frankfurt Germany Her research focuses on musical coordination edusemiotics and qualitative video analysis Aimee Beaulieu Schmidt is a native Texan with teaching experience in American and German public education As a band director and orchestral musician she has helped build music education programs on two continents She lives with her husband and two daughters near Frankfurt Germany Her research focuses on musical coordination edusemiotics and qualitative video analysis
