Transpacific Studies Janet Alison Hoskins, Viet Thanh Nguyen, 2014-08-31 The Pacific has long been a space of conquest exploration fantasy and resistance Pacific Islanders had established civilizations and cultures of travel well before European explorers arrived initiating centuries of upheaval and transformation The twentieth century with its various wars fought in and over the Pacific is only the most recent era to witness military strife and economic competition While Asia Pacific and Pacific Rim were late twentieth century terms that dealt with the importance of the Pacific to the economic political and cultural arrangements that span Asia and the Americas a new term has arisen the transpacific In the twenty first century U S efforts to dominate the ocean are symbolized not only in the Pacific pivot of American policy but also the development of a Transpacific Partnership This partnership brings together a dozen countries not including China in a trade pact whose aim is to cement U S influence That pact signals how the transpacific up to now an academic term has reached mass consciousness Recognizing the increasing importance of the transpacific as a word and concept this anthology proposes a framework for transpacific studies that examines the flows of culture capital ideas and labor across the Pacific These flows involve Asia the Americas and the Pacific Islands The introduction to the anthology by its editors Janet Hoskins and Viet Thanh Nguyen consider the advantages and limitations of models found in Asian studies American studies and Asian American studies for dealing with these flows The editors argue that transpacific studies can draw from all three in order to provide a critical model for considering the geopolitical struggle over the Pacific with its attendant possibilities for inequality and exploitation Transpacific studies also sheds light on the cultural and political movements artistic works and ideas that have arisen to contest state corporate and military ambitions In sum the transpacific as a concept illuminates how flows across the Pacific can be harnessed for purposes of both domination and resistance The anthology s contributors include geographers Brenda S A Yeoh Weiqiang Lin sociologists Yen Le Espiritu Hung Cam Thai literary critics John Carlos Rowe J Francisco Benitez Yunte Huang Viet Thanh Nguyen and anthropologists Xiang Biao Heonik Kwon Nancy Lutkehaus Janet Hoskins as well as a historian Laurie J Sears and a film scholar Akira Lippit Together these contributors demonstrate how a transpacific model can be deployed across multiple disciplines and from varied locations with scholars working from the United States Singapore Japan and England Topics include the Cold War the Chinese state U S imperialism diasporic and refugee cultures and economies national cinemas transpacific art and the view of the transpacific from Asia These varied

topics are a result of the anthology's purpose in bringing scholars into conversation and illuminating how location influences the perception of the transpacific. But regardless of the individual view, what the essays gathered here collectively demonstrate is the energy, excitement, and insight that can be generated from within a transpacific framework. *Hannibal's Legacy: Rome and her neighbours before Hannibal's entry* Arnold Toynbee, 1965 *Presidential Nominations to the Civil Rights Commission* United States. Congress. Senate. Committee on the Judiciary, 1984 **Studies**, 2002 An Irish quarterly review Bloody Victory William Philpott, 2016-08-04 1 July 1916 the first day of the Battle of the Somme. The hot, hellish day in the fields of northern France that has dominated our perception of the First World War for just shy of a century. The shameful waste, the pointlessness of young lives lost for the sake of a few yards, the barbaric attitudes of the British leaders, the horror and ignominy of failure. All have occupied our thoughts for generations. Yet are we right to view the Somme in this way? Drawing on a vast number of sources such as letters, diaries, and numerous archives, *Bloody Victory* describes in vivid detail the physical conditions, the combat, and exceptional bravery against the odds, but it also uniquely captures how the Somme defined the twentieth century in so many ways. This is an utterly gripping new analysis of one of the most iconic campaigns in history. *At Home Abroad, Abroad at Home* John Gerard Ruggie, 1995 *The Spectator*, 2008 *The Social Divide* Margaret Weir, 1998-02-01 A Brookings Institution Press and Russell Sage Foundation publication. The extraordinary swings in the scope and content of the policy agenda during the first Clinton administration revealed a fundamental partisan divide over the social role of the federal government. This book argues that the recent conflicts over social policy represent key elements in strategies that parties designed in an attempt to consolidate their hold over the federal government. Long frustrated by divided government, each party exceeded its electoral mandate in hopes of enacting major policy reforms aimed to shift politics in their direction for the foreseeable future. The book traces the overreaching and limited legislative success that characterized the first Clinton administration's approach to three distinctive features of politics and policymaking: the polarization of political elites, the predominance of advertising campaigns, and intense interest group politics. As political parties have ceased to mobilize ordinary people and the unprecedented role that budgetary concerns now play in social policymaking, although neither party managed to enact its major transforming agenda, Congress did pass new policies, most notably welfare reform, that together with a host of other changes in the states and the private sector altered the landscape for social policy. The poor have been the biggest losers, as Democrats and Republicans have fought to win the middle class over to their vision of the future. The authors first analyze the institutions and tools of policymaking, including Congress, the political use of public opinion polling, and the politics of the deficit. They then consider policies designed to win over the middle class, including health care policy, employer-provided social benefits, wages, and jobs, and crime policy. Last, they address policies targeted at the disadvantaged, including welfare, affirmative action, and urban policy. In addition to the editor, the contributors include John Ferejohn, Lawrence R. Jacobs, Robert Y. Sha. **Asiaweek**, 1985-07
