World Congress on Medical Physics and Biomedical Engineering September 7 - 12, 2009 Munich, Germany

Olaf Dössel, Wolfgang C. Schlegel, 2010-01-06 Present Your Research to the World The World Congress 2009 on Medical Physics and Biomedical Engineering the triennial scientific meeting of the IUPESM is the world's leading forum for presenting the results of current scientific work in health related physics and technologies to an international audience. With more than 2 800 presentations it will be the biggest conference in the fields of Medical Physics and Biomedical Engineering in 2009. Medical physics, biomedical engineering and bioengineering have been driving forces of innovation and progress in medicine and healthcare over the past two decades. As new key technologies arise with significant potential to open new options in diagnostics and therapeutics it is a multidisciplinary task to evaluate their benefit for medicine and healthcare with respect to the quality of performance and therapeutic output. Covering key aspects such as information and communication technologies, micro and nanosystems, optics and biotechnology the congress will serve as an inter and multidisciplinary platform that brings together people from basic research, R D industry and medical application to discuss these issues. As a major event for science, medicine and technology the congress provides a comprehensive overview and in depth first hand information on new developments, advanced technologies and current and future applications. With this Final Program we would like to give you an overview of the dimension of the congress and invite you to join us in Munich.

Olaf Dössel, Congress President, Wolfgang C. Schlegel

Sensing Materials and Devices for Biomarkers Vishal Mutreja, Deepika Kathuria, Shweta Sareen, Jeongwon Park, 2024-12-20 Providing a comprehensive look at the state of the art detection technologies and materials used in the development of diagnostics for clinical, medicinal and environmental applications the books in this series are a valuable reference for graduate students and professional researchers across academia and industry. Sensors for Chemical and Biological Applications Manoj Kumar Ram, Venkat R. Bhethanabotla, 2018-10-03 In recent years sensor research has undergone a quiet revolution that will have a significant impact on a broad range of applications in areas such as health care, the environment, energy, food safety, national security and manufacturing. Sensors for Chemical and Biological Applications discusses in detail the potential of chemical and biological sensors and examines how they are meeting the challenges of chem/bio terrorism by monitoring through enhanced specificity, fast response times and the ability to determine multiple hazardous substances. Exploring the nanotechnology approach and carrying this theme throughout the book the chapters cover the sensing

principles for chemical electrical chromatographic magnetic biological fluidic optical and ultrasonic and mass sensing systems They address issues associated with cost synthesis and testing of new low cost materials with high sensitivity selectivity robustness and speed for defined sensor applications The book extensively discusses the detailed analysis of future impact of chemical and biological sensors in day to day life Successful development of improved chemical sensor and biosensor systems and manufacturing procedures will not only increase the breadth and depth of the sensor industry but will spill over into the design and manufacture of other types of sensors and devices that use nanofabrication and microfabrication techniques This reference not only supplies versatile hands on tools useful in a broad array of disciplines but also lays the interdisciplinary groundwork required for the achievement of sentient processing
