Ashok Swain:

Environmental Peacemaking Ken Conca, Geoffrey D. Dabelko, 2002-11-13 Eight contributions written by professors of political science government and politics as well as researchers and program directors for environmental change energy and security projects provide insight into the process of environmental peacemaking based on their experiences in a variety of international regions An initial chapter makes a case for the process successive chapters address the Baltic South Asia the Aral Sea basin southern Africa the Caspian Sea and the US Mexican border Annotation c 2003 Book News Inc Portland OR booknews com

Conflict and the Environment N.P. Gleditsch, 1997-09-30 The end of the Cold War has opened up the arena for increased attention to other lines of conflict both in Europe and globally Environmental disruption by no means a new phenomenon is a chief beneficiary of the shift in priorities in the public debate The Scientific and Environmental Affairs Division of NATO has moved with the times and has defined environmental security as one of the priority areas for its cooperation with Central and Eastern Europe and countries of the former Soviet Union Research on these issues is now thus very much a collaborative effort across former lines of division in Europe The Introduction by Sverre Stub sets the tone Our Future Common or None at All The book reveals the very real risks associated with environmental degradation whether of the land waters or the oceans and charts out previous disputes and points to the very real danger of violent conflict associated with the drying up of natural resources The book ends with a section on Responses which seeks to provide answers to the threats discussed in the preceding sections

Religion and Public Policy Sumner B. Twiss, Marian Gh. Simion, Rodney L. Petersen, 2015-02-26 Examines human rights in relation to religion and the role of religion in perennial issues of war and peace

Terrorism and Asylum James C. Simeon, 2020-09-25 Terrorism and Asylum edited by James C Simeon explores terrorism and asylum in all its interrelated and variable aspects and permutations The critical role terrorism plays as a driver in forced displacement within the context of protracted armed conflict and extreme political violence is analyzed Exclusion from refugee protection for the alleged commission of terrorist activities is thoroughly interrogated Populist politicians blatant use of the fear of terrorism to further their public policy security agenda and to limit access to refugee protection is scrutinized The principal issues and concerns regarding terrorism and asylum and how these might be addressed in the public interest while at the same time protecting and advancing the human rights and dignity of everyone are offered See inside the book

Liberal Peace In Question Kristian Stokke, Jayadeva Uyangoda, 2011-01-01 The present book uses Sri Lanka s failed attempt at negotiating peace with the Liberation Tigers of Tamil Eelam to examine the politics of state and market reforms towards liberal peace Sri Lanka is seen as a critical case that demonstrates key characteristics and shortcomings of liberal peace vividly demonstrated by internationally facilitated elite negotiations and donor funded neoliberal development

Diaspora and Citizenship Claire Sutherland, Elena Barabantseva, 2013-09-13 This collection of papers discusses the impact of diasporas on the articulations and practices of legal political cultural and social citizenship in

their country of origin While the majority of current citizenship debates focus on the challenges and directions in which diasporic and migrant communities impact on the citizenship regime in their country of settlement the papers in this volume approach the study of citizenship from the perspective of the link between the sending state and its diasporic communities abroad The papers discuss the role of language religion kinship and other ethnic markers in diaspora politics and trace their implications for the articulations and practices of citizenship Through discussing cases across political and geographical spectrums and from different historical epochs the book broadens and enriches the debate on citizenship by demonstrating important ways in which diasporas impact on the delineation of citizenship regimes and the politics of national identity in their homeland This links to the continued use of language as an ethnic marker but also one which may be learned allowing a certain degree of choice and shifting affiliations amongst putative members of a diaspora This book was published as a special issue of *Nationalism and Ethnic Politics* Water Diplomacy in Action Shafiqul Islam,Kaveh Madani,2017-01-02

Complex water problems cannot be resolved by numbers or narratives Contingent and negotiated approaches are necessary for actionable outcome In the face of a constantly changing array of interconnected water issues that cross multiple boundaries the challenge is how to translate solutions that emerge from science and technology into the context of real world policy and politics *Water Diplomacy in Action* addresses this task by synthesizing two emerging ideas complexity science and negotiation theory to understand and manage risks and opportunities for an uncertain water future Rooted in the ideas of complexity science and mutual gains negotiation this edited volume shows why traditional systems engineering approaches may not work for complex problems what emerging tools and techniques are needed and how these are used to resolve complex water problems *Warfare Ecology* Gary E. Machlis,Thor Hanson,Zdravko Špirić,Jean E. McKendry,2011-06-06

The purpose of this book is specific and ambitious to outline the distinctive elements scope and usefulness of a new and emerging field of applied ecology named warfare ecology Based on a NATO Advanced Research Workshop held on the island of Vieques Puerto Rico the book provides both a theoretical overview of this new field and case studies that range from mercury contamination during World War I in Slovenia to the ecosystem impacts of the Palestinian occupation and from the bombing of coral reefs of Vieques to biodiversity loss due to violent conflicts in Africa *Warfare Ecology* also includes reprints of several classical papers that set the stage for the new synthesis described by the authors Written for environmental scientists military and humanitarian relief professionals conservation managers and graduate students in a wide range of fields *Warfare Ecology* is a major step forward in understanding the relationship between war and ecological systems

Imagining Indus Zafar Adeel,Robert G. Wirsing,2016-10-20 This volume calls upon over a dozen Indus observers to imagine a scenario for the Indus basin in which transboundary cooperation over water resources overcomes the insecurity arising from water dependence and scarcity From diverse perspectives its essays examine the potential benefits to be gained from revisiting the 1960 Indus Waters Treaty as well as from mounting joint efforts to increase water supply to combat

climate change to develop hydroelectric power and to improve water management The Indus basin is shared by four countries Afghanistan China India and Pakistan The basin s significance stems in part simply from the importance of these countries three of them among the planet s most populous states one of them boasting the world s second largest economy and three of them members of the exclusive nuclear weapons club However the basin s significance stems also from the great importance of the Indus waters themselves due especially to the region s massive dependence on irrigated agriculture as well as to the menace of climate change and advancing water scarcity The Indus this volume imagines is a definite departure from business as usual responses to the Indus basin s emerging fresh water crisis The objective is to kindle serious discussion of the cooperation needed to confront what many water experts believe is developing into one of the planet s most gravely threatened river basins It is thus both assessment of the current state of play in regard to water security in the Indus basin and recommendation about where to go from here

The Oxford Handbook of Peaceful Change in International Relations T. V. Paul, Deborah Welch Larson, Harold A. Trinkunas, Anders Wivel, Ralf Emmers, 2021 Abstract With the rapid rise of China and the relative decline of the United States the topic of power transition conflicts is back in popular and scholarly attention The discipline of International Relations offers much on why violent power transition conflicts occur yet very few substantive treatments exist on why and how peaceful changes happen in world politics This Handbook is the first comprehensive treatment of the subject of peaceful change in International Relations It contains some 41 chapters all written by scholars from different theoretical and conceptual backgrounds examining the multi faceted dimensions of this subject In the first part key conceptual and definitional clarifications are offered and in the second part papers address the historical origins of peaceful change as an International Relations subject matter during the Inter War Cold War and Post Cold War eras In the third part each of the IR theoretical traditions and paradigms in particular Realism liberalism constructivism and critical perspectives and their distinct views on peaceful change are analyzed In the fourth part papers tackle the key material ideational and social sources of change In the fifth part the papers explore selected great and middle powers and their foreign policy contributions to peaceful change realizing that many of these states have violent past or tend not to pursue peaceful policies consistently In part six the contributors evaluate the peaceful change that occurred in the world s key regions In the final part the editors address prospective research agenda and trajectories on this important subject matter Keywords Peaceful Change War Security International Relations Theory Sources of Change Systemic Theory Realism Liberalism Constructivism Critical Theories

Environment, Scarcity, and Violence Thomas F. Homer-Dixon, 2010-07-01 The Earth s human population is expected to pass eight billion by the year 2025 while rapid growth in the global economy will spur ever increasing demands for natural resources The world will consequently face growing scarcities of such vital renewable resources as cropland fresh water and forests Thomas Homer Dixon argues in this sobering book that these environmental scarcities will have profound social consequences contributing to insurrections ethnic clashes urban unrest

and other forms of civil violence especially in the developing world Homer Dixon synthesizes work from a wide range of international research projects to develop a detailed model of the sources of environmental scarcity He refers to water shortages in China population growth in sub Saharan Africa and land distribution in Mexico for example to show that scarcities stem from the degradation and depletion of renewable resources the increased demand for these resources and or their unequal distribution He shows that these scarcities can lead to deepened poverty large scale migrations sharpened social cleavages and weakened institutions And he describes the kinds of violence that can result from these social effects arguing that conflicts in Chiapas Mexico and ongoing turmoil in many African and Asian countries for instance are already partly a consequence of scarcity Homer Dixon is careful to point out that the effects of environmental scarcity are indirect and act in combination with other social political and economic stresses He also acknowledges that human ingenuity can reduce the likelihood of conflict particularly in countries with efficient markets capable states and an educated populace But he argues that the violent consequences of scarcity should not be underestimated especially when about half the world s population depends directly on local renewables for their day to day well being In the next decades he writes growing scarcities will affect billions of people with unprecedented severity and at an unparalleled scale and pace Clearly written and forcefully argued this book will become the standard work on the complex relationship between environmental scarcities and human violence

The UN Watercourses Convention in Force Flavia Rocha Loures, Alistair Rieu-Clarke, 2013-09-11 At the UN General Assembly in 1997 an overwhelming majority of States voted for the adoption of the United Nations Convention on the Law of the Non Navigational Uses of International Watercourses a global overarching framework governing the rights and duties of States sharing freshwater systems Globally there are 263 internationally shared watersheds which drain the territories of 145 countries and represent more than forty percent of the Earth s land surface Hence inter State cooperation towards the sustainable management of transboundary water supplies in accordance with applicable international legal instruments is a topic of crucial importance especially in the context of the current global water crisis This volume provides an assessment of the role and relevance of the UN Watercourses Convention and describes and evaluates its entry into force as a key component of transboundary water governance To date the Convention still requires further contracting States before it can enter into force The authors describe the drafting and negotiation of the Convention and its relationship to other multilateral environmental agreements A series of case studies assess the role of the Convention at various levels regional European Union East Africa West Africa Central Asia Central America and South America river basin e g the Mekong and Congo and national e g Ethiopia and Mexico The book concludes by proposing how future implementation might further strengthen international cooperation in the management of water resources to promote biodiversity conservation as well as sustainable and equitable use

Concrete Revolution Christopher Sneddon, 2015-09-25 *Concrete Revolution* offers a compelling historical account of the U S Bureau of Reclamation s contributions to dam technology Cold War politics and the

social and environmental adversity perpetuated by the U S government in its pursuit of capitalist economic development Founded in 1902 the Bureau amassed geopolitical power after the Second World War in response to the Soviet Union s increasing global influence By offering technical and water resource management advice to the world s underdeveloped regions the Bureau found that it could not only provide them with economic assistance and provide the U S with investment opportunities but also gain alliances for the U S and further the country s global standing in the face of a burgeoning communist regime The book includes a number of case studies from the Bureau s foray into overseas development and the launch of its Foreign Activities Office in 1950 to specific projects such as the Litani River initiative in Lebanon the Blue Nile investigation in Ethiopia and the Mekong river basin development project in mainland Southeast Asia the bureau s longest international undertaking which affected Thailand Laos Cambodia and Vietnam If Sneddon argues we can come to understand dams as both technical and political objects rather than mere instruments of impartial science we can better participate in current debates about large dams and river basin planning [The New American Zionism](#) Theodore

Sasson,2023-11-21 In [The New American Zionism](#) Theodore Sasson challenges the conventional view of waning American Jewish support for Israel Instead he shows that we are in the midst of a shift from a mobilization approach which first emerged with the new state and focused on supporting Israel through big centralized organizations to an engagement approach marked by direct and personal relations with the Jewish state Today growing numbers of American Jews travel to Israel consume Israeli news and culture and focus their philanthropy and lobbying in line with their personal political viewpoints As a result American Jews find Israel more personally meaningful than ever before Yet at the same time their ability to impact policy has diminished as they no longer speak with a unified voice *Global Dangers* Sean M.
