Asian Development Experience Vol. 2 Yasutani Shimomura, 2004-01-19 This volume investigates the missing link the complicated realities of the relations between governance and development through case studies of ASEAN countries Its main objective is to explore a theoretical framework to overcoming the limitations of mainstream approaches by employing case studies on decentralization crisis management corporate governance and foreign aid management of both public and private entities From the beginning of the 1990s onwards the international aid community has increasingly stressed that good governance together with democracy and protection of basic human rights is indispensable for sustainable economic development The terms however are complex broad and arguable They largely refer to discipline of government institutions and the capacity of the public sector While a wide variety of empirical studies has been done on the relations between good governance and development it is still unclear how the differences in governance influence development performance in a real world

Perspectives on the role of the state in economic

development: Taking stock of the “Developmental State” after 35 years Kyle, Jordan, 2017-01-13 This review evaluates the role of the state in development offering a new framework for understanding what capabilities states need to overcome different types of market failures This framework is employed to understand the successes and failures of state led development in Malaysia The review addresses three key questions First what do we know about developmental states and why they emerged Second what have developmental states achieved In answering this question I look not only at growth but also at structural transformation economic upgrading equity and human capability enhancement In contrast to the idea of a single East Asian model of development I find five distinct development trajectories Third how did developmental states utilize state structures to pursue development To answer this final question I examine in depth the history of state led development in Malaysia including agricultural industrial and social policies This case study sheds light on what specific institutional and political capacities helped Malaysia to improve productivity in agriculture expand the manufacturing sector and reduce inequality It also explores why Malaysia has been less successful in developing linkages with the export based manufacturing sector

Asian Development William E. James, Seiji Naya, Gerald M. Meier, 1989 While the world's attention has been focused on the spectacular economic success of Japan and Korea the less developed countries of Asia have often been neglected Asian Development closes the gap In nontechnical style and with minimal mathematics it presents an in depth perspective on the economic development of fourteen countries in East Southeast and South Asia Asian Development is mainly a story of success Though some problems remain Asian countries have shown remarkable resilience in responding to sharp changes in the international economy oil shocks world recession and inflation exchange rate and interest rate fluctuations and rapid technological change The authors conclude that their ability to adjust to changing external conditions is closely related to intelligent governmental policies Looking back they comment In the past growth of the United States and Japan pulled up the growth rates of the smaller economies in the region Looking forward they predict In the future increasingly it will be the growth of the Asian developing countries that acts as a catalyst to growth in the more advanced economies

Changing Contexts and Shifting Roles of the Indian State Anthony P. D'Costa, Achin Chakraborty, 2019-04-26 This book critically discusses the changing relationship between the Indian state and capital by examining the mediating role of society in influencing developmental outcomes It theorizes the state's changing context allowing the discussion of its pursuit of contradictory economic and social welfare goals simultaneously Both structural and ideological factors are argued to contribute to a shifting context but the centrality of redistributive politics and the contradictions therein explain a lot of what the state does and cannot do The book also examines what the state aspires to do but structurally cannot accomplish either because of the scale of the problem or the dysfunctionality that sets in with continuous reforms The collection provides rich evidence on the contested forms of governance arising from changing contexts and shifting roles of the state Readers

will benefit from this recasting of the Indian state in terms of the actual forms of intervention today Changing Contexts and Shifting Roles of the Indian State is a timely book At a time when the question of the role of the state in promoting more inclusive forms of development has never been more urgent this book provides a range of powerful and insightful case studies of how a changing Indian capitalism is impacting and in turn being impacted by the multi stranded role of the Indian state Patrick Heller Professor of Sociology and International Affairs Brown University Providence Since the early 1990s the Indian economy has moved away from a statist model of development to a more market oriented one However very little scholarship exists that attempts to analyse India s recent development experience from a political economy lens This book which is edited by two of India s reputed scholars in the political economy of development addresses this important gap in the literature It provides an insightful account of the role of the state and the market in India s economic resurgence in the last three decades The book also contributes to a fresh understanding of what is meant by a twenty first century developmental state in a globalised world The book will be valuable reading for all scholars of India as well as to researchers in the political economy of development Kunal Sen Director United Nations University World Institute for Development Economics Research UNU WIDER Helsinki This collection gives us a richer and more layered understanding of the Indian contemporary State Rather than see the State as an unchanging entity with unchanging interests the book argues that the role of the State changes with the context and with the change in political regime Thus taking contradictory decisions such as greater dispossession of land from the peasantry and expansion of the universe of economic rights is explainable The argument is that we can have a better understanding when we see the Indian State as dealing with the ebb and flow of a democracy C Rammanohar Reddy Former Editor Economic and Political Weekly Mumbai Japan And Asia: Economic Development And Nation Building Shinichi Ichimura,2015-06-22 The book is a precious reference book for development economics or the political economy of development in Asia or anywhere else Unlike other books first it deals with all the East Asian countries including Japan and other Asian countries Second it offers some empirical research findings based on surveys conducted by the author s group Research on developing countries has been limited by individual scholars observations particularly about the value related issues like politics or religions Thirdly the book digs into the nation building problems which are often neglected by economists It bridges the politics sociology and economics in East Asian countries and is an important reference book for graduate students *Decentralization, Local Governance, and Localizing the Sustainable Development Goals in Asia and the Pacific* Bruno Carrasco,Hanif A. Rahemtulla,Rainer Rohdewohld,2022-10-12 Since its adoption in 2015 the 2030 Agenda on Sustainable Development has shaped not only international development cooperation but also the design of national trajectories for social and economic development In tandem with other global agendas adopted that year such as the Paris Agreement on Climate Change and UN Habitat s New Urban Agenda it remains the global and regional blueprint for sustainable development despite the COVID 19 pandemic The term localizing the

Sustainable Development Goals SDGs has been used to capture the importance of subnational governments for achieving national SDG agendas However there is little deeper analysis of the required nexus between fiscal political and legal arrangements for SNGs their involvement in national policy arenas which discuss and decide on national SDG strategies and the need for locally disaggregated data systems on the one hand and effective SDG localization strategies on the other hand It is this aspect which the present publication explores in greater detail by using country examples and conceptual analyses The text will be of interest to policymakers scholars students and practitioners in public policy and public administration decentralization and sustainable development with a focus on the Asia and Pacific region The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivative License CC BY NC ND 3 0 IGO

Development ,1987 *Korea's Economic Miracle* Robert Castley,2016-07-27 Very few developing countries have successfully industrialised Many are under pressure from international organisations to achieve self sustainable industrialisation This is why Korea s case is particularly interesting There have been many attempts to explain the causes of Koreas economic miracle These have focused mainly on the internal factors such as the discipline of the Korean workforce and export promotion policies The present study however shows that these factors contributed to Korea s impressive growth but do not explain the reasons for her success External factors have been more important the Japanese economy in particular This book examines therefore in detail the impact of Japan s economic growth on the Korean economy in particular the stimulating effects of trade sub contracting relocation of industry investment loans and technology transfer It demonstrates how Japan provided a range of goods services and capitals which were precisely what the newly industrialising country needed Catalogue of Research Literature for Development: Food production and nutrition, development and economics, education and human resources, health, selected development areas United States.
