**Rethinking the World** Jeffrey W. Legro,2016-12-01 Stunning shifts in the worldviews of states mark the modern history of international affairs how do societies think about and rethink international order and security Japan s opening German conquest American internationalism Maoist independence and Gorbachev s new thinking molded international conflict and cooperation in their eras How do we explain such momentous changes in foreign policy and in other cases their equally surprising absence The nature of strategic ideas Jeffrey W Legro argues played a critical and overlooked role in these transformations Big changes in foreign policies are rare because it is difficult for individuals to overcome the inertia of entrenched national mentalities Doing so depends on a particular nexus of policy expectations national experience and ready replacement ideas In a sweeping comparative history Legro explores the sources of strategy in the United States and Germany before and after the world wars in Tokugawa Japan and in the Soviet Union He charts the likely future of American primacy and a rising China in the coming century Rethinking the World tells us when and why we can expect changes in the way states think about the world why some ideas win out over others and why some leaders succeed while others fail in redirecting grand strategy

**London** Robert K. Batchelor, 2020-03-04 A historian recounts the unlikely rise of a world capital and how its understanding of Asia played a key role If one had looked for a potential global city in Europe in the 1540s the most likely candidate would have been Antwerp which had emerged as the center of the German and Spanish silver exchange as well as the Portuguese spice and Spanish sugar trades It almost certainly would not have been London an unassuming hub of the wool and cloth trade with a population of around 75 000 still trying to recover from the onslaught of the Black Plague But by 1700 London's population had reached a staggering 575 000 and it had developed its first global corporations as well as relationships with non European societies outside the Mediterranean What happened in the span of a century and half And how exactly did London transform itself into a global city London's success Robert K Batchelor argues lies not just with the well documented rise of Atlantic settlements markets and economies Using his discovery of a network of Chinese merchant shipping routes on John Selden's map of China as his jumping off point Batchelor reveals how London also flourished because of its many encounters engagements and exchanges with East Asian trading cities Translation plays a key role in Batchelor's study not just of books manuscripts and maps but also of meaning and knowledge across cultures He demonstrates how translation helped London understand and adapt to global economic conditions Looking outward at

London's global negotiations Batchelor traces the development of its knowledge networks back to a number of foreign sources and credits particular interactions with England's eventual political and economic autonomy from church and King. London offers a much needed non Eurocentric history of London first by bringing to light and then by synthesizing the many external factors and pieces of evidence that contributed to its rise as a global city. It will appeal to students and scholars interested in the cultural politics of translation, the relationship between merchants and sovereigns and the cultural and historical geography of Britain and Asia. **Official Gazette of the United States Patent and Trademark Office**, 2003

Embedded Memories for Nano-Scale VLSIs Kevin Zhang, 2009-04-21. Kevin Zhang. Advancement of semiconductor technology has driven the rapid growth of very large scale integrated VLSI systems for increasingly broad applications including high end and mobile computing, consumer electronics such as 3D gaming, multi function or smart phone and various set top players and ubiquitous sensor and medical devices. To meet the increasing demand for higher performance and lower power consumption in many different system applications, it is often required to have a large amount of on die or embedded memory to support the need of data bandwidth in a system. The varieties of embedded memory in a given system have also become increasingly more complex, ranging from static to dynamic and volatile to nonvolatile. Among embedded memories, six transistor 6T based static random access memory (SRAM) continues to play a pivotal role in nearly all VLSI systems due to its superior speed and full compatibility with logic process technology. But as the technology scaling continues, SRAM design is facing severe challenge in maintaining sufficient cell stability margin under relentless area scaling. Meanwhile, rapid expansion in mobile application including new emerging application in sensor and medical devices requires far more aggressive voltage scaling to meet very stringent power constraint. Many innovative circuit topologies and techniques have been extensively explored in recent years to address these challenges. **Applications of Blockchain in Healthcare** Suyel

div **The Material Atlantic** Robert S. DuPlessis, 2015-10-14. In this wide ranging account, Robert DuPlessis examines globally sourced textiles that by dramatically altering consumer behaviour helped create new economies and societies in the early modern world. This deeply researched history of cloth and clothing offers new insights into trade patterns, consumer demand and sartorial cultures that emerged across the Atlantic world between the mid seventeenth and late eighteenth centuries. As a result of European settlement and

the construction of commercial networks stretching across much of the planet men and women across a wide spectrum of ethnicities social standings and occupations fashioned their garments from materials old and new familiar and strange and novel meanings came to be attached to different fabrics and modes of dress The Material Atlantic illuminates crucial developments that characterised early modernity from colonialism and slavery to economic innovation and new forms of social identity     *Climatological Data* ,1983
