Where are you? Self- and body part localization using virtual reality setups Albert van der Veer , 2019-09-19 This volume presents a line of original experimental studies on the bodily self investigating where people locate themselves in their bodies and how accurate they are at localizing their body parts So far it was not well known whether people locate themselves in one or more specific regions of their bodies On the other hand some systematic distortions in indicating bodily locations were already documented In the present studies participants were therefore asked to indicate their self locations as well as the locations of several of their body parts using a self directed first person perspective pointing paradigm in various virtual reality VR setups different head mounted displays and a large screen immersive display Overall participants were found to locate themselves mainly in the upper face and the upper torso However striking differences in self localization were found when testing in different VR setups Upon further investigation these differences were found to be foremost due to inaccuracies in body part localization When taking these inaccuracies into account differences between setups and also with self localization outside of VR largely disappear Another striking finding was that providing participants in between pointing phases with information about their bodies in the form of a real time animated self avatar did not make them more accurate at locating their own body parts While manipulating their viewpoint to chest height of their self avatar did shift the afterwards indicated locations of their own body parts upwards towards where they were seen on the avatar Potential explanations for the various new findings also from tasks outside of VR are discussed Taken together this volume suggests a differential involvement of multi sensory information processing in experienced self

location within the body and the ability to locate body parts Self localization seems to be less flexible possibly because it is strongly grounded in the bodily senses while body part localization appears more adaptable to the manipulation of sensory stimuli at least in the visual modality

Practical Religion: Being Plain Papers on the Daily Duties, Experience, Dangers and Privileges of Professing Christians John Charles Ryle, 2020-09-28 The volume now in the reader's hands is intended to be a companion to two other volumes which I have already published entitled *Knots Untied* and *Old Paths* *Knots Untied* consists of a connected series of papers systematically arranged about the principal points which form the subject of controversy among Churchmen in the present day All who take interest in such disputed questions as the nature of the Church the Ministry Baptism Regeneration the Lord's Supper the Real Presence Worship Confession and the Sabbath will find them pretty fully discussed in *Knots Untied* *Old Paths* consists of a similar series of papers about those leading doctrines of the Gospel which are generally considered necessary to salvation The inspiration of Scripture sin justification forgiveness repentance conversion faith the work of Christ and the work of the Holy Spirit are the principal subjects handled in *Old Paths* The present volume contains a series of papers about practical religion and treats of the daily duties dangers experience and privileges of all who profess and call themselves true Christians Read in conjunction with another work I have previously put out called *Holiness* I think it will throw some light on what every believer ought to be to do and expect One common feature will be found in all the three volumes I avow it frankly at the outset and will not keep it back for a moment The standpoint I have tried to occupy from first to last is that of an Evangelical Churchman

Bodies of Violence Lauren B. Wilcox, 2015 According to conventional international relations theory states or groups make war and in doing so kill and injure people that other states are charged with protecting While it sees the perpetrators of violence as rational actors it views those who are either protected or killed by this violence as mere bodies ahistorical humans who breathe suffer and die but have no particular political agency In its rationalist variants IR theory only sees bodies as inert objects Constructivist theory argues that subjects are formed through social relations but leaves the bodies of subjects outside of politics as brute facts According to Wilcox such limited thinking about bodies and violence is not just wrong but also limits the capacity of IR to theorize the meaning of political violence By contrast to rationalist and constructivist theory feminist theory sees subjectivity and the body as inextricably linked This book argues that IR needs to rethink its approach to bodies as having particular political meaning in their own right For example bodies both direct violent acts violence in drone warfare for example and are constituted by practices that manage violence for example scrutiny of persons as bodies through biometric technologies and body scanners The book also argues that violence is more than a strategic action of rational actors as in rationalist theories or a destructive violation of community laws and norms as in liberal and constructivist theories Because IR theorizes bodies as outside of politics it cannot see how violence can be understood as a creative force for shaping the

limits of how we understand ourselves as political subjects as well as forming the boundaries of our political communities By engaging with feminist theories of embodiment and violence *Bodies of Violence* provides a more nuanced treatment of the nexus of bodies subjects and violence than currently exists in the field of international relations *The Image and Appearance of the Human Body* Paul Schilder,1999-06-24 First Published in 1999 Routledge is an imprint of Taylor Francis an informa company *Alchemy of Bones* Robert Loerzel,2024-03-18 On May 1 1897 Louise Luetgert disappeared Although no body was found Chicago police arrested her husband Adolph the owner of a large sausage factory and charged him with murder The eyes of the world were still on Chicago following the success of the World s Columbian Exposition and the Luetgert case with its missing victim once prosperous suspect and all manner of gruesome theories regarding the disposal of the corpse turned into one of the first media fueled celebrity trials in American history Newspapers fought one another for scoops people across the country claimed to have seen the missing woman alive and each new clue led to fresh rounds of speculation about the crime Meanwhile sausage sales plummeted nationwide as rumors circulated that Luetgert had destroyed his wife s body in one of his factory s meat grinders Weaving in strange but true subplots involving hypnotists palmreaders English con artists bullied witnesses and insane asylum bodysnatchers *Alchemy of Bones* is more than just a true crime narrative it is a grand sprawling portrait of 1890s Chicago and a nation getting an early taste of the dark chaotic twentieth century *Journal of the Transactions of the Victoria Institute, Or Philosophical Society of Great Britain* Victoria Institute (Great Britain),1880 Each volume includes list of members and objects of the institute except v 31 which has no list of members Beginning with v 12 a list of the papers contained in preceding volumes is issued regularly with each volume
