Aspecten Van Holland:

The Political Economy of the Dutch Republic Oscar Gelderblom, 2016-02-24 In the first half of the seventeenth century the Dutch Republic emerged as one of Europe's leading maritime powers. The political and military leadership of this small country was based on large scale borrowing from an increasingly wealthy middle class of merchants, manufacturers and regents. This volume presents the first comprehensive account of the political economy of the Dutch republic from the sixteenth to the early nineteenth century. Building on earlier scholarship and extensive new evidence it tackles two main issues: the effect of political revolution on property rights and public finance and the ability of the nation to renegotiate issues of taxation and government borrowing in changing political circumstances. The essays in this volume chart the Republic's rise during the seventeenth century and its subsequent decline as other European nations adopted the Dutch financial model and warfare bankrupted the state in the eighteenth century. By following the United Provinces's financial ability to respond to the changing national and international circumstances across a three hundred year period much can be learned not only about the Dutch experience but the wider European implications as well.

The Rise and Decline of Holland's Economy J. L. van Zanden, 1993 Ideology and Foreign Policy in Early Modern Europe (1650-1750) Gijs Rommelse, 2016-05-13 The years 1650 to 1750 sandwiched between an age of wars of religion and an age of revolutionary wars have often been characterized as a de-ideologized period. However the essays in this collection contend that this is a mistaken assumption. For whilst international relations during this time may lack the obvious polarization between Catholic and Protestant visible in the proceeding hundred years or the highly charged contest between monarchies and republics of the late eighteenth century it is forcibly argued that ideology had a fundamental part to play in this crucial transformative stage of European history. Many early modernists have paid little attention to international relations theory often taking a Realist approach that emphasizes the anarchism, materialism and power political nature of international relations. In contrast this volume provides alternative perspectives viewing international relations as socially constructed and influenced by ideas, ideology and identities. Building on such theoretical developments allows international relations after 1648 to be fundamentally reconsidered by putting political and economic ideology firmly back into the picture. By engaging with and building upon recent theoretical developments this collection treads new terrain. Not only does it integrate cultural history with high politics and foreign policy it also engages directly with themes discussed by political scientists and international relations theorists. As such it offers a fresh and genuinely interdisciplinary approach to this complex and fundamental period in Europe's development.

The Strictures of Inheritance Jan Luiten van Zanden, Arthur van Riel, 2021-04-13 A major feat of research and synthesis this book presents the first comprehensive history of the Dutch economy in the nineteenth century, an important but poorly understood piece of European economic history. Based on a detailed reconstruction of extensive economic data the authors account for the demise of the Dutch economy's golden age. After showing how institutional factors combined to make the Dutch

economy a victim of its own success the book traces its subsequent emergence as a modern industrial economy Between 1780 and 1914 the Netherlands went through a double transition Its economy which in the words of Adam Smith was approaching a stationary state in the eighteenth century entered a process of modern economic growth during the middle decades of the nineteenth At the same time the country s sociopolitical structure was undergoing radical transformation as the decentralized polity of the republic gave way to a unitary state As the authors show the dramatic transformation of the Dutch political structure was intertwined with equally radical changes in the institutional structure of the economy The outcome of this dual transition was a rapidly industrializing economy on one side and on the other the neocorporatist sociopolitical structure that would characterize the Netherlands in the twentieth century Analyzing both processes with a focus on institutional change this book argues that the economic and political development of the Netherlands can be understood only in tandem

War, Capital, and the Dutch State (1588-1795) Pepijn Brandon, 2015-08-17 In *War Capital and the Dutch State 1588 1795* Pepijn Brandon traces the interaction between state and capital in the organisation of warfare in the Dutch Republic from the Dutch Revolt of the sixteenth century to the Batavian Revolution of 1795 Combining deep theoretical insight with a thorough examination of original source material ranging from the role of the Dutch East and West India Companies to the inner workings of the Amsterdam naval shipyard and from state policy to the role of private intermediaries in military finance Brandon provides a sweeping new interpretation of the rise and fall of the Dutch Republic as a hegemonic power within the early modern capitalist world system Winner of the 2014 D J Veegens prize awarded by the Royal Holland Society of Sciences and Humanities Shortlisted for the 2015 World Economic History Congress dissertation prize early modern period

State Communication and Public Politics in the Dutch Golden Age Arthur der Weduwen, 2024-07-19 *State Communication and Public Politics in the Dutch Golden Age* describes the political communication practices of the authorities in the early modern Netherlands Der Weduwen provides an in depth study of early modern state communication the manner in which government sought to inform its citizens publicise its laws and engage publicly in quarrels with political opponents These communication strategies including proclamations the use of town criers and the printing and affixing of hundreds of thousands of edicts underpinned the political stability of the seventeenth century Dutch Republic Based on systematic research in thirty two Dutch archives this book demonstrates for the first time how the wealthiest most literate and most politically participatory state of early modern Europe was shaped by the communication of political information It makes a decisive case for the importance of communication to the relationship between rulers and ruled and the extent to which early modern authorities relied on the active consent of their subjects to legitimise their government

Cultural Transformations in the Early Modern Western Sephardic Communities Yosef Kaplan, 2019-02-11 From the sixteenth century on hundreds of Portuguese New Christians began to flow to Venice and Livorno in Italy and to Amsterdam and Hamburg in northwest Europe In those cities and later in London Bordeaux and Bayonne as well Iberian conversos established their own Jewish communities openly adhering to Judaism Despite the features these communities shared with other confessional groups in exile what set them apart was very significant In contrast to other European confessional communities whose religious affiliation was uninterrupted the Western Sephardic Jews came to Judaism after a separation of generations from the religion of their ancestors In this edited volume several experts in the field detail the religious and cultural changes that occurred in the Early Modern Western Sephardic communities Highly recommended for all academic and Jewish libraries David B Levy Touro College NYC in Association of Jewish Libraries News and Reviews 1 2 2019

Calvinism and Religious Toleration in the Dutch Golden Age R. Po-Chia Hsia, Henk Van Nierop, 2002-08-01 Dutch society has enjoyed a reputation or notoriety for permissiveness from the sixteenth century to present times The Dutch Republic in the Golden Age was the only society that tolerated religious dissenters of all persuasions in early modern Europe despite being committed to a strictly Calvinist public Church Professors R Po chia Hsia and Henk van Nierop have brought together a group of leading historians from the US the UK and the Netherlands to probe the history and myth of this Dutch tradition of religious tolerance This 2002 collection of outstanding essays reconsiders and revises contemporary views of Dutch tolerance Taken as a whole the volume s innovative scholarship offers unexpected insights into this important topic in religious and cultural history

Adriaan Koerbagh, A Light Shining in Dark Places, to Illuminate the Main Questions of Theology and Religion Michiel R. Wielema, 2011-11-11 Ever since it was first written Adriaan Koerbagh s anti Christian work A Light Shining in Dark Places has been nearly inaccessible Had it been known during the Enlightenment it would have been a great inspiration to radical thinkers However it was suppressed and the author died in jail The full text is now available in English Koerbagh demolishes such Christian notions as the Creator the Trinity the divinity of Jesus heaven and hell angels devils and miracles Instead he presents a monistic world view in which Nature and God are identical Theology is a part of natural science God can only be worshipped by acting rationally Koerbagh s rational religion is intended to contribute to a free peaceful and liberal society

The Netherlandic Presence in Ontario Frans J. Schryer, 2006-01-01 Schryer s central argument is that ethnic groups are as much modern myths as they are integral components of a socially constructed reality Focusing on the large cohort of immigrants from the Netherlands and the former Dutch East Indies who arrived in Canada between 1947 and 1960 Schryer shows how the Dutch despite a loss of ethnic identity and a high level of linguistic assimilation replicated many aspects of their homeland While illustrating and illuminating the diversity among immigrants sharing a common national origin Schryer keeps sight of what is common among them In doing so he shows how deeply ingrained habits were modified in a Canadian context resulting in both continuities and discontinuities The result is a variegated image reflecting a multidimensional reality

Appendices: Persistent Traditions Luc W.S.W. Amkreutz, 2013-12-19 The adoption of agriculture is one of the major developments in human history Archaeological studies have demonstrated that the trajectories of Neolithisation in Northwest Europe were diverse This book presents a study into the archaeology of the communities involved in the process of Neolithisation in the Lower Rhine Area 5500 2500 cal BC It elucidates the role played by the indigenous communities in relation to their environmental context and in view of the changes that becoming Neolithic brought about This volume contains the appendices to the thesis Persistent traditions A long term perspective on communities in the process of Neolithisation in the Lower Rhine Area 5500 2500 cal BC These constitute a comprehensive inventory of 159 mostly excavated archaeological sites in the Lower Rhine Area for which general

characteristics were recorded Their analysis shows that the succession of Late Mesolithic Swifterbant culture Hazendonk group and Vlaardingen culture societies represents a continuous long term tradition of inhabitation of the wetlands and wetland margins of this area forming a culturally continuous record of communities in the transition to agriculture The site catalogue forms both an overview of and detailed introduction into the site based archaeology of this time frame After demonstrating the diversity of the Mesolithic the subsequent developments regarding Neolithisation are studied from an indigenous perspective Foregrounding the relationship between local communities and the dynamic wetland landscape the archaeological evidence regarding its regional inhabitation points to long term flexible behaviour and pragmatic decisions being made For the interpretation of Neolithisation this study offers a complementary approach to existing research Instead of arguing for a short transition based on the economic importance of domesticates and cultigens at sites the emphasis is placed on the persistent traditions of the communities involved New elements instead of bringing about radical changes are shown to be attuned to existing hunter gatherer practices By documenting indications of the mentalit of the inhabitants of the wetlands it is demonstrated that their mindset remained essentially Mesolithic for millennia **Between Poverty and the Pyre** Jan Bremmer,Lourens Van Den Bosch,2002-03-11 Use on Women s History courses Good list of contributors

The Kaleidoscopic Scholarship of Hadrianus Junius (1511-1575) Dirk van Miert,2011-06-09 Hadrianus Junius was Holland s most important scholar of the third quarter of the sixteenth century This book analyses Junius most important works some of which have never been studied before It contextualise them in light of the tradition of humanism *European Contexts for English Republicanism* Gaby Mahlberg,Dirk Wiemann,2016-04-22 *European Contexts for English Republicanism* offers new perspectives on early modern English republicanism through its focus on the Continental reception of and engagement with seventeenth century English thinkers and political events Looking both at political ideas and at the people that shaped them the collection examines English republican thought in its wider European context during the later seventeenth and eighteenth century In a number of case studies the contributors assess the different ways in which English republican ideas were not only shaped by the thought of the ancients but also by contemporary authors from all over Europe such as Hugo Grotius or Christoph Besold They demonstrate that English republican thinkers did not only act in dialogue with Continental authors and scholars their ideas in turn also left a long lasting legacy in Europe as they were received transformed and put to new uses by thinkers in France Italy the Netherlands Germany and Poland Far from being an exclusively transatlantic affair as much of the established scholarship suggests English republican thought also left its legacy on the European Continent finding its way into wider debates about the rights and wrongs of the English Civil War and the nature of government while later translations of English republican works also influenced the key thinkers of the French Revolution and the liberals of the nineteenth century Bringing together a range of fresh and original essays by British and European scholars in the field of early modern intellectual history and English studies this collection of essays revises a one

sided approach to English republicanism and widens the scope of study beyond linguistic and national boundaries by looking at English republicans and their continental networks and legacy

Water management, communities and environment Hilde Greefs, Marjolein 't Hart, 2006 More so than in most other countries water management was crucial in the Middle Ages and early modern era in the Low Countries where both man and the changing ecological conditions strongly affected the landscape Striking is the enormous variation in solutions to the water threat The authors in this *Jaarboek voor Ecologische Geschiedenis* primarily focus on the interaction between society and the environment social political and social economic factors prove to explain why the solutions implemented were sometimes sustainable and sometimes not The various case studies are introduced by Martin Reuss a water management specialist from the United States

The Improper Use of Tax Treaties: With Particular Reference to the Netherlands and the United States Stef Weeghel, 1998-03-27 With particular reference to the Netherlands and the United States T p

A Living Landscape Stijn Arnoldussen, 2008 Today half the Netherlands is below sea level Because of this water management is of key importance when it comes to maintaining present day habitation of the Dutch low lands In prehistory however large parts of the Dutch landscape were highly dynamic due to ongoing fluvial sedimentation Vast deltaic areas with ceaseless river activity formed the backdrop against which prehistoric occupation took place Although such landscapes may seem inhospitable the often excellently preserved archaeological evidence indicates that people lived in these lowlands throughout prehistory This book describes why Bronze Age farmers were keen to settle here and how these prehistoric communities structured the landscape around their house sites at various scales Using a vast body of evidence from several large scale excavations in the Dutch river area the author reconstructs the changes in the cultural landscape over time Starting from the Middle Neolithic changing preferences for settlement site locations and changes in domestic architecture are traced in detail to the Iron Age However for proper understanding of the cultural landscape not only settlements but also graves and patterns of object deposition and their landscape characteristics are discussed By using evidence from over 50 major excavations yielding over 300 house plans this book contains by far the richest data set on Dutch Bronze Age settlements Most of these results have not previously been published in English making this book of over 500 pages a true academic treasure for an international audience The in depth presentation of Bronze Age settlement sites as well as the critical discussion of models and premises current in later prehistoric settlement archaeology have an important relevance stretching beyond the Dutch lowland areas on which it is based The wealth of high quality Dutch data is presented as a synthesized yet well annotated narrative that rises above mere site interpretation even more so due to its landscape scale focus Therefore this book is a must have for those interested in later prehistoric cultural landscapes and settlement archaeology
