

ASPT phlebotomy study guide

what is the most important step when performing venipuncture? correct answer: identifying the patient

what is the best approach to the patient when asked? what does the "disturbing"? correct answer: it tells them the blood test will cause discomfort

what should be done if there is an irregularity with the venipuncture? correct answer: stop and obtain additional finger information (number of the finger)

if punctured by needle use PPE, what should you do? correct answer: stop and follow up with your hand hygiene. Many times why/being correct can differ.

define "true point-of-care" correct answer: identifying key results

when do you disinfect/prepare your hands? correct answer: if before putting on gloves and after taking them off

what is the best way to protect the specimen collection? correct answer: alcohol swabbing

what should be the frequency of specimen collection? correct answer: identifying information of the test itself

what component does the equipment use to? correct answer: it's "drawn" up. The blood is the "draw" and the test is the "draw"
