Assessing The Tradecraft Of Intelligence Analysis Technical Report:

US Intelligence Failure and Knowledge Creation Carl W. Ford, Jr., Kathleen M. Vogel, 2025-10-16 This book examines the roots and elements of the research and knowledge generation problems in US intelligence. The work identifies the crux of the problem as the lack of a research capability in US intelligence which has developed over the past 40 years due to a variety of organizational decisions that prioritized current intelligence reporting and a focus on structural solutions to fix intelligence failures. The book argues that this is the principal cause of recent major intelligence failures regarding 9/11, the 2003 Iraq War and the current Russia Ukraine War. Throughout the book the authors aim to provide short medium and long term policy relevant recommendations to intelligence officials and members of the US Congress in the form of workforce leadership and organizational changes that can be implemented to address existing research shortcomings in intelligence analysis. The book's conclusions will also be relevant to the intelligence agencies of other countries. This book will be of much interest to students of intelligence studies, national security, US politics, defense studies and international relations. **Open**

Source Intelligence in a Networked World Anthony Olcott, 2012-03-22 The book explains how openly available information is undervalued by the intelligence community and how analysts can use of this huge amount of information.

Assessing the Tradecraft of Intelligence Analysis Gregory F. Treverton, C. Bryan Gabbard, 2008-02-27 This report assesses intelligence analysis across the main US intelligence agencies and makes a number of recommendations, some of which parallel initiatives that have begun in the wake of the December 2004 legislation, for instance create a Deputy Director of National Intelligence as a focal point for analysis, establish a National Intelligence University, build a Long Term Analysis Unit at the National Intelligence Council and form an Open Source Center for making more creative use of open source materials.

Intelligence Analysis in the Digital Age Stig Stenslie, Lars Haugom, Brigit H. Vaage, 2021-08-05 This book examines intelligence analysis in the digital age and demonstrates how intelligence has entered a new era. While intelligence is an ancient activity, the digital age is a relatively new phenomenon. This volume uses the concept of the digital age to highlight the increased change, complexity and pace of information that is now circulated as new technology has reduced the time it takes to spread news to almost nothing. These factors mean that decision makers face an increasingly challenging threat environment which in turn increases the demand for timely relevant and reliable intelligence to support policymaking. In this context, the book demonstrates that intelligence places greater demands on analysis work as the traditional intelligence cycle is no longer adequate as a process description. In the digital age, it is not enough to accumulate as much information as possible to gain a better understanding of the world. To meet customers' needs, the intelligence process must be centred around the analysis work which in turn has increased the demand for analysts. Assessments, not least predictions, are now just as important as revealing someone else's secrets. This volume will be of much interest to students of intelligence studies, security studies and international relations. **Cognitive Bias in Intelligence Analysis** Martha Whitesmith, 2020-09-21

This book critiques the reliance of Western intelligence agencies on the use of a method for intelligence analysis developed by the CIA in the 1990s the Analysis of Competing Hypotheses ACH

Transforming US Intelligence for Irregular War Richard H. Shultz Jr., 2020-04-01 When Joint Special Operations Command deployed Task Force 714 to Iraq in 2003 it faced an adversary unlike any it had previously encountered al Qaeda in Iraq AQI AQI's organization into multiple independent networks and its application of Information Age technologies allowed it to wage war across a vast landscape To meet this unique threat TF 714 developed the intelligence capacity to operate inside those networks and in the words of commander Gen Stanley McChrystal USA Ret claw the guts out of AQI In *Transforming US Intelligence for Irregular War* Richard H Shultz Jr provides a broad discussion of the role of intelligence in combatting nonstate militants and revisits this moment of innovation during the Iraq War showing how the defense and intelligence communities can adapt to new and evolving foes Shultz tells the story of how TF 714 partnered with US intelligence agencies to dismantle AQI's secret networks by eliminating many of its key leaders He also reveals how TF 714 altered its methods and practices of intelligence collection intelligence analysis and covert paramilitary operations to suppress AQI's growing insurgency and ultimately destroy its networked infrastructure TF 714 remains an exemplar of successful organizational learning and adaptation in the midst of modern warfare By examining its innovations Shultz makes a compelling case for intelligence leading the way in future campaigns against nonstate armed groups

Treverton, 2015 Intelligence is currently facing increasingly challenging cross pressures from both a need for accurate and timely assessments of potential or imminent security threats and the unpredictability of many of these emerging threats The essence of intelligence is no longer the collection analysis and dissemination of secret information but has become instead the management of uncertainty in areas critical for overriding security goals
