Visualisation and Epistemological Access to Mathematics Education in Southern Africa Marc Schäfer, 2023-04-27 This book demonstrates that using visualisation processes in mathematics education can help to enhance teaching and learning and bridge the inequality gap that exists between well resourced and under resourced schools in Southern Africa Drawing on classroom research conducted in the Southern African region it examines how epistemological access in a context of gross inequality can be constructively addressed by providing research based solutions and recommendations The book outlines

the visualisation process as an integral but often overlooked process of mathematics teaching and learning It goes beyond the traditional understanding of visualisation processes such as picture forming and using tools and considers visualisation processes that are semiotic in nature and includes actions such as gestures in combination with language It adds value to the visualisation in mathematics education research discourse and deliberation in Africa With a unique focus on Southern Africa and open avenues for further research and collaboration in the region it will be a highly relevant reading for researchers academics and post graduate students of mathematics education comparative education and social justice education

Bicycle or Unicycle?: A Collection of Intriguing Mathematical Puzzles Daniel J. Velleman,Stan Wagon,2020-08-17 Bicycle or Unicycle is a collection of 105 mathematical puzzles whose defining characteristic is the surprise encountered in their solutions Solvers will be surprised even occasionally shocked at those solutions The problems unfold into levels of depth and generality very unusual in the types of problems seen in contests In contrast to contest problems these are problems meant to be savored many solutions all beautifully explained lead to unanswered research questions At the same time the mathematics necessary to understand the problems and their solutions is all at the undergraduate level The puzzles will nonetheless appeal to professionals as well as to students and in fact to anyone who finds delight in an unexpected discovery

These problems were selected from the Macalester College Problem of the Week archive The Macalester tradition of a weekly problem was started by Joseph Konhauser in 1968 In 1993 Stan Wagon assumed problem generating duties A previous book written by Wagon Konhauser and Dan Velleman Which Way Did the Bicycle Go gathered problems from the first twenty five years of the archive The title problem in that collection was inspired by an error in logic made by Sherlock Holmes who attempted to determine the direction of a bicycle from the tracks of its wheels Here the title problem asks whether a bicycle track can always be distinguished from a unicycle track You ll be surprised by the answer *The Future of Educational Change* Ciaran Sugrue,2008-02-19 This timely book provides a systematic overview and critique of contemporary approaches to educational change from some of the best known writers and scholars in the field including Andy Hargreaves Larry Cuban Ivor Goodson Jeannie Oakes Milbrey McLaughlin Judyth Sachs and Ann Liebermann Divided into four sections the book addresses the key themes What has been the impact of educational change How has the impact differed in different circumstances What are the new directions for research on policy and practice How can we link research policy and practice By highlighting critical lessons from the past the book aims to set an agenda for policy related research and the future trajectories of educational reforms while also taking into account the dominant rhetorics of international social movements and the refracted nature of policy agenda at national and local levels This book addresses issues which with many educators around the world are currently grappling It will appeal to academics and researchers in the field as well as providing an introduction to key issues and themes in Educational Change for graduates and practitioners **Handbook of Response to Intervention and Multi-Tiered Systems of Support** Paige C. Pullen,Michael J. Kennedy,2018-10-04 Of the many issues facing special education and general education today it is difficult to imagine one more important or timely than response to intervention RTI Almost overnight RTI has become standard practice across the nation Unfortunately RTI remains ill defined falls far short of its evidence based practice goal is almost invariably misused and often results in more harm than good Nevertheless as a conceptual framework RTI has great potential for ensuring that students with disabilities receive appropriate evidence based instruction The mission of this handbook is to present a comprehensive and integrated discussion of response to intervention RTI and its relation to multi tiered systems of support MTSS in both special education and general education Although the two terms are currently used interchangeably distinct differences exist between them Therefore chapters are dedicated to distinguishing the two concepts RTI and MTSS and describing each one s unique role in both general and special education In addition the authors recommend a third term Multi Tiered Instruction to differentiate the practices related to the purpose of the specific intervention *Grammar, Grades 5 - 6* ,2014-03-15 Kelley Wingate s Grammar for grades 5 6 is designed to help students master necessary grammar skills Aligned to the Common Core State Standards this book includes a comprehensive review section for each major concept Each engaging practice page is designed to reinforce essential grammar concepts Grammar skills covered include advanced parts of speech independent and
