PART 1

Questions:

Q. What is a Slide Transition?

During a presentation, a slide transition is the visual effect that occurs when you move from one slide to the next.

Q. Why wouldn't you have your slides with different types of transitions?

When adding transitions, use the same one each time. If you use different transitions all the time, your presentation will look too busy and may not be appropriate for your audience.

Q. What is an Animation?

Adding life to any object in a computer graphics is what animation is all about.

Q. What is the Animation Pane?

The Animation Pane lets you edit manage all object effects on the current slide.

Q. How many animation styles should be applied to a presentation? One style, 10 styles or 50 styles? Explain.

Just you will be no more than two or three types of animation. If you use a variety of animation, your presentation will look strange, clumsy, and unprofessional.

Q. What are Animations?

The PowerPoint animation feature allows you, the presenter, to deal with your most challenging presentations. You can accomplish this by combining a presentation in Slide Show mode.

Integrating Virtual and Traditional Learning in 6-12 Classrooms
Sandra Schamroth Abrams,2014-09-19 Integrating Virtual and Traditional Learning in 6 12 Classrooms introduces a model of layered literacies as a framework for describing and illustrating how students digital experiences can inform educational methods Through the lens of layered literacies educators can envision opportunities to draw upon adolescents out of school interests and activities to meaningfully integrate digital practices within academic contexts Such an approach facilitates innovative teaching inspired learning and successful pedagogy and it thoughtfully highlights the role of technology within

mandated standards based instruction in public schools Combining foundational and contemporary theories supported by data from multiple studies of adolescent learning and honoring teachers and students experiences and resources this text helps educators reconceptualize the ways students learn through and with digital texts and negotiate the connection between online and offline spaces A companion website extends the discussion onto the screen engaging readers in an intertextual approach to learning that complements the concept of layering literacies across disciplines With a foreword by Jennifer Rowsell and an afterword by Bill Cope and Mary Kalantzis it will be of interest to experienced educators and administrators as well as postgraduate graduate and undergraduate students of education
