History, Performance and Conservation Barry Bridgwood, Lindsay Lennie, 2013-09-13 Ideal for students of architectural technology this volume of the Technologies of Architecture series covers the technologies available and the processes necessary for the conservation of existing buildings and environments. This book provides in a single text the tools for students to be able to evaluate such buildings as well as an extensive understanding of the mechanisms which cause their deterioration and knowledge of the technologies available to correct their status. The ever higher standards set for buildings especially in energy conservation contexts demand that practitioners appreciate how the performance of existing structures can be enhanced which is also covered. Considering the work of conservation within a holistic perspective and historical context this book is additionally invaluable for architecture and construction students.

Education and the Historic Environment Mike Corbishley, Don Henson, Peter Stone, 2004-07-31 Practical, inspiring and instructive. Education and the Historic Environment emphasizes the contribution to both education and heritage that results from a positive relationship between the two disciplines. Education and the Historic Environment examines evidence, case studies and chapters from a wide cross section of the heritage sector and argues for the value of using the physical remains of the past. Shows how and where the historic environment can be used to fit into and enhance learning. Examines how guidelines are reinforced. Looks at how physical heritage can not only be used to teach obvious subjects such as history but are also useful across the curriculum from literacy and numeracy to citizenship. Teachers at all levels and students, academics and professionals in archaeology and heritage management will all be able to use the case studies to reform and enhance their work.

Mortuary Monuments and Burial Grounds of the Historic Period Harold Mytum, 2004 This practical volume focuses on the study of historic burial ground monuments but also covers some below ground archaeology as some projects will involve the study of both. It will be an incomparable source for academic archaeologists, cultural resource and heritage management archaeologists, government heritage agencies and upper level undergraduate and graduate students of archaeology focused on the historic or post medieval period as well as forensic researchers and anthropologists.
