Budapest Hotel Wes Anderson and Only Lovers Left Alive Jim Jarmusch      Networked Information Technologies Jan Damsgaard, Helle Zinner Henriksen, 2006-04-11 Software systems that used to be relatively autonomous entities such as e.g. accounting systems, order entry systems etc. are now interlinked in large networks comprising extensive information infrastructures. What earlier used to be stand-alone proprietary systems are now for the most part replaced by more or less standardized interdependent systems that form large networks of production and use. Organizations have to make decisions about what office suite to purchase. The easiest option is to continuously upgrade the existing office suite to the latest version, but the battle between WordPerfect and Microsoft Word demonstrated that the choice is not obvious. What instant messenger network to join for global communication? Preferably the one most colleagues and friends use. AOL Instant Messenger, Microsoft Messenger and ICQ represent three satisfactory but disjunctive alternatives. Similarly, organizations abandon their portfolio of homegrown IT systems and replace them with a single Enterprise Resource Planning (ERP) system. Several ERP alternatives exist on the market, but which is the right one for you? The argumentation and rationale behind these considerations are obviously related to the technological and social networks we are embedded in, but it is not always easy to specify how. Networked Information Technologies: Diffusion and Adoption offers contributions from academics and practitioners who study networked information systems from a diffusion and adoption point of view. Themes related to the conceptualisation of diffusion and adoption of networked information systems are discussed along with studies of the diffusion of networked information systems in public sector institutions and private businesses. This volume contains the edited proceedings of the IFIP Conference on The Diffusion and Adoption of Networked Information Technologies, which was sponsored by the International Federation for Information Processing (IFIP) Working Group 8.6 and held in Copenhagen, Denmark, in October 2003.

Bourdieu's Philosophy and Sociology of Science Kyung-Man Kim, 2023-01-31 This book explores Pierre Bourdieu's philosophy and sociology of science, which though central to his thought have been largely neglected in critical examinations of his work. Addressing the resultant confusion that surrounds Bourdieu's sociologized philosophy of science, it expounds his epistemology and sociology of science, situating it within the context of Anglo-American post-positivist philosophy of science and shedding light on the critique of relativist sociology of science that emerges from his field theory. From a detailed critique of Bourdieu's reflexive sociology and his attempt to enhance the uneasy epistemic status of the social sciences, the author draws on the thought of Jürgen Habermas to suggest critical ethnography as a way of going beyond Bourdieu's critical theory. As such, Bourdieu's Philosophy and Sociology of Science will appeal to sociologists, philosophers and scholars across the social sciences with interests in the work of Bourdieu and the sociology and philosophy of science.
